Re: **Docket No. 345 - Application Of MCF Communications bg, Inc. And
Cellco Partnership d/b/a Verizon Wireless For A Certificate Of
Environmental Compatibility And Public Need For The Construction,
Maintenance And Operation Of A Wireless Telecommunications Facility
Off Exeter Drive In Sterling, Connecticut**

Dear Mr. Phelps:

On behalf of the applicant, MCF Communications bg, Inc. and Cellco
Partnership d/b/a Verizon Wireless, I would like to submit, for inclusion in the
Docket No. 345 record, two additional exhibits. These exhibits include:

1. Revised photosimulations. These photosimulations are identical to those included behind Tab 8 of the Application with one exception. Each "existing view" photograph location from which the tower was visible, now includes a reference arrow indicating the location of the balloon photographed the day the field work was completed for the visibility analysis. Council members have, in the past, asked Clough Harbour Associates to include this information in future filings.
2. A revised project plan Sheet No. A02 which now includes the surveyed location of wetland flags proximate to the proposed cell site compound area.
