**1. Manner in which petitioner claims to be substantially and specifically affected:**

We live at 100 Short Beach Road, East Haven. Our house is set back 200 ft off the road. The tower will be approximately 50 yards from our very private back yard. We bought this property because it backed up to protected inlands. We have a lovely private home and do not want the cell tower to be next door. We have invested a lot of money in our home and feel the eyesore and potential health hazards will greatly reduce the value of our home. We are a couple in our late 60's and do not want to move.

**2. Manner and extent to which petitioner proposes to participate:**

We will be attending the August 15<sup>th</sup> meeting and will do everything possible to prevent this tower from being constructed in a residential neighborhood.

We have been told that one of the main reasons this site is being considered is because the building on the property houses one fire engine and they say they get a weak cell phone signal. This station does not have a full time employee stationed there for emergencies. We live one house away from the building at 82 Short Beach Road. A few years ago we needed assistance

from the fire department. The engine came from the general station on Main Street. This is a sub-station that is rarely used.

Copies of this request shall be mailed to all participants at least five (5) business days before the date of the hearing.
