Thank you for keeping me apprised of the cell tower development at 183 Soundview Lane.

I noted the question on the color of the "bark." Is the Siting Council aware that two very large trees on the cell tower property, a very pine tree and deciduous tree, have either been cut down or badly damaged due to storm damage? As a result, the screening that these trees provided the 85 plus foot cell tower from the southern view, is now severely compromised.

Thank you,

Joe Sweeney
