Re: **Application by Dominion Nuclear Connecticut, Inc. to Modify the Existing Independent Spent Fuel Storage Installation at Millstone Power Station, Rope Ferry Road, Waterford, Connecticut**

Dear «Salutation»:

On or about October 31, 2012, Dominion Nuclear Connecticut, Inc. (“DNC”), the owner and operator of Millstone Power Station (“Millstone”) intends to file an application with the Connecticut Siting Council (“Council”) for certain modifications to the existing Independent Spent Fuel Storage Installation (“ISFSI”) at Millstone. The modifications will include but are not limited to changes to existing stormwater drainage structures, the widening of the area adjacent to the concrete loading apron and the installation of all reinforced concrete pads to support 135 horizontal storage modules (“HSM”). DNC’s current ISFSI approval permits the installation of up to 49 HSMs. Other features of the ISFSI modification proposal are subject to change through the Council’s administrative review process pursuant to the provisions of Conn. Gen. Stat. Section 16-50g et seq.

Pursuant to Council procedures and State law, the owners of record of property that abuts the approximately 520-acre Millstone property are entitled to receive notice of DNC’s intent to submit this ISFSI modification application. This notice is directed to you either because you are an abutting landowner or as a courtesy.

If you have any questions concerning the application, please direct them to either the Connecticut Siting Council or me. The Siting Council may be reached at its New Britain office at (860) 827-2935. I can be reached at (860) 444-5656

Very truly yours,

Kevin R. Hennessy
Director – Federal, State and Local
Affairs – New England
