

Site Information

Site Name: Antares Solar Field

Site Location: 44 Grassy Hill East Lyme, CT 06333

Date: June 14, 2016

Work Performed

Description

After a full site walk by the Connecticut Siting Council, it was determined that the necessary landscaping must be installed per approved Development and Maintenance Engineered drawings, which includes planting of trees and shrubs along the perimeter of the site. Also due to original seeding not holding through the winter, GRE must re-seed the embankment near the utility interconnection point.
