RE: **DOCKET NO. 456** – Celco Partnership d/b/a Verizon Wireless Certificate of Environmental Compatibility and Public Need for the construction, maintenance, and operation of a telecommunications facility located at 33 Keegan Road, Plymouth, Connecticut.

Dear Attorney Baldwin:

The Connecticut Siting Council (Council) staff conducted an inspection of the above referenced facility on June 12, 2019 and noted the following:

- a) Construction erosion and sedimentation controls were not removed from the site after site soils were stabilized. Site soils were reported as stabilized in the construction Environmental Monitoring Site Observation Form - Report No. 7, submitted to the Council on July 31, 2017.
- b) The catch basin at the base of the north side of the driveway that was installed as part of this project is covered with a dense layer of leaf litter reducing its effectiveness as a stormwater control measure.

In accordance with Condition No. 13 of Council's Decision and Order for this facility, dated July 9, 2015, the Council requests written correspondence that the above two items have been remediated/addressed.

Thank you for your attention and cooperation.

Sincerely

Melanie A. Bachman
Executive Director

MB/RDM/CW
