RE: Docket No. 466: Frost Bridge to Campville 115kV Project
Notice of Completion of Project Construction, Including Right-of-Way Restoration and
Rehabilitation

Dear Chairman Stein:

Pursuant to the Rules of Connecticut State Agencies (RCSA) Section 16-50j-62(b) and Condition 11 of the above-referenced docket, and as described in Volume 1, Section 7.3 of the Development and Management Plans for the Frost Bridge to Campville Project (Project): *New 115-kilovolt (kV) Transmission Line and Related Transmission Line Modifications and Modifications to the Frost Bridge Substation and Campville Substation*, The Connecticut Light and Power Company doing business as Eversource Energy (Eversource) hereby provides to the Connecticut Siting Council (Council) this Notice of Completion of Project construction.

As noted in previous submissions to the Council, all Project facilities, including a new 10.4-mile 115-kV transmission line (the 1854 Line), the separation of a 0.4-mile segment of the 1191 and 1921 lines, and modifications to the existing Frost Bridge and Campville substations, are in service and all construction activities are complete (including site restoration and rehabilitation). Over the last three months of 2018, Eversource monitored the areas disturbed by Project construction and verified that all restoration and stabilization is effective.

Should you or other Council members have any questions regarding this submission, please do not hesitate to contact me via e-mail at kathleen.shanley@eversource.com or telephone at (860) 728-4527.

Sincerely,

A handwritten signature in blue ink, appearing to read "Kathleen M. Shanley".

Kathleen M. Shanley
Manager, Transmission Siting
