Re: Public Hearings on Natural Gas-Fired Electric Generating Facilities

Dear members of the Siting Council:

I am writing on behalf of PPL Energy Services Holdings, LLC with respect to the fuel cell located at the Pepperidge Farm's manufacturing facility in Bloomfield, Connecticut. Please be advised that the fuel cell in question is currently inactive and being decommissioned. It will be dismantled and then removed from its current location. Accordingly, there will be no methane or flammable gas being used by the fuel cell. Because of the decommissioning of the fuel cell, we respectfully wish to inform the Siting Council that we will not be sending a representative to testify before the Council on Tuesday December 14th.

Should this present a problem, please contact me at your earliest convenience.

Very truly yours,

A handwritten signature in black ink that reads "Michael E. Kroboth". The signature is written in a cursive, flowing style.
