Re: **Cellco Partnership d/b/a Verizon Wireless
Proposed Telecommunications Facility
Orange, Connecticut**

Dear «Salutation»:

Cellco Partnership d/b/a Verizon Wireless (“Cellco”) will be submitting an application to the Connecticut Siting Council (“Council”) on or about May 13, 2014, for approval of the construction of a telecommunications facility in the Town of Orange, Connecticut.

The proposed facility would consist of a new 100-foot tower in the central portion of an approximately 34.6 acre parcel at 831 Derby Milford Road in Orange. Cellco’s radio equipment and a diesel-fueled back-up generator would be installed inside a 12’ x 30’ shelter located at the base of the tower. Access to the facility would extend directly from Derby Milford Road along a new 12-foot wide gravel driveway a distance of approximately 460 feet to the cell site.

Site plan drawings for the proposed facility are attached for your review. The location and other features of the proposed facilities are subject to change under the provisions of Connecticut General Statutes § 16-50g et seq.

State law provides that owners of record of property which abuts a parcel on which a facility is proposed to be located must receive notice of the submission of this application. This notice is directed to you either because you may be an abutting land owner or as a courtesy notice.

If you have any questions concerning the application, please direct them to either the Connecticut Siting Council or me. My address and telephone number are listed above. The Siting Council may be reached at its New Britain, Connecticut office at (860) 827-2935.

Very truly yours,
