Re: NRG Energy, Inc. Pre-Filed Testimony; Docket No. 907

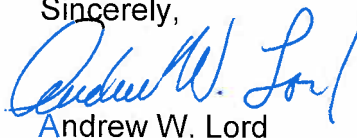

Dear Mr. Phelps:

I write on behalf of NRG Energy, Inc. ("NRG") to provide you with originals and twenty-five (25) copies of the following:

1. Pre-filed Testimony of Ms. Cynthia L. Karlic.
2. Pre-filed Testimony of Mr. Jonathan R. Baylor
3. Pre-filed Testimony of James T. O'Donnell, P.E.

If you have any questions or require additional information, please feel free to contact me.

Sincerely,

Andrew W. Lord

STATE OF CONNECTICUT
CONNECTICUT SITING COUNCIL

MONTVILLE POWER LLC PETITION :
FOR A DECLARATORY RULING TO APPROVE : PETITION NO. 907
THE RETROFIT AND OPERATION OF A 40 MW :
BIOMASS-FUELED GENERATION UNIT AT :
MONTVILLE STATION IN UNCASVILLE, :
CONNECTICUT : SEPTEMBER 9, 2009

PREFILED TESTIMONY OF CYNTHIA L. KARLIC

Q. Please state your name, title and business address.

A. Cynthia L. Karlic
Northeast Regional Environmental Director, Environmental and New Business
NRG Energy, Inc.
P.O. Box 1001
1866 River Road
Middletown, CT 06457

Q. Please describe your current responsibilities and professional expertise.

As the Northeast Regional Environmental Director for Environmental and New Business for NRG Energy, Inc. ("NRG"), I am responsible for air regulatory and policy programs as they relate to the current and future operations of NRG's New England electric generating facilities. I also oversee the environmental programs for NRG's Northeast Region, which includes the Montville Station. My qualifications are described in more detail in my resume, which is attached.

Q. What has been your role in the Montville Biomass Project?

A. I provided technical support to NRG's Montville Power LLC ("MPL") team in the area of environmental regulatory issues. In particular, I prepared, or assisted in the preparation of, i) the environmental sections in the subject petition for a declaratory ruling, and ii) the responses to the Siting Council's interrogatories.

Q. Were the documents and activities described above performed by you or performed under your supervision and control?

A. Yes.

Q. Are you prepared to address those documents and activities described above?

A. Yes.

Q. Is the information presented in the documents described above true and accurate to the best of your knowledge and belief?

A. Yes.

Q. At this time, are there any additions, corrections or clarifications to the information presented in the documents described above?

A. No.

Q. Does this conclude your testimony?

A. Yes.

Cynthia L. Karlic

E-mail address: cynthia.karlic@nrgenergy.com

Summary of Qualifications

Experienced environmental professional with a concentration in air quality programs. Broad background in negotiating, implementing, and interpreting environmental regulations and policies, as well as providing regulatory support services to the Companies' respective business units.

Work Experience

December 1999 to Present - NRG Energy, Inc. – Middletown, CT

Northeast Regional Environmental Director, Environmental and New Business

Responsible for air regulatory and policy programs as they relate to the current and future operations of NRG's New England power plants, and also for overview environmental programs for NRG's Northeast Region.

Major accomplishments include the following:

- Developed company comments on proposed Ozone Transport Commission multi-pollutant position.
- Managed the air permitting for eight new peaking units as part of the GenConn project.
- Managed the projects to submit renewal applications for Title V permits.
- Represent NRG in the Regional Greenhouse Gas Initiative and OTC processes.
- Company team member on the negotiation of a major environmental statute affecting Connecticut and Massachusetts power plants operations.

January 1983 – December 1999 - Northeast Utilities Service Company – Berlin, CT

Principal Engineer, Fossil and Hydro Operations – Berlin, CT

Responsible for air permitting and compliance activities for company locations in Connecticut and Massachusetts.

Major accomplishments include the following:

- Lead Environmental person on the team for the sale of company power plants in Connecticut and Massachusetts.
- Completed successful emergency permitting with Connecticut DEP and Siting Council for five combustion turbines and one fossil-fire boiler during the shutdown of nuclear generation in Connecticut.

Senior Engineer, Research Department – Berlin, CT

Responsible for implementing research project related to environmental matters.

Accomplishments include:

- Environmental permitting and guidance on the installation of a landfill gas fueled fuel cell at the Groton, Connecticut landfill.
- Provided environmental support for the proposed installation of generation at the Connecticut landfill.

Senior Engineer, Fossil and Hydro Licensing Department – Berlin, CT

Responsible for permitting and compliance activities related to air regulations at company fossil plants in Connecticut and Massachusetts:

- Preparation and submittal of first round of Title V permits for fossil plants in Connecticut and Massachusetts.
- Participation in the implementation of federal Acid rain requirements including certification of CEMS for the fossil plants.
- Provided support to plant environmental staff on compliance activities related to NOx regulations and air audits.

Power Plant Engineer – West Springfield, MA

Responsible for power plant engineering projects and environmental compliance at a fossil-fuel power plant.

Engineer, Fossil and Hydro Licensing Department – Berlin, CT

Responsible for hazardous waste and water discharge permitting for the company's generating facilities and service centers.

March 1981 – August 1982 – Disposal Systems, Inc. – LaPorte, TX

Plant Engineer

Responsible for environmental permitting and compliance for the operation of a deep injection well for hazardous waste disposal. Responsible for permitting for company chemical trucking facilities in Texas and Louisiana.

June 1979 – March 1981 – Goodyear Tire & Rubber Company – Akron, OH

Plant Engineer – Bayport, TX

Responsible for plant engineering projects at a hydroquinone production plant.

Engineer – Akron, OH

Member of company rotating engineer staff, having work assignments in the pilot plant, corporate environmental engineering, and chemical research departments.

PREFILED TESTIMONY OF JONATHAN R. BAYLOR

Q. Please state your name, title and business address.

A. Jonathan R. Baylor
Manager – Development
NRG Energy, Inc.
211 Carnegie Center
Princeton, New Jersey 08540

Q. Please describe your current responsibilities and professional expertise.

A. I am a Manager of Development for NRG Energy, Inc.'s ("NRG") Northeast Region. I am responsible for the development of biomass generation projects, including the Montville Biomass Project, which is the subject of this petition. In addition, I am responsible for the development of coal and natural gas-fired projects in New York. My responsibilities include preliminary design, permitting, scheduling, budgeting and project execution. My qualifications are described in more detail in my resume, which is attached hereto as Attachment A.

Q. What has been your role in the Montville Biomass Project?

A. I have overarching responsibility for all development aspects of the Montville Biomass project. Specifically, I oversaw the preparation of the petition and the responses to the Siting Council's interrogatories.

Q. Please describe the community outreach efforts that you have made since the petition and the responses to interrogatories were filed with the Council.

A. Since the petition and interrogatories were filed with the Council, MPL's representatives have met or spoken with Town of Montville officials, including the Mayor and the members of the Town Council, as well as all the State Representatives and State Senators for Montville, including the following:

Senator Edith Prague
Senator Andrea Stillman
Representative Tom Reynolds
Representative Betsy Ritter
Representative Kevin Ryan

These Senators and Representatives strongly support the Montville Biomass Project, as evidenced by the letter to Chairman Caruso, dated September 8, 2009, a copy of which is attached hereto as Attachment B.

In addition, MPL mailed invitations to approximately 50 abutters and Lathrop Road residents for an Open House at Montville Station on September 15, 2009 to present the project. Further, MPL sent letters to the Chief Elected Officials of the Town of Ledyard and the Town of Waterford. As indicated on MPL's response to the Siting Council Interrogatory No. 1, MPL mailed notice letters to the owners of land abutting Montville Station. Copies of the letters to the abutters and the adjacent towns and the return receipts are attached hereto as Attachment C. Finally, MPL has posted a sign at the plant entrance to notify passersby of this Siting Council proceeding.

Q. Were the documents and activities described above performed by you or performed under your supervision and control?

A. Yes.

Q. Are you prepared to address those documents and activities described above?

A. Yes.

Q. Is the information presented in the documents described above true and accurate to the best of your knowledge and belief?

A. Yes.

Q. At this time, are there any additions, corrections or clarifications to the information presented in the documents described above?

A. No.

Q. Does this conclude your testimony?

A. Yes.

ATTACHMENT A

Jonathan R. Baylor
NRG Energy, Inc.

Education

MBA, Finance, May 2003
Temple University, Philadelphia, PA

Bachelor of Science Degree, Financial Management - December 1997
Bob Jones University, Greenville, SC

Professional Experience

NRG Energy, Inc. – Princeton, NJ

Manager, Development – 2007 to Present

- Lead development of biomass repowering of gas/oil fired in Montville, CT
- Lead development of biomass projects within NRG Northeast fleet
- Development of coal and natural gas fired projects in New York
- Identify development and growth opportunities at new and existing sites
- Lead commercial discussions for contracting of project developments

Senior Financial Analyst, Asset Management –2003 to 2007

- Determine valuation for portfolio assets
- Marketed & sold hydro portfolio
- Led marketing & sales effort for divestment of resource recovery portfolio
- Sale of
- Developed valuations evaluating strategic investment/divestment decisions
- Identify cash tax savings to international operations
- Restructure distressed cogen assets
- Develop model supporting contract restructure of distressed gas plants
- Assisted management of international asset portfolio
- Developed valuation scenarios for restructure of international assets
- Identify brown-field development opportunities

Comcast Corporation - Philadelphia, PA

Corporate Tax Department, Supervisor, Property Tax – 1998 to 2003

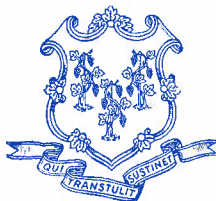

- Supervise & train existing staff
- Forecasting & planning corporate capital spending
- Return projections on division projects
- Negotiation of asset values
- Manage reporting of \$750M+ fixed assets
- Manage tax audits
- Research and develop tenable positions in emerging markets
- Develop reporting strategies position letters to taxing authorities (local & Federal)
- Developed reporting strategies for emerging technologies saving \$20M cash flow
- Served on industry research team for treatment of emerging technologies

Flagstar, Inc. - Spartanburg, SC

Franchise Finance, Controller's Group - 1997 to 1998

- Analyze credit and franchise viability
- Development of franchise promotion economics
- Develop internal financial reporting process
- Assist Controller in audit of franchise economics

State of Connecticut
GENERAL ASSEMBLY
STATE CAPITOL
HARTFORD, CONNECTICUT 06106-1591

September 8, 2009

Daniel F. Caruso, Esq.
Chairman, Connecticut Siting Council
Ten Franklin Square
New Britain, CT 06051

Dear Chairman Caruso:

We are writing in strong support of the proposed Montville Biomass project at the NRG generating facility in Montville, Connecticut (the "Biomass Project") proposed to the Connecticut Siting Council in Petition 907.

We fully support NRG's plan to modify Montville Station Unit 5 to use biomass as a fuel source for 30 megawatts (MW) of the unit's 82-MW generating capacity. NRG has proposed using "green wood" biomass, which is essentially chipped wood. This form of biomass is a renewable source of energy that will help lower the facility's net carbon footprint. NRG will obtain the green wood and whole tree chip biomass from nearby foresters and saw mills, which will provide economic benefits to the region while reducing reliance on imported fossil fuels and reducing dependence on natural gas fuel sources.

When this Biomass Project comes online, it will be another step in helping Connecticut reach its goal of creating 20 percent Class 1 renewable power generation by 2020. NRG recently received Class 1 certification from the DPUC for this project. This means that the project, once completed, will be able to immediately start taking advantage of the state's renewable energy credit program. It also means that this power will count toward the state's renewable power generation goals.

The Biomass Project provides critically needed economic benefits by ensuring the ongoing viability of Montville Station as a power generation site and as an employer in Montville. The project will allow NRG to maintain or increase employment levels at Montville Station and will provide incremental property tax revenues to the town. Additionally, this shovel-ready project creates significant construction jobs that will provide immediate economic benefit to the region.

Thank you for your consideration of NRG's Biomass Project.

Sincerely,

Andrea Stillman
State Senator, 20th District

Edith Prague

Re: Petition of Montville Power LLC for a Declaratory Ruling to Approve the Retrofit and Operation of a 40 MW Biomass Fueled Generation Unit at Montville Station in Uncasville, Connecticut

Dear Mayor Allyn:

The purpose of this letter is to inform you that Montville Power LLC ("MPL"), a wholly-owned subsidiary of NRG Energy, Inc. ("NRG"), is seeking the Connecticut Siting Council's (the "Council") approval of proposed modifications to the Montville Station. The modifications will allow Montville Station to use clean wood biomass fuel to produce up to 40 megawatts of Class I renewable energy. Specifically, MPL proposes to retrofit Unit 5, a steam generation unit currently fueled by natural gas and No. 6 fuel oil. The retrofitted unit will be equipped with new air pollution controls and will use cleaner fuels. Finally, MPL will construct a biomass fuel receiving, storage and handling system.

In accordance with Section 16-50k of the Connecticut General Statutes and Section 16-50j-40 of the Regulations of Connecticut State Agencies, MPL filed a petition for a declaratory ruling approving the proposed modifications to Montville Station Unit 5. For your information, a copy of the petition is available for review at the Council's office at Ten Franklin Square, New Britain, Connecticut 06051. The Council has scheduled a public hearing on MPL's petition for September 16, 2009. The hearing will be held at the Montville Town Hall, Council Chambers. A copy of the hearing notice is enclosed for your reference.

Re: Petition of Montville Power LLC for a Declaratory Ruling to
Approve the Retrofit and Operation of a 40MW Biomass Fueled
Generation Unit at Montville Station in Uncasville, Connecticut

Dear M/M Hewitt:

The purpose of this letter is to inform you that Montville Power LLC ("MPL"), a wholly-owned subsidiary of NRG Energy, Inc. ("NRG"), is seeking the Connecticut Siting Council's (the "Council") approval of proposed modifications to the Montville Station. The modifications will allow Montville Station to use clean wood biomass fuel to produce up to 40 megawatts of Class I renewable energy. Specifically, MPL proposes to retrofit Unit 5, a steam generation unit currently fueled by natural gas and No. 6 fuel oil. The retrofitted unit will be equipped with new air pollution controls and will use cleaner fuels. Finally, MPL will construct a biomass fuel receiving, storage and handling system.

In accordance with Section 16-50k of the Connecticut General Statutes and Section 16-50j-40 of the Regulations of Connecticut State Agencies, MPL filed a petition for a declaratory ruling approving the proposed modifications to Montville Station Unit 5. For your information, a copy of the petition is available for review at the Council's office at Ten Franklin Square, New Britain, Connecticut 06051. The Council has scheduled a public hearing on MPL's petition for September 16, 2009. The hearing will be held at the Montville Town Hall Council Chamber, 310 Norwich-New London Turnpike. A copy of the hearing notice is enclosed for your reference.

If you have questions or concerns with respect to the proposed project, please contact David DesRoberts at (860) 848-6057.

Sincerely,

A handwritten signature in black ink that reads "David J. DesRoberts". The signature is written in a cursive style with a long horizontal stroke at the end.

Re: Petition of Montville Power LLC for a Declaratory Ruling to
Approve the Retrofit and Operation of a 40MW Biomass Fueled
Generation Unit at Montville Station in Uncasville, Connecticut

Dear Connecticut Light & Power Company:

The purpose of this letter is to inform you that Montville Power LLC ("MPL"), a wholly-owned subsidiary of NRG Energy, Inc. ("NRG"), is seeking the Connecticut Siting Council's (the "Council") approval of proposed modifications to the Montville Station. The modifications will allow Montville Station to use clean wood biomass fuel to produce up to 40 megawatts of Class I renewable energy. Specifically, MPL proposes to retrofit Unit 5, a steam generation unit currently fueled by natural gas and No. 6 fuel oil. The retrofitted unit will be equipped with new air pollution controls and will use cleaner fuels. Finally, MPL will construct a biomass fuel receiving, storage and handling system.

In accordance with Section 16-50k of the Connecticut General Statutes and Section 16-50j-40 of the Regulations of Connecticut State Agencies, MPL filed a petition for a declaratory ruling approving the proposed modifications to Montville Station Unit 5. For your information, a copy of the petition is available for review at the Council's office at Ten Franklin Square, New Britain, Connecticut 06051. The Council has scheduled a public hearing on MPL's petition for September 16, 2009. The hearing will be held at the Montville Town Hall Council Chamber, 310 Norwich-New London Turnpike. A copy of the hearing notice is enclosed for your reference.

If you have questions or concerns with respect to the proposed project, please contact David DesRoberts at (860) 848-6057.

Sincerely,

David DesRoberts
Plant Manager
Montville Power LLC

STATE OF CONNECTICUT
CONNECTICUT SITING COUNCIL

MONTVILLE POWER LLC PETITION :
FOR A DECLARATORY RULING TO APPROVE : PETITION NO. 907
THE RETROFIT AND OPERATION OF A 40 MW :
BIOMASS-FUELED GENERATION UNIT AT :
MONTVILLE STATION IN UNCASVILLE, :
CONNECTICUT : SEPTEMBER 9, 2009

PREFILED TESTIMONY OF JAMES T. O'DONNELL, P.E.

Q. Please state your name, title and business address.

A. James T. O'Donnell, P.E.
Manager – Development Engineering
NRG Energy, Inc.
211 Carnegie Center
Princeton, New Jersey 08540

Q. Please describe your current responsibilities and professional expertise.

As Manager of Development Engineering for NRG Energy, Inc.'s ("NRG") Northeast Region, I am responsible for the engineering and technical aspects of developing biomass projects, including the proposed Montville Biomass Project. In addition, I am responsible for the development of co-generation projects and low carbon technologies. My responsibilities include preliminary design, permitting, scheduling, budgeting and project execution. My qualifications are described in more detail in my resume, which is attached.

Q. What has been your role in the Montville Biomass Project?

A. I have provided technical support to NRG's Montville Power LLC ("MPL") team in the area of engineering and project development. In particular I have prepared, or assisted in the preparation of, the sections of the subject petition and the responses to the Siting Council's interrogatories relating to engineering, planning and development.

Q. Were the documents and activities described above performed by you or performed under your supervision and control?

A. Yes.

Q. Are you prepared to address those documents and activities described above?

A. Yes.

Q. Is the information presented in the documents described above true and accurate to the best of your knowledge and belief?

A. Yes.

Q. At this time, are there any additions, corrections or clarifications to the information presented in the documents described above?

A. No.

Q. Does this conclude your testimony?

A. Yes.

James T O'Donnell PE
Manager, Development Engineering – Business Operations
Development, Engineering and Construction
NRG Energy, Inc.

Profile:

A registered professional engineer with extensive experience in the Energy and Power Sector with sound operating, engineering and business judgment. Strong leadership and technical competence in plant operations and maintenance, asset and project management and business development.

EXPERIENCE SUMMARY:

Over 30 years of power industry experience in Power Plant Development, Plant Engineering, Project Management / Operations and Maintenance, Plant Commissioning, Project Due Diligence and Commercial and Market assessment strategies. Experienced in multiple fuels including multi ranking coals, oil, natural gas, biomass, refused derived fuel and renewable resources. Experienced in various power generation technologies included: Sub and Supercritical Pulverized Coal, Fluid Bed, Stoker; Combustion Turbine Plants (simple and combined cycle), wind and Combined Heat and Power Facilities.

EDUCATION:

B.Sc. Mechanical Engineering – Power Option - North Dakota State University
Graduate Studies towards MBA - St. Cloud State University
Numerous Specialty courses in Management, Engineering, Maintenance, Economics, Project Management and Finance

KEY ASSIGNMENTS:

NRG ENERGY:

3/03 to present:

ENGINEERING AND CONSTRUCTION:

Owner's Technical Lead for a proposed 600 MW super critical lignite coal fired station at the Profen Mine and the 175 MW CFB re-powering at Mumsdorf in Germany.

Manager of Development Engineering for NRG's biomass, low carbon technologies and co-generation expansion for North America.

Manager of Development Engineering supporting NRG Thermal Organization in asset expansion, optimization and acquisitions.

Project Manager for multiple plant efforts to revamp generating facilities at Huntley and Dunkirk to successfully burn PRB fuels from eastern bituminous fuels while meeting low SO2 and NOx emissions.

Technical lead for due diligence support of NRG acquisitions including Texas GenCo and Padoma Wind.

8/95 to 3/03:

EUROPEAN OPERATIONS:

Director - Engineering for on-going operations, business development and asset management for NRG - Europe. Project scope varying from stand alone inside the fence projects to major utility acquisitions. Technologies including; coal fired project, gas and dual fuel combined cycle projects, combined heating plants, hydro, renewable resources, desalination plants, nuclear power, mining, electrical, thermal and gas transmission and distribution.

2/96 to 12/02:

ECKG: Operations manager and Development Engineer for the acquisition, re-powering and operations of existing pulverized coal facility in the Czech Republic.
Supervisory Board Member - ECKG.

8/95 to present:

SES: Owners representative and Engineers Consultant to Saale Energie Services - MIBRAG's (Germany) Power and Benefaction Division.

1/99 to present:

SEG: Owners Technical Consultant to Saale Energie Generation. The NRG asset management arm for the 945 MWe super critical brown coal fired Schkopau Power Plant.

8/99 to 6/01:

Killingholme: Interim Project Engineering Manager for Killingholme Power Station. A 680 MWe combined cycle gas turbine facility.

1/91 to 8/95

NRG - NORTH AMERICAN OPERATIONS:

6/94 to 8/95:

SUNNYSIDE: Project Engineer and Owners' Representative for a 54 MWe waste coal fired circulating Fluid Bed Boiler Facility located near Price Utah.

1/92 to 1/95:

SJVEP: Project Engineer for 49 MWe Biomass fired fluid bed project(s) located near Fresno, California. Including Chow I, Chow II, Madera and El Nido.

1/91 to 95:

NSP - NRG RESOURCE RECOVERY: Project Engineer and Supervisor for the Elk River and Newport (MN) Resource Recovery Facilities. (2 - 1500 Ton / Day Waste to Energy Process Facilities)

NORTHERN STATES POWER (Former Parent of NRG Energy):

1/79 to 1/91

SHERCO: Senior Production Engineer for a 2400 MWe sub bituminous pulverized coal fired power plant.

PROFESSIONAL:

Registered Professional Engineer – State of Minnesota

Member – American Society of Mechanical Engineers

Member – Pi Tau Sigma – National Honorary Society for Mechanical Engineers
