SITE NAME: BROOKFIELD SOUTH – 100 POCONO ROAD, BROOKFIELD, CT

GENERAL CELL SITE DESCRIPTION

The proposed Brookfield South cell site would be located in the southerly portion of an approximately 43.28-acre parcel owned by the Town of Brookfield. The facility would consist of a 150-foot telecommunications tower and a 12' x 26' equipment platform located near the base of the tower. The equipment platform would support Cellco's radio equipment and a natural gas-fueled back-up generator. The tower and equipment shelter will be located within a 55' x 70' fenced compound and 75' x 75' leased area.

Cellco would attach twelve (12) antennas and nine (9) remote radio heads to a low-profile platform at a centerline height of 146 feet above ground level. The top of Cellco's antennas would not extend above the top of the tower to an overall height of approximately 150 feet. Vehicular access to the site would extend from Pocono Road over an existing paved and gravel driveway a total distance of approximately 730 feet. Utility service would extend from existing service along Pocono Road.

ENVIRONMENTAL ASSESSMENT STATEMENT

SITE NAME: BROOKFIELD SOUTH – 100 POCONO ROAD, BROOKFIELD, CT

I. PHYSICAL IMPACT

A. WATER FLOW AND QUALITY

No water flow and/or water quality changes are anticipated as a result of the construction or operation of the facility. There are no lakes, ponds, rivers, streams, wetlands or other regulated bodies of water located in the area to be used for the access drive, tower or equipment. The equipment used will not discharge any pollutants to area surface or groundwater systems. The closest wetland area is located approximately 390 feet to the south of the fenced compound and lease area.

B. AIR QUALITY

Under ordinary operating conditions, the Cellco equipment at the Brookfield South Facility would generate no air emissions. During power outages and periodically for maintenance purposes, Cellco would utilize a natural gas-fueled generator to provide emergency back-up power. Cellco's back-up generator will be managed to comply with the "permit by rule" criteria established by the Connecticut Department of Energy and Environmental Protection ("DEEP") Bureau of Air Management, pursuant to R.C.S.A. § 22a-174-36, and therefore is exempt from general air permit requirements.

C. LAND

No tree clearing and minimal grading of the tower compound will be required. The remaining land of the Lessor would remain unchanged by the construction and operation of the cell site.

D. NOISE

Cellco's equipment to be in operation at the site after construction would emit no noise of any kind. Minimal noise from the occasional operation of the back-up generator, which would only run when power to the facility is interrupted and periodically for maintenance purposes may occur. Some noise is anticipated during cell site construction.

E. POWER DENSITY

The worst-case calculation of power density for Cellco's 700 MHz, 850 MHz, 1900 MHz and 2100 MHz antennas at the Brookfield South Facility would be 21.05% of the FCC Safety Standard.

F. VISIBILITY

See Visibility Analysis included as Attachment 9.
