INTERVENOR STATUS REQUEST FORM

Docket/Petition No.

461

Town/City

Greenwich

Date

08/25/2015

Name:

Christine Edwards

Street Address:

111 Bible Street

City, State, Zip:

Cos Cob, CT 06807

Contact Number:

203.912.3385

E-mail:

SeeEdwards@aol.com

1. Manner in which intervenor's participation is in the interests of justice and will not impair the orderly conduct of the proceedings:

Requestor is a resident of Greenwich, CT and a Realtor.
Participation to protect the area which 50 years ago was very different and now is an evolving residential and upscale retail / office area.
The Requestor seeks to have this application for a substation denied and relocated to a more suitable area.

2. Manner and extent to which intervenor proposes to participate:

Submit questions, cross-examine witnesses and conduct discovery

3. Statutory authority for intervenor request:

Conn. General Stat. Secs. 4-177a(b), 16-50n (a) (4) and 16-50o

4. Nature of evidence intervenor intends to present:

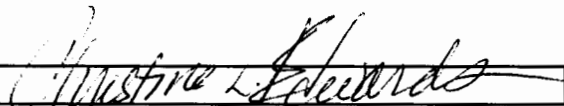

See supplement

Copies of this request are required to be electronically mailed to all participants on the service list, which can be found on our website in Pending Proceedings under the appropriate docket or petition number, at least five days before the date of the public hearing.

1. The lease entered by Eversource and its predecessors dated many years ago was at a different usage and condition of the area.
2. Since that time (@ 50 years ago) the area along Railroad Avenue has matured into an upscale commercial and residential area with condominiums within two blocks which represent \$1,000,000 plus value. Two blocks away (2 Soundview Avenue) a commercial building just sold for \$30,000,000.
3. The restaurants and business contiguous to 280 Railroad Avenue (Pet Pantry) are upscale in nature and completely contrary to the proposed use of Eversource Substation commercial utility purpose.
4. Why would Eversource sell its Route 1 Byram Substation (Eversource Application, Table E-6)
5. Why would Eversource say Greenwich needs more capacity while usage in Greenwich has actually dropped.
6. Why would Eversource use capacity from Cos Cob's substation for MetroNorth and Stamford businesses?
7. New Technology (solar, stand-alone Bloom Boxes) make this substation old technology .
8. Mini grids are more useful and a direction taken by other Companies.
9. Eversource has stated the need for the substation included business to the far north of Greenwich near the Westchester Airport. This would be better served by Stand alone units (i.e., Bloom boxes) and taking electrical power from Westchester.
