Memorandum

To: Dr. Michael Klemens

From: Roger Hurlbut Roger Hurlbut

Date: April 6, 2012

Re: Wind Colebrook South

Attached are environmental erosion and sediment control monitoring reports numbers 19 and 20 for the period March 24 through April 6, 2012.

Both inspections were undertaken within 24 hrs of light rainfall events. No discharges of sediment or eroded material were observed.

The only work performed at the site was a partial seeding of the cleared and grubbed area for tower site 2.
