**Cc:** Carissa Depetris

**Subject:** Re: Objection to Eversource's Petition for Reconsideration of Greenwich Substation

Dear Members of the Siting Council,

As intervenors, we request that you reject Eversource's request to reopen Docket No. 461. From what we know about Eversource's new proposal, it is materially different enough in rationale and design specifications (e.g., 100'+ towers carrying 115KV overhead wire from Bruce Park to downtown, proposed siting on 281 Railroad Ave) to warrant an in-town public hearing. Our Town and its residents need to be given notice of these changes as well as the opportunity to fully consider the potential impacts of Eversource's proposal. Since Greenwich's energy usage remains well within existing capacity, even in last summer's record heat, there is no urgency to expedite Eversource's application. *We do, indeed, have sufficient time* for thoughtful and inclusive deliberation. *In order to ensure full public participation with respect to Eversource's new proposal, we request that the Siting Council ask Eversource to submit its proposal under a new Docket.*

Sincerely,

Dwight Ueda
