RE: **TS-AT&T-004-131223** – AT&T request for an order to approve tower sharing at an existing telecommunications facility located at 376 Deercliff Road, Avon, Connecticut. **Request to Revise.**

Dear Mr. Quinn:

At a public meeting of the Connecticut Siting Council (Council) held on May 15, 2014, the Council approved the requested amendment dated April 16, 2014, to the above-referenced tower share request that was originally approved by the Council on January 23, 2014.

This decision is under the exclusive jurisdiction of the Council. This facility has been carefully modeled to ensure that radio frequency emissions are conservatively below State and federal standards applicable to the frequencies now used on this tower. Any deviation from this format may result in the Council implementing enforcement proceedings pursuant to General Statutes § 16-50u including, without limitation, imposition of expenses resulting from such failure and of civil penalties in an amount not less than one thousand dollars per day for each day of construction or operation in material violation.

This decision applies only to the requested tower share amendment and is not applicable to any other request or construction. Please be advised that the validity of this action shall expire one year from the date of this letter.

The proposed shared use is to be implemented as specified in your tower share request letter dated December 20, 2013 and the request for an amendment letter dated April 16, 2014, including the placement of all necessary equipment and shelters within the tower compound.

Very truly yours,

Robert Stein

Re:	**Request to Revise a Previously Approved Tower Share Application**
Property Address:	**376 Deercliff Road, Avon, CT 06001 (the "Property")**
Applicant:	**New Cingular Wireless PCS, LLC d/b/a AT&T ("AT&T")**

Dear Ms. Bachman:

On behalf of AT&T, please accept this correspondence as a request to revise a previously approved tower share installation. Enclosed please find an original and fifteen (15) copies of the correspondence package along with a check in the amount of six hundred and twenty five ($625.00) dollars.

On December 20, 2012 AT&T submitted an application to the Connecticut Siting Council (the "Council") for an order to approve the shared use of an existing tower and compound on the Property (the "Tower" and collectively, the "Facility"), pursuant to Connecticut General Status § 16-50aa, as amended (the "Statute"). During its hearing on January 23, 2014, the Council approved AT&T's shared use application. Subsequently, the Council issued the approval order on January 27, 2014 (see Tab 1 attached herewith).

AT&T requests to revise its previously approved installation as follows:

- Panel Antennas (no change):
  - Previous Design: Twelve (12), eight foot (8') panel antennas
  - Revised Design: Twelve (12), eight foot (8') panel antennas
    - Note that the number and size of the antennas has not changed but their models have (see attached structural analysis)

- Remote Radio Head:
  - Previous Design: 18
  - Revised Design: 27

- Equipment Shelter
  - Previous Design: 11.5' x 16'
  - Revised Design: 11.5' x 16'

- Structural Analysis Conclusion:
  - Previous Design: "the pole and foundation have sufficient capacity…"
  - Revised Design: "the pole and foundation have sufficient capacity…"

- Power Density Calculations (The original application was submitted with power density calculations reflecting the new equipment specifications):
  - Original Application:
    - AT&T's MPE: 4.27%
    - Total MPE: 82.23%
  - Application for Amendment:
    - AT&T's MPE: 4.27%
    - Total MPE: 82.23%

AT&T's proposed revisions to its previously approved shared use installation continue to meet all of the requirements set forth in the Statute. AT&T's revised design is technically, legally, economically and environmentally feasible, will meet public safety concerns, will avoid the unnecessary proliferation of towers and is in the public interest. Consequently, AT&T respectfully requests that the Council issue an order approving the proposed sharing use of the Facility.

Sincerely,

Steven J. Quinn

Marlborough, MA 01752

RE: **TS-AT&T-004-131223** – AT&T request for an order to approve tower sharing at an existing telecommunications facility located at 376 Deercliff Road, Avon, Connecticut.

Dear Mr. Braillard:

At a public meeting held January 23, 2014, the Connecticut Siting Council (Council) ruled that the shared use of this existing tower site is technically, legally, environmentally, and economically feasible and meets public safety concerns, and therefore, in compliance with General Statutes § 16-50aa, the Council has ordered the shared use of this facility to avoid the unnecessary proliferation of tower structures with the following conditions:

- Any deviation from the proposed installation as specified in the original tower share request and supporting materials with the Council shall render this decision invalid;
- Any material changes to the proposed installation as specified in the original tower share request and supporting materials filed with the Council shall require an explicit request for modification to the Council pursuant to Connecticut General Statutes § 16-50aa, including all relevant information regarding the proposed change with cumulative worst-case modeling of radio frequency exposure at the closest point of uncontrolled access to the tower base, consistent with Federal Communications Commission, Office of Engineering and Technology, Bulletin 65;
- Not less than 45 days after completion of the proposed installation, the Council shall be notified in writing that the installation has been completed;
- The validity of this action shall expire one year from the date of this letter; and
- The applicant may file a request for an extension of time beyond the one year deadline provided that such request is submitted to the Council not less than 60 days prior to the expiration.

This decision is under the exclusive jurisdiction of the Council. This facility has been carefully modeled to ensure that radio frequency emissions are conservatively below State and federal standards applicable to the frequencies now used on this tower. Any deviation from this format may result in the Council implementing enforcement proceedings pursuant to General Statutes § 16-50u including, without limitation, imposition of expenses resulting from such failure and of civil penalties in an amount not less than one thousand dollars per day for each day of construction or operation in material violation.

This decision applies only to this request for tower sharing and is not applicable to any other request or construction. Please be advised that the validity of this action shall expire one year from the date of this letter.

The proposed shared use is to be implemented as specified in your letter dated December 20, 2013, including the placement of all necessary equipment and shelters within the tower compound.

CSC
CONNECTICUT SITING COUNCIL

Dear Sean Dempsey,

B+T Group is pleased to submit this **"Structural Analysis Report"** to determine the structural integrity of the above mentioned tower. This analysis has been performed in accordance with the Crown Castle Structural 'Statement of Work' and the terms of Crown Castle Purchase Order Number 628123, in accordance with application 218723, revision 2.

The purpose of the analysis is to determine acceptability of the tower stress level. Based on our analysis we have determined the tower stress level for the structure and foundation, under the following load case, to be:

LC7: Existing + Reserved + Proposed Equipment **Sufficient Capacity**
Note: See Table 1 and Table 2 for the proposed and existing/reserved loading, respectively.

The analysis has been performed in accordance with the TIA/EIA-222-F standard and 2005 CT State Building Code based upon a wind speed of 80 mph fastest mile.

All modifications and equipment proposed in this report shall be installed in accordance with the attached drawings for the determined available structural capacity to be effective.

We at *B+T Group* appreciate the opportunity of providing our continuing professional services to you and Crown Castle. If you have any questions or need further assistance on this or any other projects please give us a call.

Respectfully submitted by:

1) INTRODUCTION

This tower is a 560 ft. Guyed tower designed by STAINLESS INC. in November of 1986 and mapped by Pinnacle Towers in 1999. The tower was originally designed for a wind speed of 50 mph per EIA-222-C. All modifications designed by GPD (dated 10/11/07) were considered in the analysis.

2) ANALYSIS CRITERIA

The structural analysis was performed for this tower in accordance with the requirements of TIA/EIA-222-F Structural Standards for Steel Antenna Towers and Antenna Supporting Structures using a fastest mile wind speed of 80 mph with no ice, 37.6 mph with 1 inch ice thickness and 50 mph under service loads.

3.1) Analysis Method

tnxTower (version 6.1.4.1), a commercially available analysis software package, was used to create a three-dimensional model of the tower and calculate member stresses for various loading cases. Selected output from the analysis is included in Appendix A.

3.2) Assumptions

1) Tower and structures were built in accordance with the manufacturer's specifications.
2) The tower and structures have been maintained in accordance with the manufacturer's specification.
3) The configuration of antennas, transmission cables, mounts and other appurtenances are as specified in Tables 1 and 2 and the referenced drawings.
4) When applicable, transmission cables are considered as structural components for calculating wind loads as allowed by TIA/EIA-222-F.
5) Mount areas and weights are assumed based on photographs provided.

This analysis may be affected if any assumptions are not valid or have been made in error. B+T Group should be notified to determine the effect on the structural integrity of the tower.

4) ANALYSIS RESULTS

Table 6 - Tower Component Stresses vs. Capacity – LC7

Notes	Component	Elevation (ft)	% Capacity	Pass / Fail
1	Base Foundation Soil Interaction	Base	34.6	Pass
3	Guy Anchor Foundation	Base	50.8	Pass*[3]

Structure Rating (max from all components) =	83.2%

Notes:
1) See additional documentation in "Appendix C – Additional Calculations" for calculations supporting the % capacity consumed.
2) Capacities up to 100% are considered acceptable based on analysis methods used.
3) Foundation capacity determined by comparing analysis reactions to original design reactions from Stainless Inc., Report # 3290, Dated 9/11/1986.

4.1) Recommendations

The tower and its base and anchor foundations have sufficient capacity to carry the existing, reserved and proposed loads. No modifications are required at this time.

CROWN CASTLE

3530 Toringdon Way
Suite 300
Charlotte, NC 28277

Tel: 704-405-6523
Fax: 724-416-6153

November 20, 2013

RE: Crown Castle Letter of Authorization (LOA)

Crown Castle, does hereby authorize **AT&T Mobility ("AT&T")** and its authorized contractors/agents to act as "Applicant" in the processing of all applications, permits, research and other related activities associated with the processing, planning, design review, permitting, entitlement and construction of additional equipment, antennas and site improvements for the Crown Castle existing wireless communications facility described as follows:

Customer Site Name:	Avon Deercliff	**Crown Castle Site ID Number:**	870800
Site Address:	376 Deercliff Road Avon, CT 06001	**Crown Castle Site Name:**	Avon (Deercliff Rd.)

This authorization is fully contingent upon **AT&T's** authorized contractors/agents' compliance with the following conditions:

1. Crown Castle must review the application prior to submittal. Crown Castle must be provided all applications, narratives, drawings and attachments at least 72 hours in advance of their submittal to the locality. Use of email and electronic attachments is encouraged. A Crown Castle Zoning Subject Matter Expert (SME) will review and provide written comment to the customer within 48 hours of receipt of a complete set of application materials. If Crown Castle indicates that changes are required, submissions shall be altered in accordance with Crown Castle comments prior to submission to the locality. Verification of corrections should also be accomplished via emails and attachments.
2. In no event may **AT&T** encourage, suggest, participate in, or permit the imposition of any restrictions or additional obligations whatsoever on the tower site or Crown Castle's current or future use or ability to license space at the tower site as part of or in exchange for obtaining any approval, permit, exception or variance.
3. A copy of the final permit and/or a written summary of the zoning/entitlement decision rendered by the locality and any/all conditions placed on that decision shall be communicated in detail to Crown Castle well within the appeal period provided by the locality (typically 10-15 days).
4. All conditions of approval pertinent to the construction of the proposed project must be included in the construction drawings for the project. The conditions of approval pertinent to the construction of the project shall be copied verbatim from the zoning permit approval language, and shall be present in the drawings prior to submission for building permits and contractor bidding. Crown Castle shall verify the inclusion of appropriate conditions of approval in the construction drawing redline process.
5. Crown Castle will provide a Notice To Proceed (NTP) to construction to the customer upon receipt of the final approved zoning permit and the approved Building Permit.

AT&T LTE	1	500	200	0.0050	700 Band	0.4667	1.07%
AT&T LTE	1	500	200	0.0050	1900 Band	1.0000	0.5%
AT&T LTE	1	500	200	0.0050	2300 Band	1.0000	0.5%
						TOTAL	**82.23%**

4. Conclusion:

The addition of AT&T's antennas on the existing tower will result in the cumulative maximum permissible exposure (MPE) level of 82.23%. The proposal complies with the National Council on Radiation Protection and Measurements standard for MPE adopted by the Federal Communications Commission ("FCC"). Moreover, the maximum level of radio-frequency energy emitted from AT&T's installation will be below the FCC's mandated radio frequency exposure limits.

RE: **TS-AT&T-004-131223** – AT&T request for an order to approve tower sharing at an existing telecommunications facility located at 376 Deercliff Road, Avon, Connecticut.

Dear Mr. Braillard:

At a public meeting held January 23, 2014, the Connecticut Siting Council (Council) ruled that the shared use of this existing tower site is technically, legally, environmentally, and economically feasible and meets public safety concerns, and therefore, in compliance with General Statutes § 16-50aa, the Council has ordered the shared use of this facility to avoid the unnecessary proliferation of tower structures with the following conditions:

- Any deviation from the proposed installation as specified in the original tower share request and supporting materials with the Council shall render this decision invalid;
- Any material changes to the proposed installation as specified in the original tower share request and supporting materials filed with the Council shall require an explicit request for modification to the Council pursuant to Connecticut General Statutes § 16-50aa, including all relevant information regarding the proposed change with cumulative worst-case modeling of radio frequency exposure at the closest point of uncontrolled access to the tower base, consistent with Federal Communications Commission, Office of Engineering and Technology, Bulletin 65;
- Not less than 45 days after completion of the proposed installation, the Council shall be notified in writing that the installation has been completed;
- The validity of this action shall expire one year from the date of this letter; and
- The applicant may file a request for an extension of time beyond the one year deadline provided that such request is submitted to the Council not less than 60 days prior to the expiration.

This decision is under the exclusive jurisdiction of the Council. This facility has been carefully modeled to ensure that radio frequency emissions are conservatively below State and federal standards applicable to the frequencies now used on this tower. Any deviation from this format may result in the Council implementing enforcement proceedings pursuant to General Statutes § 16-50u including, without limitation, imposition of expenses resulting from such failure and of civil penalties in an amount not less than one thousand dollars per day for each day of construction or operation in material violation.

This decision applies only to this request for tower sharing and is not applicable to any other request or construction. Please be advised that the validity of this action shall expire one year from the date of this letter.

The proposed shared use is to be implemented as specified in your letter dated December 20, 2013, including the placement of all necessary equipment and shelters within the tower compound.

CSC
CONNECTICUT SITING COUNCIL

Thank you for your attention and cooperation.

Very truly yours,

Robert Stein

Re: **Tower Sharing Application**
Property Address: **376 Deercliff Road, Avon, CT 06001 (the "Property")**
Applicant: **New Cingular Wireless PCS, LLC ("AT&T")**

Dear Ms. Bachman:

On behalf of AT&T, enclosed in connection with the shared use of a tower located on the Property, please find an original and fifteen (15) copies of a tower sharing application package along with a check in the amount of six hundred and twenty five ($625.00) dollars.

Please date stamp a copy of this letter and a copy of the check (both attached) and email them back to me. If you have any questions, please contact me.

Sincerely,

Adam F. Braillard

Re:	**Request for an Order to Approve the Shared Use of an Existing Tower**
Property Address:	**376 Deercliff Road, Avon CT 06001(the "Property")**
Applicant:	**New Cingular Wireless PCS, LLC ("AT&T")**

Dear Ms. Bachman:

On behalf of AT&T, please accept this application pursuant to Connecticut General Statute §16-50aa, as amended (the "Statute"), requesting the finding from the Connecticut Siting Council (the "Council") that the shared use of the tower and facility located on the Property (the "Facility") is technically, legally, economically and environmentally feasible, will meet public safety concerns, will avoid the unnecessary proliferation of towers and is in the public interest. AT&T further requests an order from the Council approving the shared use of the Facility.

I. The Facility

The Facility is owned by Crown Atlantic Company LLC, ("Crown") and consists of a 557' lattice style guide tower (the "Tower") located on the Property. There are currently numerous telecommunications antennas on the Tower with antenna heights ranging from 557' to 100'. Further, the Facility consists of several equipment shelters and buildings adjacent to the Tower. There is not fenced compound at the base of the Tower.

II. The Tower Share

AT&T proposes to install a total of twelve (12) panel antennas (4 per sector) and remote radio head ("RRHs") on the tower (see attached plans). The antennas and RRHs will be mounted on the Tower at an antenna centerline of 200'. Further, AT&T proposes to install an 11'.5" x 16' equipment shelter and a generator at the base of the Tower next to the existing equipment shelters. The Tower will not be increased in height. Moreover, no upgrades to the

33 Boston Post Road West, Marlborough, Massachusetts 01752
p: 508.954.7702 • adam.braillard@smartlinkllc.com
www.smartlinkllc.com

access road or parking area will be necessary. Please refer to Tab 3 (Engineering Drawings) of this application package for further specifications of AT&T's proposed installation.

III. Technical Feasibility

It is technically feasible for AT&T to install its equipment on the Tower. To determine the structural integrity of the Tower, AT&T has performed a structural analysis of the Tower with AT&T proposed modifications. The structural analysis, dated December 17, 2013 and attached herewith (see Tab 4) concludes that the "tower and its foundation have sufficient capacity to carry the existing, reserved and proposed loads"[1]. Consequently, the shared use of the Tower is technically feasible.

IV. Legal Feasibility

Pursuant to the Statute, the Council has the authority to issue an order approving the shared use of the Facility. By issuing an order approving AT&T's use of the Facility, AT&T will be able to proceed with obtaining a building permit from the Town of Avon for the proposed installation on the Facility. Therefore, the shared use of the Facility is legally feasible.

V. Economic Feasibility

AT&T is a federally licensed telecommunications company providing service in areas of Connecticut, including the Town of Avon. AT&T is entering into an agreement with Crown for the purpose of locating AT&T equipment at the Facility. Consequently, the shared use of the Facility is economically feasible.

VI. Environmental Feasibility

Pursuant to the Statute, AT&T's proposed sharing of the Facility will be environmentally feasible for the following reasons:

a. The proposal does not increase the height of the Tower. Therefore, the proposed sharing of the Facility will have an insignificant incremental visual impact on the area surrounding the Tower and will no significant change or alter the physical or environmental characteristics of the Facility.

b. The addition of AT&T equipment will not increase the noise levels by six (6) decibels or more.

c. The addition of the AT&T antennas will not exceed the RF emissions standard adopted by the Federal Communications Commission ("FCC"). The cumulative "worst-case" RF emissions for the operation of the existing Verizon antennas and the

[1] Structural analysis was performed by B+T Group and consists of 87 pages. To reduce the number of pages needed to file this application, we only attached the summary pages of the structural analysis (9 pages) without the calculation appendixes. Those can be submitted upon request.

proposed AT&T antennas will be 82.23% of the FCC standards (see attached Tab 6, Power Density Table).

d. The proposed installation will have no impact on the local wetlands or water resources.

e. After installation, AT&T equipment will be unmanned and will only require monthly visits by maintenance personnel who will inspect the Facility to ensure it remains in good working order.

f. AT&T's proposal will have no impact on water, sanitary or sewer systems or other municipal utilities. Additionally, the proposal complies with all applicable local, state and federal safety rules and regulations.

VII. Public Safety and Benefits

As referenced in Section III above, AT&T has performed a structural analysis of the Tower confirming that the Tower is structurally feasible to hold AT&T's additional equipment. Further, as referenced in Section VI.c above, AT&T has performed an analysis of the radio frequency emanating from its proposed antennas to ensure compliance with FCC standards. The analysis indicates that the maximum level of radio frequency energy emitting from the Facility after the installation of AT&T's antennas will be below the FCC's exposure limits. Moreover, AT&T proposal is expected to enhance safety by improving wireless communications in the area of the Facility

VII. Conclusion

For the aforementioned reasons, AT&T's proposed shared use of the Facility meets all of the requirements set forth in the Statute, and the proposal advances the Council's goal of preventing the unnecessary proliferation of towers in Connecticut. Moreover, the proposal is technically, legally, economically and environmentally feasible and meets all public safety concerns. Consequently, AT&T respectfully requests that the Council issue an order approving the proposed sharing use of the Facility.

Sincerely,

Adam F. Braillard

Dear Mr. Tuttle,

B+T Group is pleased to submit this **"Structural Analysis Report"** to determine the structural integrity of the above mentioned tower. This analysis has been performed in accordance with the Crown Castle Structural 'Statement of Work' and the terms of Crown Castle Purchase Order Number 599591, in accordance with application 198594, revision 8.

The purpose of the analysis is to determine acceptability of the tower stress level. Based on our analysis we have determined the tower stress level for the structure and foundation, under the following load case, to be:

LC7: Existing + Reserved + Proposed Equipment **Sufficient Capacity**
Note: See Table 1 and Table 2 for the proposed and existing/reserved loading, respectively.

The analysis has been performed in accordance with the TIA/EIA-222-F standard and 2005 CT State Building Code based upon a wind speed of 80 mph fastest mile.

All equipment proposed in this report shall be installed in accordance with the attached drawings for the determined available structural capacity to be effective.

We at *B+T Group* appreciate the opportunity of providing our continuing professional services to you and Crown Castle. If you have any questions or need further assistance on this or any other projects please give us a call.

1) INTRODUCTION

This tower is a 560 ft. Guyed tower designed by STAINLESS INC. in November of 1986 and mapped by Pinnacle Towers in 1999. The tower was originally designed for a wind speed of 50 mph per EIA-222-C. All modifications designed by GPD (dated 10/11/07) were considered in the analysis.

2) ANALYSIS CRITERIA

The structural analysis was performed for this tower in accordance with the requirements of TIA/EIA-222-F Structural Standards for Steel Antenna Towers and Antenna Supporting Structures using a fastest mile wind speed of 80 mph with no ice, 37 mph with 1 inch ice thickness and 50 mph under service loads.

3.1) Analysis Method

tnxTower (version 6.1.3.1), a commercially available analysis software package, was used to create a three-dimensional model of the tower and calculate member stresses for various loading cases. Selected output from the analysis is included in Appendix A.

3.2) Assumptions

1) Tower and structures were built in accordance with the manufacturer's specifications.
2) The tower and structures have been maintained in accordance with the manufacturer's specification.
3) The configuration of antennas, transmission cables, mounts and other appurtenances are as specified in Tables 1 and 2 and the referenced drawings.
4) When applicable, transmission cables are considered as structural components for calculating wind loads as allowed by TIA/EIA-222-F.

5) Mount areas and weights are assumed based on photographs provided.

This analysis may be affected if any assumptions are not valid or have been made in error. B+T Group should be notified to determine the effect on the structural integrity of the tower.

4) ANALYSIS RESULTS

Table 6 - Tower Component Stresses vs. Capacity – LC7

Notes	Component	Elevation (ft)	% Capacity	Pass / Fail
1	Base Foundation Soil Interaction	Base	34.5	Pass
3	Guy Anchor Foundation	Base	50.3	Pass

Structure Rating (max from all components) =	79.9%

Notes:
1) See additional documentation in "Appendix C – Additional Calculations" for calculations supporting the % capacity consumed.
2) Capacities up to 100% are considered acceptable based on analysis methods used.
3) Foundation capacity determined by comparing analysis reactions to original design reactions from Stainless Inc., Report # 3290, Dated 9/11/1986

4.1) Recommendations

The tower and its foundation have sufficient capacity to carry the existing, reserved, and proposed loads. No modifications are required at this time.

RE: Crown Castle Letter of Authorization (LOA)

Crown Castle, does hereby authorize **AT&T Mobility ("AT&T")** and its authorized contractors/agents to act as "Applicant" in the processing of all applications, permits, research and other related activities associated with the processing, planning, design review, permitting, entitlement and construction of additional equipment, antennas and site improvements for the Crown Castle existing wireless communications facility described as follows:

Customer Site Name:	Avon Deercliff	**Crown Castle Site ID Number:**	870800
Site Address:	376 Deercliff Road Avon, CT 06001	**Crown Castle Site Name:**	Avon (Deercliff Rd.)

This authorization is fully contingent upon **AT&T's** authorized contractors/agents' compliance with the following conditions:

1. Crown Castle must review the application prior to submittal. Crown Castle must be provided all applications, narratives, drawings and attachments at least 72 hours in advance of their submittal to the locality. Use of email and electronic attachments is encouraged. A Crown Castle Zoning Subject Matter Expert (SME) will review and provide written comment to the customer within 48 hours of receipt of a complete set of application materials. If Crown Castle indicates that changes are required, submissions shall be altered in accordance with Crown Castle comments prior to submission to the locality. Verification of corrections should also be accomplished via emails and attachments.
2. In no event may **AT&T** encourage, suggest, participate in, or permit the imposition of any restrictions or additional obligations whatsoever on the tower site or Crown Castle's current or future use or ability to license space at the tower site as part of or in exchange for obtaining any approval, permit, exception or variance.
3. A copy of the final permit and/or a written summary of the zoning/entitlement decision rendered by the locality and any/all conditions placed on that decision shall be communicated in detail to Crown Castle well within the appeal period provided by the locality (typically 10-15 days).
4. All conditions of approval pertinent to the construction of the proposed project must be included in the construction drawings for the project. The conditions of approval pertinent to the construction of the project shall be copied verbatim from the zoning permit approval language, and shall be present in the drawings prior to submission for building permits and contractor bidding. Crown Castle shall verify the inclusion of appropriate conditions of approval in the construction drawing redline process.
5. Crown Castle will provide a Notice To Proceed (NTP) to construction to the customer upon receipt of the final approved zoning permit and the approved Building Permit.

AT&T LTE	1	500	200	0.0050	2300 Band	1.0000	0.5%
						TOTAL	**82.23%**

4. Conclusion:

The addition of AT&T's antennas on the existing tower will result in the cumulative maximum permissible exposure (MPE) level of 82.23%. The proposal complies with the National Council on Radiation Protection and Measurements standard for MPE adopted by the Federal Communications Commission ("FCC"). Moreover, the maximum level of radio-frequency energy emitted from AT&T's installation will be below the FCC's mandated radio frequency exposure limits.

Dear Attorney Fisher:

The Connecticut Siting Council (Council) is in receipt of your letter dated December 24, 2014, submitted on behalf of AT&T/New Cingular Wireless PCS, LLC, requesting an extension of time to submit a notice of completion of construction and associated post modification inspection reports for the above-referenced exempt modifications and tower share requests.

The Council hereby grants a 1-year extension of time until December 31, 2015, to submit a notice of completion of construction and associated post modification inspection reports for the above-referenced exempt modifications.

This extension is granted with the understanding that the Council will be notified should AT&T/New Cingular Wireless PCS, LLC need additional time beyond 1-year to submit a notice of completion of construction and associated post modification inspection reports or decide not to proceed with construction.

Thank you for your attention to these matters.

Sincerely,

Melanie A. Bachman
Acting Executive Director

Re: New Cingular Wireless PCS, LLC (AT&T)
Exempt Modification/Tower Share Conditions
Notifications of Completion & Extension Requests

Dear Executive Director Bachman:

We are writing once again behalf of our client, New Cingular Wireless PCS, LLC ("AT&T") with respect to the above referenced matter and the Siting Council's requests for written notification of completion of construction and/or written notice of compliance with site specific conditions for various exempt modification filings made by AT&T and its vendors. Specifically, this letter addresses those items related to the year 2013 which the Council has received prior correspondence individually addressing various sites approved in different quarters of calendar year 2013. For purposes of efficiency this letter addresses the latest status of all sites (Quarters 1-3) as the attachment to your letter dated November 3, 2014 ("November List") included a listing of sites from Quarters 1-3.

Quarter 1, 2013

Since the date of our October 31st letter, we are advised that AT&T and its vendors have filed directly with the council close out letters for the following additional sites:

EM-AT&T-067-131230	107 Buck Road	Hebron
EM-CING-045-130103	2 Scott Road	East Lyme
EM-CING-057-130802	Old Greenwich Sta.	Old Greenwich
EM-CING-058-121031	131 Bishop Crossing	Griswold
EM-CING-137-121031	86 Voluntown Road	Pawcatuck
EM-CING-114-121114	5 Hinckley Hill Rd.	Preston

Quarter 2, 2013

Since the date of our October 31st letter, our information reflects that AT&T and its vendors have filed directly with the council a close out letter for the following additional site:

EM-CING-106-131114 1363 Boston Post Road Old Saybrook

Additionally, we are advised by AT&T that construction has been deferred on (3) Q2 sites:

CUDDY& FEDER LLP

TS-AT&T-004-131223 376 Deercliff Road Avon
TS-AT&T-069-131216 1249 Hartford Pike East Killingly
EM-CING-128-130828 530 Brushy Hill Road Simsbury.

On AT&T and their vendor's behalf, we respectfully request a one-year extension of time to December 31, 2015 for these three sites to be completed in accordance with the prior Exempt Modification Acknowledgement letters.

Quarter 3, 2013

As for the Quarter 3 sites listed we are writing to confirm your receipt of correspondence from AT&T's vendors for six (6) of the Q3 sites on the list you provided, as follows:

1.	EM-CING-135-130703	652 Glenbrook Rd	Stamford
2.	EM-CING-152-130201	126 Old Colchester Rd	Waterford
3.	EM-CING-166-130711	347 East Street	Wolcott
4.	EM-CING-100-130322	38 Lower Rd	North Canaan
5.	EM-CING-084-130305	111 Schoolhouse Rd	Milford
6.	EM-CING-031-130116	Mowhawk Mtn. Rd	Cornwall

Additionally, we are advised by AT&T that construction has been deferred on (3) Q3 sites:

TS-AT&T-101-131108 50 Devine Street North Haven
TS-AT&T-143-131227 137 Wright Rd Torrington
TS-AT&T-164-131114 599 Matianuck Avenue Windsor.

On AT&T and their vendor's behalf, we respectfully request a one-year extension of time to December 31, 2015 for these sites to be completed in accordance with the prior Exempt Modification Acknowledgement letters.

Process Moving Forward – Confirmation of Extensions

We are advised that other than the above noted deferrals AT&T's vendors are coordinating receipt of documentation from tower companies to certify compliance with conditions (i.e. P.E. certifications, etc.) for Q1, Q2 and Q3 sites. As per our recent telephone discussion, however, it appears that the Council's records do not reflect receipt of completion correspondence for sites which AT&T's vendors have a record of submitting. AT&T will revisit its records and coordinate submission of any outstanding completion correspondence with the Council.

CUDDY & FEDER LLP

Other than the deferred sites noted above, and to the extent an extension is required for any outstanding sites as per the Council's records, we respectfully request an extension to March 1, 2015 for all sites on the November list (2013 Q1, Q2, Q3) to submit notices of completion.

Thank you for your continued consideration in this matter.

Very truly yours,

Daniel M. Laub

Dear Attorney Laub:

The Connecticut Siting Council (Council) is in receipt of your letter dated December 24, 2015, submitted on behalf of New Cingular Wireless PCS, LLC (AT&T), requesting an extension of time to submit notices of completion of construction and associated post modification inspection reports for the above-referenced exempt modifications.

The Council previously granted six extension of time to submit notices of completion of construction and associated post modification inspection reports for the above-referenced exempt modifications on June 30, 2014; September 2, 2014; November 4, 2014; November 20, 2014; December 29, 2014; and February 24, 2015.

Therefore, the Council hereby denies an extension of time to submit notices of completion of construction and associated post modification inspection reports for the above-referenced exempt modifications that were approved in 2013.

Any modifications to these facilities will require explicit notice to the Council pursuant to Regulations of Connecticut State Agencies Section 16-50j-73 and a filing fee.

Thank you for your attention to this matter.

Sincerely,

Melanie A. Bachman
Acting Executive Director

Re: New Cingular Wireless PCS, LLC (AT&T)
Exempt Modification/Tower Share Conditions
Notifications of Completion & Extension Requests

ORIGINAL

Dear Executive Director Bachman:

We are writing on behalf of our client, New Cingular Wireless PCS, LLC ("AT&T") with respect to the above referenced matter and the Siting Council's requests for written notification of completion of construction and/or written notice of compliance with site-specific conditions for various modification filings made by AT&T and its vendors. Specifically, this letter addresses those sites related to the year 2013, listed in the attached correspondence. It is our understanding that these are the only sites remaining from 2013 that need an extension.

Accordingly, on behalf of AT&T and their vendors, we respectfully request an additional extension of time to June 30, 2016 for completion of all remaining 2013 non-tower sites.

Thank you once again for your continued consideration in this matter. Should you have any questions regarding the foregoing please do not hesitate to contact me.

Very truly yours,

Daniel M. Laub
