Ms. Linda Roberts  
Executive Director  
Connecticut Siting Council  
Ten Franklin Square  
New Britain, CT 06051

Re: Docket No. NT-2010; NRG Energy, Inc.; Petition No. 875

Dear Ms. Roberts:

I write on behalf of NRG Energy, Inc. ("NRG") and GenConn Energy LLC ("GenConn") to provide you with an original and 15 copies of NRG's responses to the interrogatories addressed to NRG by the Connecticut Siting Council in connection with the above-referenced matter.

Please contact me with any questions or requests for additional information. Also, Ms. Julie Friedberg, General Counsel - Northeast Region, is the contact person at NRG. Her contact information is included on the Service List for this docket.

Sincerely,

Andrew W. Lord

Enclosure

STATE OF CONNECTICUT  
CONNECTICUT SITING COUNCIL

IN RE:

REOPENING OF FINAL DECISIONS  
PURSUANT TO C.G.S. §4-181A(B) FOR  
JURISDICTIONAL NATURAL GAS FIRED  
ELECTRIC GENERATING FACILITIES UNDER  
C.G.S. § 16-50I(A)(3) AND C.G.S. §16-50K(A)  
LIMITED TO COUNCIL CONSIDERATION OF  
CHANGED CONDITIONS AND THE  
ATTACHMENT OF CONDITIONS TO THE  
CERTIFICATES AND DECLARATORY  
RULINGS CONSISTENT WITH THE  
FINDINGS AND RECOMMENDATIONS IN  
THE FINAL REPORT ISSUED BY THE  
KLEEN ENERGY PLANT INVESTIGATION  
REVIEW PANEL (NEVAS COMMISSION)  
AND THE FINDINGS AND  
RECOMMENDATIONS IN THE EXECUTIVE  
REPORT ISSUED BY THE THOMAS  
COMMISSION

DOCKET NO. NT-2010

November 15, 2010

GENCONN MIDDLETOWN LLC RESPONSES TO  
NT-2010 INTERROGATORIES  
GENERATORS

1. If the facility has already been constructed, what versions of the NFPA standards were utilized?

**The facility is currently in construction. See A-2.**

2. If the facility has yet to be constructed, what versions of the NFPA standards will be utilized?

**The facility is currently being designed and constructed utilizing the current version of NFPA 850 and NFPA 37 as guidelines. Any applicable standards mandated by local, state, or federal agencies will also be followed.**

3. How would recommendation #6, "Recommendation as to adoption of codes" in the Thomas Commission Executive Report affect the facility?

If the recommendations of the Thomas Commission Executive Report are accepted by the Department of Public Safety, the facility will be operated and maintained utilizing the current version of the applicable. Any other, applicable standards mandated by local, state, or federal agencies will also be followed.

4. How would the following codes affect construction or modification of the facility:
- a. NFPA 37 (2010 edition)
  - b. NFPA 54 (2009 edition)
  - c. NFPA 54 Temporary Interim Amendment 09-3 (August 25, 2010)
  - d. NFPA 850 (2010 edition)
  - e. NFPA 853 (2010 edition)
  - f. ASME B31;
  - g. ASMEB31.1 Appendices IV and V.
- 
- a. **NFPA 37 (2010 edition) – NFPA 37 is the Standard for the Installation and Use of Stationary Combustion Engines and Gas Turbines and is being followed unless the manufacturer of the combustion turbines mandates an alternative or more stringent standard.**
  - b. **NFPA 54 (2009 edition) – NFPA 54 currently exempts “fuel gas piping in electric utility plants.” Most of NFPA 54 pertains to much smaller devices and piping than is typically found in power generation facilities and as such much of this Standard is inappropriate for application to construction or modification of the facility.**
  - c. **NFPA 54 Temporary Interim Amendment 09-3 (August 25, 2010) – This amendment details the requirements for purging of gas systems. The purging requirements recommended are minimum standards and more stringent standards, in fact, would follow as a matter of course during construction or modification of this facility.**
  - d. **NFPA 850 (2010 edition) – NFPA 850 is currently considered “Recommended Practice” and is being utilized as a guideline in the design and construction of this facility. If the requirements of this Standard were deemed mandatory, GenConn Middletown LLC would adhere to the applicable sections if construction or modification of the facility was undertaken.**
  - e. **NFPA 853 (2010 edition) – NFPA 853 is the Standard for the Installation of Stationary Fuel Cell Power Systems and is not applicable to construction or modification of this facility.**
  - f. **ASME B31 – ASME Codes B31.1 Power Piping, B31.3 Process Piping and B31.8 Gas Transmission and Distribution Systems are being**

followed where applicable for the construction of the facility and will be followed for any modifications during the life of the facility.

- g. **ASME B31.1 Appendices IV and V – Appendices IV and V are currently non-mandatory appendices. However, corrosion protection will be provided with any construction or modification of existing gas piping per Appendix IV or using an alternate method as allowed for in IV-2.3. Applicable Sections of Appendix V in relation to gas pipeline operations and maintenance are being developed for post construction operation.**

5. What is useful lifespan of the natural gas piping/pipelines located within and to the facility?

**The useful lifetime of the piping to be installed is greater than 40 years.**

6. Would the natural gas piping/pipelines within and to the facility need to be replaced during the life of the facility?

**It is not anticipated that the piping will be replaced during the lifetime of the facility.**

7. Do you foresee any circumstances that would require replacement of a section of natural gas piping/pipeline within and to the facility?

**With proper maintenance and corrosion protection, it is not anticipated that any of the gas piping will need replacement.**

8. If so, would a new section of natural gas piping/pipeline within and to the facility be installed and require cleaning?

**If replacement of a section of pipe becomes necessary, any replacement piping would require cleaning prior to being put into service.**

9. What type of material is the natural gas piping/pipeline within and to the facility composed of?

**The natural gas pipeline within and to the facility will be carbon steel up to the final filtration equipment before the combustion turbines. The piping from the filters to the turbines will be stainless steel.**

10. How many linear feet of natural gas piping/pipeline are located within and to the facility?

**There will be approximately 200 feet of piping installed from the existing pipeline to the plant metering station. Within the facility, there will be**

**approximately 1000 feet of additional piping from the gas metering station (the interconnection point) to the combustion turbines.**

11. What is operating pressure (psig) of the natural gas piping/pipeline within and to the facility?

**The maximum allowable operating pressure of the gas pipeline to the facility is 1000 psig however the typical operating pressure will be 450 psig. As such a gas compressor will be installed to provide the required 675 psig at the combustion turbines.**

12. What is the nominal pipe size in inches within and to the facility?

**The pipeline to the facility will be 10" and will be increased to 12" to the dew point heaters within the facility. The piping will then be reduced to 4" to the combustion turbines.**

13. What is the length in feet of piping/pipeline that requires/required purging within and to the facility?

**All of the new gas piping, approximately 1200 feet, will require cleaning.**
