---

To the best of our information, knowledge and belief, no Special Inspections were required for the monopole tower mounted AT&T platform support pipes, antennas, and RRU's. A visual inspection from ground level of completed construction has been performed, with review of post construction tower top photos and no major discrepancies have been reported.

To the best of our knowledge, information and belief the completed tower secured AT&T mounts, antennas & RRU's installation/replacement substantially conforms to the following:

1. Final Construction Drawings by VRG Inc., job number CT1014-LTE5C6C5G sheets 01,02, 03, 04, 05 dated 10-10-2018 and signed "As Built" 06-20-2019 by SL Universal.
2. Site Close out pictures provided by Empire Communications dated 04-15-2020

Based upon the aforementioned, the completed AT&T Mobility installation is in apparent conformance with the design documents and has been seemingly satisfactorily completed.

Interim reports submitted prior to this final report form a basis for and are to be considered an integral part of this final report.

Respectfully submitted,  
Vertical Resources Group, Inc.
