Petition Nos. 983 and 984

CONNECTICUT
SITING COUNCIL

April 19, 2011

SUPPLEMENTAL PRE-FILED TESTIMONY OF WILSON H. FAUDE

Q21. You have previously filed testimony in this proceeding. Why are you submitting this supplemental testimony?

A21. Since I filed my pre-filed testimony, I have been informed that the State Historic Preservation Office has rescinded the "No Effect" stamp previously attached to BNE's petitions and discussed in my pre-filed testimony on pages 3-4.

I also want to clarify two potential misunderstandings associated with my earlier testimony: first, that I was retained by Reid and Riege, P.C., on behalf of not only FairwindCT, Inc., but also on behalf of Susan Wagner and Stella and Michael Somers; and second, that with respect to a photograph that I included on page 31 of my pre-filed testimony, I understand that the proposed wind turbine will not be placed directly on the site currently occupied by the driving range, but rather will be in that general vicinity.

Q22. How did you find out about the SHPO decision to rescind the "No Effect" stamp?

A22. I was provided by counsel for FairwindCT a letter dated March 21, 2011, issued by the SHPO and indicating that, in light of the information provided to the SHPO regarding the potential effects of the proposed turbines on Rock Hall and the fact that the petitioner's

consultant had not responded to the SHPO's request for additional information, the SHPO was rescinding its prior determination of no effect pending its receipt and evaluation of any new information related to Rock Hall. It is my understanding that since the SHPO's rescission, BNE has not withdrawn the relevant exhibits or corrected the record to reflect that its Exhibits purportedly establishing a "No Effect" determination are no longer valid.

Q23. In light of this new information, has the opinion reflected in your pre-filed testimony changed?

No, it has not. While the SHPO apparently has recognized that its prior determination of no effect was mistaken, in my opinion, the evidence in the record indicates that siting the proposed turbines will unquestionably have an adverse effect on the historical and cultural resources in the area, including Rock Hall.

The statements above are true and accurate to the best of my knowledge.
