Project: Construction of a Wireless Telecommunications Facility for AT&T at 33 Keegan Road in  
Plymouth, Connecticut  
NDDB Determination No.: 201502723

Dear Dean,

I have reviewed Natural Diversity Data Base maps and files regarding the area delineated on the map you provided for the proposed Wireless Telecommunications Facility for AT&T located at 33 Keegan Road in Plymouth, Connecticut. According to our records there are known extant populations of State Special Concern *Terrapene carolina carolina* (eastern box turtle), *Glyptemys insculpta* (wood turtle) and *Caprimulgus vociferous* (whippoorwill) that are in the vicinity of the subject property. Thank you for providing, with your application, the protection strategies and protocols that will be in place to protect wood turtles, box turtles and whippoorwill from project impacts. I concur that if these protection strategies are followed then the proposed activities will help avoid unintentional mortality to these species. This determination is good for one year. Please re-submit an NDDB Request for Review if the scope of work changes or if work has not begun on this project by April 20, 2016.

Natural Diversity Data Base information includes all information regarding critical biological resources available to us at the time of the request. This information is a compilation of data collected over the years by the Department of Energy and Environmental Protection's Natural History Survey and cooperating units of DEEP, private conservation groups and the scientific community. This information is not necessarily the result of comprehensive or site-specific field investigations. Consultations with the Data Base should not be substitutes for on-site surveys required for environmental assessments. Current research projects and new contributors continue to identify additional populations of species and locations of habitats of concern, as well as, enhance existing data. Such new information is incorporated into the Data Base as it becomes available. A more detailed review may be conducted as part of any subsequent environmental permit applications submitted to DEEP for the proposed site.

Please contact me if you have further questions at (860) 424-3592, or [dawn.mckay@ct.gov](mailto:dawn.mckay@ct.gov). Thank you for consulting the Natural Diversity Data Base.

Sincerely,

Dawn M. McKay  
Environmental Analyst 3
