RE: **DOCKET NO. 466** - The Connecticut Light & Power Company d/b/a Eversource Energy Certificate of Environmental Compatibility and Public Need for the Frost Bridge to Campville 115-kilovolt (kV) electric transmission line project that traverses the municipalities of Watertown, Thomaston, Litchfield, and Harwinton, which consists of (a) construction, maintenance and operation of a new 115-kV overhead electric transmission line entirely within existing Eversource right-of-way and associated facilities extending approximately 10.4 miles between Eversource's existing Frost Bridge Substation in the Town of Watertown and existing Campville Substation in the Town of Harwinton; (b) related modifications to Frost Bridge Substation and Campville Substation; and (c) reconfiguration of a 0.4 mile segment of two existing 115-kV electric transmission lines across the Naugatuck River in the Towns of Litchfield and Harwinton within the same existing right-of-way as the new 115-kV electric transmission line.

Dear Ms. Taylor:

Pursuant to Regulations of Connecticut State Agencies §16-50j-62 (b) and in response to your email dated April 24, 2018, the Connecticut Siting Council (Council) staff hereby approves a change to the Development and Management (D&M) Plan for the above-referenced project to allow 24-hour work at the Campville Substation on either April 25, April 26, or April 27, 2018, depending on the availability of work resources. The 24-hour work is necessary to replace insulating gas associated with the Plug and Switch System breaker. Gas replacement requires a 24-hour work window.

This approval applies only to additional work hours requested in your email dated April 24, 2018. Any additional changes to the D&M Plan require advance notification and approval in accordance with the Council's approval of the D&M Plan on September 15, 2016. Furthermore, the Certificate Holder is responsible for reporting requirements pursuant to Regulations of Connecticut State Agencies § 16-50j-62.

Please be advised that deviations from this plan are enforceable under the provisions of the Connecticut General Statutes §16-50u.

Thank you for your attention and cooperation.

Sincerely,

Melanie A. Bachman  
Executive Director

c: Parties and Intervenors

Kathleen M. Shanley, Manager-Transmission Siting, Eversource Energy  
The Honorable Michael R. Criss, First Selectman, Town of Harwinton  
Michael J. Orefice, Planning Commission Chairman, Town of Harwinton

**Subject:** Docket No. 466: Proposed 24 hour Work at Campville Substation

RE: Docket No. 466: Frost Bridge to Campville 115-kV Project  
Proposed 24-hour Work at Campville Substation

Pursuant to the Connecticut Siting Council's (Council) approval letter for the above Docket's Development and Management (D&M) Plan for the Construction of the Frost Bridge to Campville 115-kV Project (Project) Modifications to the Frost Bridge Substation and Campville Substation, The Connecticut Light and Power Company doing business as Eversource Energy (Eversource) requests that Council staff review and approve 24-hour work within the Campville Substation during the scheduled outage. The request is to replace the sulfuric hexafluoride (SF6) gas which contained too much moisture within the Plug and Switch System (PASS) breaker. This process takes 24 hours to complete with constant oversight for safety, and once started, cannot be interrupted. The work is scheduled to take place on April 25, but may be delayed until Thursday or Friday of this week due to limited resources.

Eversource has notified the Town of Harwinton of the proposed work hours and will provide sufficient notice to the abutters of Campville Substation prior to the start of the work.

Please contact Kathleen Shanley at [Kathleen.Shanley@eversource.com](mailto:Kathleen.Shanley@eversource.com) with any questions or concerns.
