**Re: Proposed Verizon Wireless Facility
Orange North
831 Derby Milford Road
Orange, Connecticut**

Dear Ms. Carter,

At your request, All-Points Technology Corporation, P.C. ("APT") is performing an evaluation with respect to historic and archaeological sites to determine if the proposed telecommunications facility at the referenced property would result in a potential adverse effect to such resources.

APT reviewed information on file with the Connecticut State Historic Preservation Office ("SHPO") and has determined that no properties on or eligible for listing on the National Register of Historic Places are located within 0.5 mile of the proposed site. In addition, no recorded archaeological sites are identified at the property. A Historic Resources Screen Map, depicting the Site, vicinity and nearby resources is provided as an attachment to this report. Please note that reported archaeological sites include a 1/4 -mile "buffered" area so as not to identify their specific locations. APT has confirmed that no archaeological sites are on the property or proximate to the site.

Based on these findings, it is our opinion that the proposed development at 831 Derby Milford Road would not result in an adverse effect on historic or archaeological resources. Consultation with the SHPO is ongoing and we anticipate concurrence with our determination.
