Re: **Notice of Exempt Modification**
785 Park Avenue, Bloomfield, Connecticut

Dear Mr. Phelps:

Cellco Partnership d/b/a Verizon Wireless ("Cellco") maintains a wireless telecommunications facility behind the Bloomfield Police Facility building at the above-referenced location. Cellco intends to install a natural gas-fueled back-up generator on a concrete pad adjacent to the existing equipment shelters.

Please accept this letter as notification pursuant to R.C.S.A. § 16-50j-73, for construction that constitutes an exempt modification pursuant to R.C.S.A. § 16-50j-72(b)(2). In accordance with R.C.S.A. § 16-50j-73, a copy of this letter is being sent to Louie Chapman, Jr., Town Manager of the Town of Bloomfield. Please note that the Town of Bloomfield is the owner of the property on which the facility is located.

The planned modifications to the Bloomfield facility fall squarely within those activities explicitly provided for in R.C.S.A. § 16-50j-72(b)(2).

1. The proposed modification will not increase the overall height of the existing tower.
2. The proposed installation of a natural gas-fueled back-up generator will require a minor extension of the fenced compound. All improvements will, however, remain within the existing site boundaries.
3. The proposed installation will not increase the noise levels at the facility by six decibels or more.

4. The proposed modification will not result in any increase radio frequency (RF) power density levels at the facility to a level at or above the Federal Communications Commission (FCC) adopted safety standard.

For the foregoing reasons, Cellco respectfully submits that the proposed antenna installation at the facility constitutes an exempt modification under R.C.S.A. § 16-50j-72(b)(2).

Sincerely,

A handwritten signature in blue ink, appearing to read 'Kenneth C. Baldwin', with a long horizontal flourish extending to the right.
