Re: Expansion of Head End Facilities
Waiver of 60-Day Waiting Period

Dear Mayor Jaskiewicz:

As you are aware, MetroCast Communications of Connecticut, LLC ("MetroCast") recently has acquired Eastern Connecticut Cable and all of its facilities, including a head end facility located in the Town of Montville. As part of MetroCast's commitment to investing in and improving its newly acquired facilities, MetroCast plans to upgrade and expand the Montville head end facilities, including the construction of nine new earth station satellite receivers.¹ This will allow MetroCast to provide a vastly greater amount of quality cable programming to its cable subscribers.

In order to proceed with the upgrade, MetroCast needs the approval of the Connecticut Siting Council (the "Council"). The Town's review, feedback, and comment on MetroCast's proposed upgrade is one of the many necessary regulatory requirements to be completed in order for the Council to approve MetroCast's head end expansion.

Pursuant to Section 16-50(e) of the Connecticut General Statutes, MetroCast cannot file its application to upgrade the Montville head end facilities with the Siting Council until 60 days after the Town of Montville receives a copy of MetroCast's proposed upgrade. By this letter, MetroCast requests that the Town waive the required 60-day requirement. As the Town's input in this process is essential, waiving the time by which MetroCast can file its application with the Siting Council will not substantively alter or diminish any of the Town's rights concerning this matter.

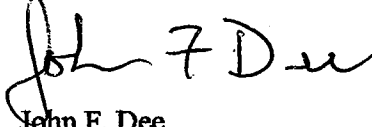

¹ Eastern Connecticut Cable built the current head end facilities located in Montville in 1972.
