Subject: FW: Redding Ridge CSC Docket 449

Please be advised that an additional discussion with the Department's Maintenance Unit and All Points Technology Corporation, who represents the applicant, has determined that an Encroachment Agreement is **not** required for Docket 449. Construction work will only be performed on the property owned by Redding Ridge Fire District 1. In the application, MCM/ New Cingular Wireless (AT&T) has entered into a long term lease with the fire district.

Mr. Whitcomb (All Points Technology Corporation), confirmed in a telephone conversation with this office that no construction will be performed within State ROW. As stated in his e-mail to this office if impacts within State ROW do occur due to unforeseen events, an encroachment permit and the required review by the State's District 4 Permit Office will be performed.

Thank you for your attention to this matter.

Bob

Talked with Kurt again today. He is very responsive and deserves a kudo.

He checked with the reviewing engineer and noted that a new letter will be sent to CSC regarding same. An encroachment permit is not required for the project shown on our submittal. If site construction requires any work within the right of way then a permit will be required. As it is drawn and intended to be constructed an encroachment permit will not be required.
