Bloomfield, CT 06002

RE: **EM-CLEARWIRE-011-100312**– Clearwire Corporation notice of intent to modify an existing telecommunications facility located at 1021 Blue Hills Avenue, Bloomfield, Connecticut.

Dear Mr. Flynn:

The Connecticut Siting Council (Council) hereby acknowledges your notice to modify this existing telecommunications facility, pursuant to Section 16-50j-73 of the Regulations of Connecticut State Agencies with the following conditions:

- Clearwire shall consult with the adjacent carriers (located directly above and below Clearwire's antennas/dishes) and, if necessary, take steps to minimize any interference/intermodulation issues including but not limited to adjusting its antenna and/or dish heights; and
- Should Clearwire adjust its antenna and/or dish heights, the Council shall be notified in writing prior to the installation;
- The proposed coax shall be installed per Figure 1 of the structural analysis report dated January 11, 2010 and sealed by Christopher Michael Murphy, P.E.;
- The proposed radios shall be installed behind the antennas/dishes per the structural analysis report dated January 11, 2010 and sealed by Christopher Michael Murphy, P.E.; and
- Not more than 45 days after completion of construction, the Council shall be notified in writing that the coax and radios were installed as specified.

The proposed modifications are to be implemented as specified here and in your notice dated March 11, 2010, including the placement of all necessary equipment and shelters within the tower compound. The modifications are in compliance with the exception criteria in Section 16-50j-72 (b) of the Regulations of Connecticut State Agencies as changes to an existing facility site that would not increase tower height, extend the boundaries of the tower site, increase noise levels at the tower site boundary by six decibels, and increase the total radio frequencies electromagnetic radiation power density measured at the tower site boundary to or above the standard adopted by the State Department of Environmental Protection pursuant to General Statutes § 22a-162. This facility has also been carefully modeled to ensure that radio frequency emissions are conservatively below State and federal standards applicable to the frequencies now used on this tower.

This decision is under the exclusive jurisdiction of the Council. Please be advised that the validity of this action shall expire one year from the date of this letter. Any additional change to this facility will require

explicit notice to this agency pursuant to Regulations of Connecticut State Agencies Section 16-50j-73. Such notice shall include all relevant information regarding the proposed change with cumulative worst-case modeling of radio frequency exposure at the closest point of uncontrolled access to the tower base, consistent with Federal Communications Commission, Office of Engineering and Technology, Bulletin 65. Any deviation from this format may result in the Council implementing enforcement proceedings pursuant to General Statutes § 16-50u including, without limitation, imposition of expenses resulting from such failure and of civil penalties in an amount not less than one thousand dollars per day for each day of construction or operation in material violation.

Thank you for your attention and cooperation.

Very truly yours,

S. Derek Phelps  
Executive Director

SDP/MP/laf
