VIA ELECTRONIC MAIL

November 21, 2023

To: Electric Generating Facility Representatives

From: Melanie A. Bachman, Executive Director *MAB*

RE: **Connecticut Siting Council Review of the Ten-Year Forecast of Connecticut Electric Loads and Resources.** 2023 Forecast Reports – Electric Generating Facilities.

Pursuant to Connecticut General Statutes (CGS) §16-50r, every person engaged in generating electric power in the state utilizing a *generating facility with a capacity greater than one megawatt*, shall, annually on or before March 1st, file a report on a forecast of loads and resources which may consist of an update of the previous year's report with the Connecticut Siting Council (Council) for its review.

On February 28, 2023, the Council distributed a reminder memorandum respectfully requesting submission of the forecast reports by March 31, 2023.

During the public comment session held on the Council's Forecast of Electric Loads and Resources held at 6:30 PM on November 15, 2023, a member of the public submitted a list of electric generating facilities that did not submit reports by the Council's extended deadline.

The list that was submitted to the Council is attached.

The Council respectfully requests a report, or in the alternative, a status update on construction and/or operation of the identified electric generating facilities be submitted to the Council by **December 29, 2023**.

Thank you for your attention to this very important matter.

MAB/dll

The following are solar petitions I cannot find within the online forecast reports. The list has been filtered as operational solar petitions with outputs greater than 1 MWac. My list may not be a complete or may include sites that were not fully operational by the time of the report. Without a forecast report I can only rely on the petition web links for information about the operational dates and in some cases the files reference a construction completion date without mentioning operation. The parent companies shown are my best guess from what I found online.

This list does not include "split" sites where solar arrays are broken into multiple smaller sub-companies within one original petition. A few of these sub-companies have reported, but are not included here because I have yet to find or link them to their host petitions within my database.

Apparent Missing Forecast Reports 2023 for Solar PV Sites (Data years 2022 and earlier)

CT1042	MWac: <input type="text" value="5.000"/>	Operational: <input type="text" value="12/23/2013"/>	Years in operation by end of 2022 <input type="text" value="8.9"/>
