RE: EM-AT&T-015-140709 Notice of Completion of Construction for New Cingular Wireless/ AT&T facility at 2 Kaechele Place, Bridgeport, Connecticut

Dear Ms. Bachman:

The purpose of this letter is to notify you that construction activity associated with the above-referenced decision has been completed. I am enclosing the Modification Inspection Report that was completed for the modification/reinforcement to the subject structure mentioned in the Notice of Intent letter from the CSC dated August 4, 2014.

If you have any questions or need any additional information regarding this facility, please do not hesitate to contact me.

Sincerely,

David Cooper

Subject: **Modification Inspection Report**

Crown Castle Designation:	**Crown Castle BU Number:**	841288
	Crown Castle Site Name:	Bridgeport North
	Crown Castle JDE Job Number:	297907
Engineering Firm Designation:	**TEP Project Number:**	25567_26102
Site Data:	**2 Kaechele Place** **Bridgeport, Fairfield County, CT 06606** **Latitude N *41° 13' 24.04"*, Longitude W *73° 13' 0.38"*** **150 Foot – Monopole Tower**	

Dear Mr. Vadney,

Tower Engineering Professionals is pleased to submit this **"Modification Inspection Report"** (MI Report) to Crown Castle for the modification/reinforcement to the subject structure. This Modification Inspection (MI) was performed in accordance with Crown Castle ENG-SOW-10007 Modification Inspection SOW, Contract Documents, and Crown Castle Purchase Order number 721479. The purpose of this MI is to confirm that the modification installation configuration and workmanship are in accordance with the contract document(s) listed in Table 2. The MI is not a review of the adequacy or effectiveness of the modification/reinforcement solution.

Table 1 – General Information

	Company	Contact	Dates on Site

Sub to the General Contractor	N/A	N/A	N/A
Field CWI for the General Contractor	Applied Testing Group, LLC	Lloyd J. Harper, CWI	5/10/15
Field NDE for the General Contractor	Applied Testing Group, LLC	Lloyd J. Harper, CWI	5/6/15

Table 2 – Documents

Document(s)	Remarks	Source
Modification Drawings Date: September 19, 2014 EOR: John N. Kabak, P.E. Job#: 2014777.814288.03	Creator of Drawings: GPD Group Job #: 2014777.814288.03 Date of Drawings: 9/19/14	CCIsites Drawing File: 5303822

Based on our inspection, Tower Engineering Professionals, Inc. determines this project:

X PASSING MI

The configuration, materials and/or workmanship of the modifications are installed in accordance with the Contract Documents and no deficiencies were found.

__ PASS AS NOTED MI

The configuration, materials and/or workmanship of the modifications are accepted as noted (see detail below).

__ FAILED MI

The configuration, materials and/or workmanship of the modifications are NOT installed in accordance with the Contract Documents. The rejection is based on non-conformance in the following area(s):

__ Materials (see detail below)

__ Workmanship (see detail below)

__ Configuration (see detail below)

Discrepancies were noted between the As-Built field conditions and the structural modification drawings. The As-Built field conditions were approved by the Engineer of Record. All discrepancies are noted in the executive summary.

All observations were performed after the construction was complete. Tower Engineering Professionals, Inc. was not present during the construction phase. The onsite PMI was performed by Hannah Childers and Jordan Adams of Tower Engineering Professionals, Inc., (919) 661-6351.

We at Tower Engineering Professionals, Inc. appreciate the opportunity of providing our continuing professional services to you and Crown Castle. If you have any questions or need further assistance on this or any other projects please give us a call.

Respectfully submitted,

Andrew T. Haldane, P.E., C.W.I.

Subject: RE: Bridgeport North BU# 841288 TEP# 25567_26102 - MI Summary

Matt,

Any item in the MI checklist that need to be waived, should be taken care of before construction starts.

The shop drawing requirement can be waived if the construction was entirely based on the SDD package by GPD.

Thank You,

Mody Said, E.I.

Test Report

Report No. : KK-11-002672
Page No. : 1 OF 1
Date of Report : Jan. 19, 2011

Owner	SUNNY SCREW INDUSTRY CO., LTD.
Applicant	SUNNY SCREW INDUSTRY CO., LTD.
Sample Name	Steel Wire φ 21.30mm
Size	M16×61
Order No.	C311285
Part No.	POMB-025351
Heat No.	HBSL16-2U
Sample Taken By	SUNNY SCREW INDUSTRY CO., LTD.(新豐興)
Sample Submitted By	SUNNY SCREW INDUSTRY CO., LTD.(新豐興)
Date of Sample Received	Jan. 09, 2011
Date of Testing	Jan. 09, 2011 to Jan. 18, 2011
Testing Method	ASTM A370-10
Remark	The information mentioned in the above section is provided by Client (Exclude Date of Sample Received and Date of Testing)

TEST RESULTS :

Specimen No.	Yield Strength (0.2% offset) ksi	Tensile Strength ksi	Elongation (G.L.2in.) %	Hardness HRBW

Notes

Material was manufactured, tested and inspected in accordance with Vulcan Threaded Products Inc. Quality Assurance Program and Manual Rev. A, dated 8/23/11. Processed material is Quenched and Tempered - Stress Free. No weld repair performed on the material. No Mercury used in the production of this material. Melted and Manufactured in the USA.
Depth of Decarburization meets ASTM A962/A962M-13 spec requirements
Test specimens meet the ASTM A370-12a specifications

CONSTRUCTION

6.2.1 CONSTRUCTION INSPECTIONS

To Whom It May Concern,

The Bridgeport North project BU#841288 was completed on 06-1-15 according to the EOR approved design drawings dated 9/19/14. This work was satisfactorily completed within OSHA rules and regulations and per current industry standards, Crown Communications standards to meet the EOR specifications as designed and approved modifications to the original design.

Thank you,

JEREMY NORRIS

SE REGIONAL MANAGER

Mobile- 267-644-6531

6.2.2 POST INSTALLED ANCHOR ROD VERIFICATION

Montgomeryville, PA 18936

Subject: Post Installed Anchor Rod Verification Report

Designation: Crown BU Number: BU 841288
Site Name: BRIDGEPORT NORTH

Inspection Firm Designation: Project Number:

Site Data: Address, City, State, Zip
2 KAAECHELE PLACE BRIDGEPORT CT 06606

Foss Electric. is pleased to submit this **"Post Installed Anchor Rod Verification Report"** to Crown Castle for the modification/reinforcement to the subject structure. The purpose of this Post Installed Anchor Rod Verification Report is to confirm that the Anchor Rod installation/configuration and workmanship are in accordance with industry standards and the contract document(s) listed in Table 2 and Crown Castle Document number ENG-PRC-10119.

Table 1 – General Information

	Representative	Contact Information
ROBERT FOSS ELECTRIC	Jeremy Norris	267-644-6531

Table 2 – Design Documents

	Remarks	Source
Tower Modification Drawings		Lusk Enterprise

Based on our inspection, *FOSS ELECTRIC.* determines this project:

X Installation of Anchor Rods Acceptable

The configuration, materials and/or workmanship of the modifications are installed in accordance with the Contract Documents and no deficiencies were found.

Observations were performed during and after construction. Please see Tables 1 thru 4 and associated documents below for site conditions and photo documentation of the required parameters.

We at *ROBERT FOSS ELECTRIC*, appreciate the opportunity to provide our continuing professional services to Crown Castle. If you have any questions or need further assistance on this or any other projects please give us a call.

Regards,

Jeremy Norris
Construction Manager
FOSS ELECTRIC

Mr. Jeremy Norris
RF Telecom, LLC
1084 Bethleham Pike
Montgomery, Pennsylvania 18936

Subject: ATG Project No. 031-15, Final Examination Report, 150' Monopole Tower Reinforcement Project, Bridgeport North, BU# 841288, 2 Kaechele Place, Bridgeport, Connecticut 06606

Dear Mr. Norris:

We are pleased to submit two copies of our Final Examination Report for the above referenced project. These services were provided in accordance with our proposal, 15-031, Bridgeport North, dated May 11, 2015. We proceeded with our services based on both your purchase order number and email authorization.

SCOPE OF SERVICES

We have reviewed or observed the pre, during, and post welding operations, conducted a 100% pre-modification visual (VT) and ultrasonic examination (UT) of the existing available tower-to-base plate circumferential weld, a 100% VT and magnetic particle (MT) examination of the four existing base plate stiffener-to-pole shaft welds, and a 100% VT and MT of the four new anchor bracket-to-tube and pole shaft welded connections, to evaluate their conformance with the applicable code requirements, project plans, and specifications.

The following services have not been provided by our firm: surveying for line and grade, cost estimates, review of design and contract documents, tests of material other than structural steel, and professional services not discussed herein.

WELDING, VISUAL, MAGNETIC PARTICLE, AND ULTRASONIC OBSERVATIONS

AWS/Certified Welding Inspector and NDE II/III Technician personnel from our office reviewed or observed the pre, during, and post welding operations. This included verification of the welding machine amperage for actual field voltage/amperage determinations. We also accomplished a VT and MT examination of the four existing base plate stiffener-to-pole shaft welds, and a VT and MT of the four new anchor bracket-to-tube and pole shaft welded connections, at the site between May 6, 2015 and May 10, 2015. The plans used were those prepared by GPD, dated September 19, 2014.

WELDING, VISUAL, MAGNETIC PARTICLE, AND ULTRASONIC OBSERVATION RESULTS

The pre, during, and post welding operations, the pre-modification VT and UT of the tower-to-base plate circumferential weld, the VT and MT examination of the four existing base plate stiffener-to-pole shaft welds, and the VT and MT of the four new anchor bracket-to-tube and pole shaft welded connection, were in conformance with the applicable requirements delineated in ANSI/AWS D 1.1:2010-*Structural Steel Code*, and the project plans and specifications, as we understand them. Refer to the appended Visual Observation Report, Magnetic Particle Examination Report, Ultrasonic Calibration Report, Ultrasonic Testing of Welds Report, Welder Certification, CWI/NDE Certifications, and supporting photographs for particulars.

Discrepancies noted between the plans and specifications or code requirements, and the as-built construction observed in the conduct of the welding and structural steel observations were brought to the attention of the contractor. According to our records, all noted discrepancies have been corrected in the field in accordance with the project plans and specifications.

We have endeavored to complete the services identified herein in a manner consistent with that level of care and skill ordinarily exercised by members of the profession currently practicing in the same locality and under similar conditions as this project. No other representation, express or implied, is included or intended, and no warranty or guarantee is included or intended in this agreement, or any report, opinion, document, or other instrument of service.

We are pleased to be of service to you on this project. If you have any questions concerning this report, do not hesitate to contact either of the undersigned.

Very truly yours,

APPLIED TESTING GROUP, LLC.

REMARKS AND/OR DISCREPANCIES:			

Notes:

On May 10, 2015, Applied Testing Group LLC, performed a visual examination of the installation of four new anchor bracket-to-tube and pole shaft, and four existing stiffener-to-pole shaft and existing base plate welded connections, located at 2 Kaechele Place, Bridgeport, CT.

The pre, during, and post welding operations were noted to be acceptable in accordance with the applicable requirements delineated in ANSI/AWS D1.1:2010.

The following were examined:

1) Installation of four new anchor bracket-to-tube and pole shaft welds at the base elevation.
2) Installation of four existing stiffener-to-pole shaft and existing base plate welds extension welded connections at the base elevation.

The welds were acceptable in accordance with ANSI/AWS D1.1:2010 and the project plans/specifications. Cold galvanizing paint has been acceptably applied to all exterior locations.

Qualification and Certification Record

This is to certify that:

Name: Daniel Irons **Social Security Number:** 6010

Fully meets the requirements of ATG-NDE-QC-PQ-1 and is hereby certified in the method and the qualification level shown below:

NDT Method: Visual

Certification Level : III **Date of Certification:** 03/16/2011

Certification Expiration Date: 03/15/2016

Test Scores:

Test	Grade	Administered By	Remarks
Basic:	90.0	T. Munson, P.E.	
Method:	94.0	T. Munson, P.E.	
Specific:	96.0	T. Munson, P.E.	
Practical	100.0	T. Munson, P.E.	
Composite:	95.0		

Limitations: Manual and Remote

Recommended for certification by: _____, P.E. **Date:** 03/16/2011
Corporate Professional ASNT NDT Level III
ASNT File Number 9295

Certified by : _____, P.E. **Date:** 03/16/2011

Welder Qualification Test Record

Welder or Welding Operator's Name: Ryan L. Toomey **Contractor:** JCC Deployment Services, Inc.
Welder's SSN: xxx -xx- 0984 **Qualification Date:** March 01, 2014
WPS #: Pre-qualified-ANSI/AWS D1.1 **Revision Year:** AWS D1.1 2010

Variables	Actual Variable(s) Used	Qualification Range(s)
Process:	SMAW	Shielded Metal Arc Welding
Joint Type	Single Bevel Groove	CJP, PJP, Fillet, Slot-unlimited
Backing Material Type	With	With or Without
Base Metal:		
Material Specification / Group	ASTM A572, Grade 65	Group 1& 2
Thickness - Groove / Fillet	1" CJP Groove	Unlimited
Diameter (pipe) – Groove / Fillet	N/A	Over 24"
Filler Metal:		
Specification Number	AWS A5.1	
Classification	E8018	F4 and Lower
A Number / F Number	A1 / F4	
Electrode Size	3/32 – 5/32	
Single or multiple electrodes	Single	Single
Position(s) Tested: 2	3G & 4G	F, V, O, H
Progression:	Uphill	Uphill
Gas/Flux Type:	N/A	N/A
Current/Polarity:	DCRP	As Req. by WPS

Visual Examination Results: Acceptable I.A.W. AWS D1.1:2010: ☒ Yes ☐ No

Guided Bend Test Results ☐ Yes ☒ N/A

Type	Result	Type	Result
N/A	N/A	N/A	N/A

RE: Crown Castle Site 841288 Bridgeport North

Contact,

This letter verifies that Robert Foss Electric used ZRC cold-galvanization for all on-site cold galvanizing per industry standards in accordance with Crown Castle document ENG-BUL-10149 on the work performed at site 841288 Bridgeport North.

Regards,

Jeremy Norris
Construction Manager
Foss Electric

6.3.3 EXECUTIVE SUMMARY

Photograph	Observations and Recommendations
	**Item 1** **Observation:** New anchor rods were installed into the existing foundation and encased with new anchor brackets. This was completed in accordance with pages S-7 & S-9 of the modification drawings provided by GPD Group dated September 19, 2014. **Recommendation:** No action is required.

Photograph	Observations and Recommendations
	**Item 2** **Observation:** New reinforcement plates were installed to the tower from an elevation of 0.5-ft to 47-ft. This was completed in accordance with pages S-7 & S-8 of the modification drawings provided by GPD Group dated September 19, 2014 except as noted. Note: The second reinforcing plate stopped at 46'-10". There was no gap between the new and existing plates where a 1" gap was specified. These items were approved by the engineer of record. **Recommendation:** No action is required.

Photograph	Observations and Recommendations
	**Item 3** **Observation:** New threaded rod end connections were installed to the existing threaded rods on the tower shaft at elevations of 51-ft & 98-ft. This was completed in accordance with page S-8 of the modification drawings provided by GPD Group dated September 19, 2014 except as noted. Note: The original brackets did not fit up properly and were replaced. (See sketch of revised bracket detail in section 6.3.5) On the new brackets the edge distance was measured as 5" and 4" at the 51' and 98' elevations, respectively. U-bolt spacing varied slightly between 2.5" and 3.5" where 3" was specified. These two items were approved by the engineer of record. **Recommendation:** No action is required.

Subject: RE: Bridgeport North BU# 841288 TEP# 25567_26102 - MI Summary

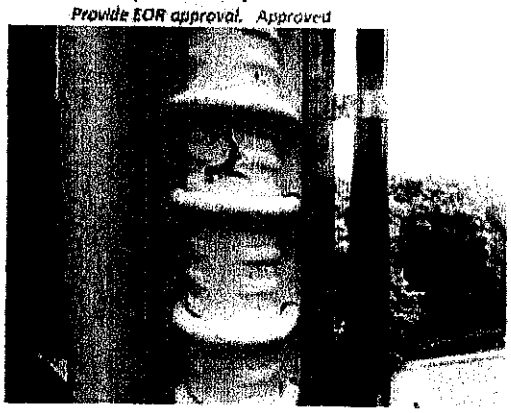
All,
Our re-inspection was completed yesterday 6/2/15. Two small items regarding the new brackets were observed. All other items have been fixed.

Mody,
Please review these and let us know if they are OK. Note that all U-bolts were aligned between the threads of the existing bar.

1. The edge distance was specified as 3 13/16" and 4 3/8" from the end of the plate, but was field verified as ≈ 5" at 51' and ≈4" at 98'. (Photos 19, 46)
   Provide EOR approval. Approved

2. **U-bolt spacing of the new brackets was specified as 3" typical of 8 spaces, however it was field verified as 2.5" to 3.5". (Photos 24-28]**
   Provide EOR approval. *Approved*



2

Closeouts remaining:

- The latest revision of the design drawings that I have are Rev B, dated 3/21/14. (I'm pretty sure the 14 is a typo, and it should be 3/21/2015) If this is the correct set of drawings, we will need EOR approval for 50 ksi steel used for the anchor rod brackets and square washer plate. Rev A and B of the drawings specify 65 ksi steel for these parts. The MTRs and packing slips show grade 50. 50 ksi brackets are approved.
- Please send GC As Builts on the latest set of drawings with the updated bracket plate detail (referenced in the attached email from GPD)
- Construction Inspections letter
- MTR and packing slip for the new bracket plate that was re-fabricated
- Fabricator's CWI for the second bracket plate fabrication, if any welding was performed.

Attachments: 841288 End Bracket Detail.pdf

Matt,

See attached for the detail. Please let me know if the fabricator will be able to bend a 65 ksi plate 90°. If this will work, I will update the drawings per the attached detail.

Thank You,

Mody Said, E.I.

Mody I just spoke to my fabricator as to what would be the easiest route to take. Could you possibly make us a quick sketch of the size and measurements of the plate so we can check on material availability?

Thank you,

Matt Hague

Subject: RE: Bridgeport North BU# 841288 TEP# 25567_26102 - MI Summary

Matt,

Would it be feasibly to use a 90 degrees 65 ksi bent plate to replace the bracket? This would eliminate the welding procedure. Please let me know if using the bent plate is a more cost effective option for you.

John,

Without the proper installation of the termination brackets to the threaded solid round members, the tower shaft is in an overstress condition. The solid round reinforcements are ineffective without proper termination connections.

Thank You,

Mody Said, E.I.

Subject: RE: Bridgeport North BU# 841288 TEP# 25567_26102 - MI Summary

John I spoke to Mody on Friday afternoon and they are looking into possibly using an angle in place of this welded termination plate. This would be shorter lead time and would correct the issue of the washers sitting on the weld. I am in the process of ordering these off size u-bolts that will fit inside the threads of the bar. I should have a better answer for you by later today.

Thank you,

Matt Hague

Subject:	RE: Bridgeport North BU# 841288 TEP# 25567_26102 - MI Summary

Item # 6 below is now updated.

From: Kevin Arnett [mailto:karnett@tepgroup.net]
Sent: Friday, May 15, 2015 1:25 PM
To: Said, Mody; Roupe, Chris; Trent Johnston; Vadney, Dan; McGee, John
Cc: PMI; Palkovic, Daniel; 'Matt Hague'; Davis, Kyle; Smith, Brian; Burton, Chad
Subject: RE: Bridgeport North BU# 841288 TEP# 25567_26102 - MI Summary

Regards to #6, this occurs at every U-bolt location on the bracket. We could not record a size, but looking at the photos, it appears to be a semi-circle of missing weld with a diameter approximately equal to the u-bolt diameter.

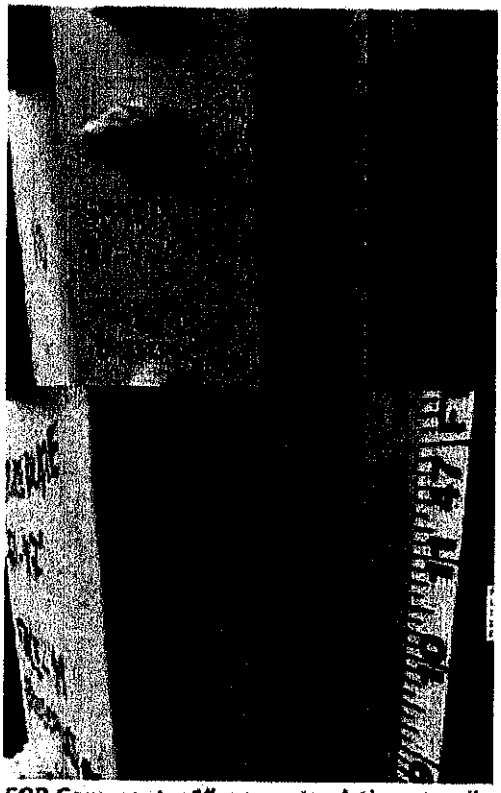
Subject: RE: Bridgeport North BU# 841288 TEP# 25567_26102 - MI Summary

Kevin / Trent,

EOR Comments in Green below each item. The only items that need EOR approval are items 2-8 &11. Items 1,9,10 & "TIA items outside of the scope of the modifications" need Crown approval. (All item numbers are per the original punch list items sent by Kevin Arnett from TEP)

Inspection Summary with EOR Comments:

2. **Plate 2 ends at 46'-10" rather than 47' as specified in the drawings. There is no 1" gap between the new and existing reinforcement plates at this elevation. (Photos 137, 139)**
   Provide EOR approval.

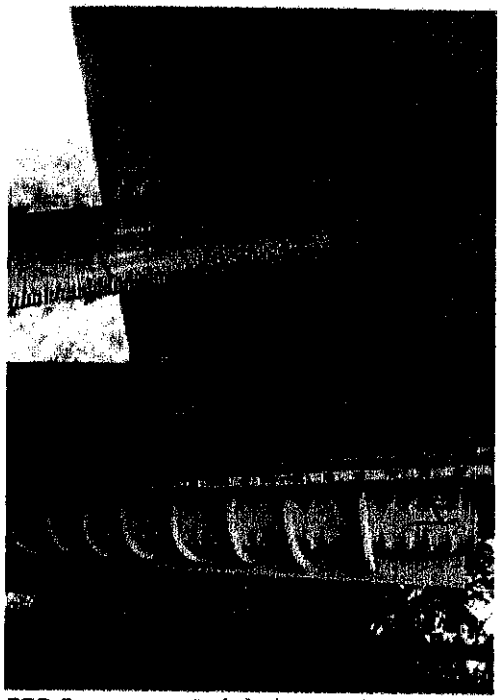


EOR Comments: *1" gap not existing at splice location will be acceptable (Item Approved).*

3. Shims were installed from ~27' to the splice at ~31'. (124,125)
   Provide EOR approval.

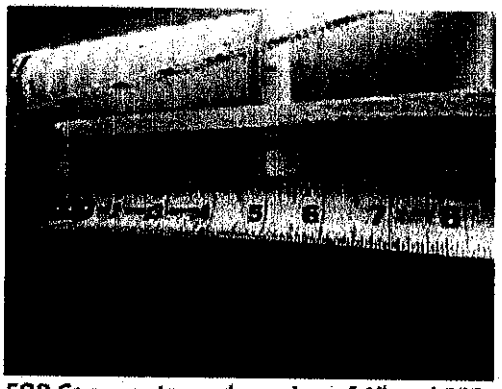
EOR Comments: ***Installed Shims is acceptable (Item Approved).***

4. **End bracket U-bolt holes were spaced at 3-1/2" rather than 3-1/8" as called for in the drawings. (Photos 179, 196)**
   Provide EOR approval.



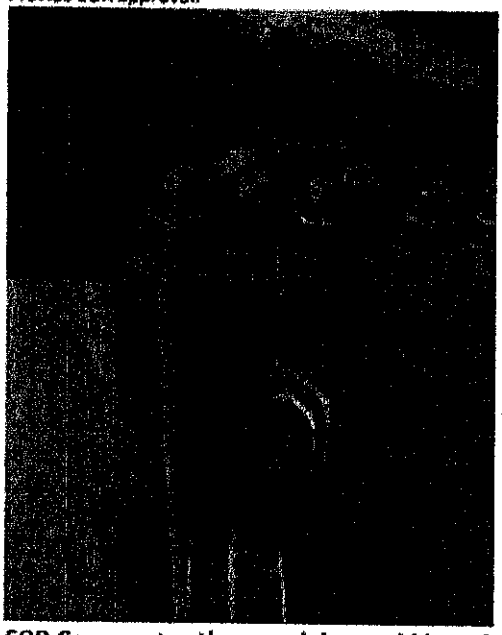
EOR Comments: ***Bolt holes spacing is 3-1/2" is acceptable (Item Approved).***

5. The spacing from the top of the new end brackets to the first U-bolt measured 4"; spacing from the bottom of the bracket to the bottom U-bolt measured 5". This spacing was typical at both 51' and 98'. Drawings call for 4-1/2" in both locations. (Photos 173, 175)
   Provide EOR approval.



EOR Comments: *end spacing of 4" and 5" instead of 4-1/2" are acceptable (Item Approved).*

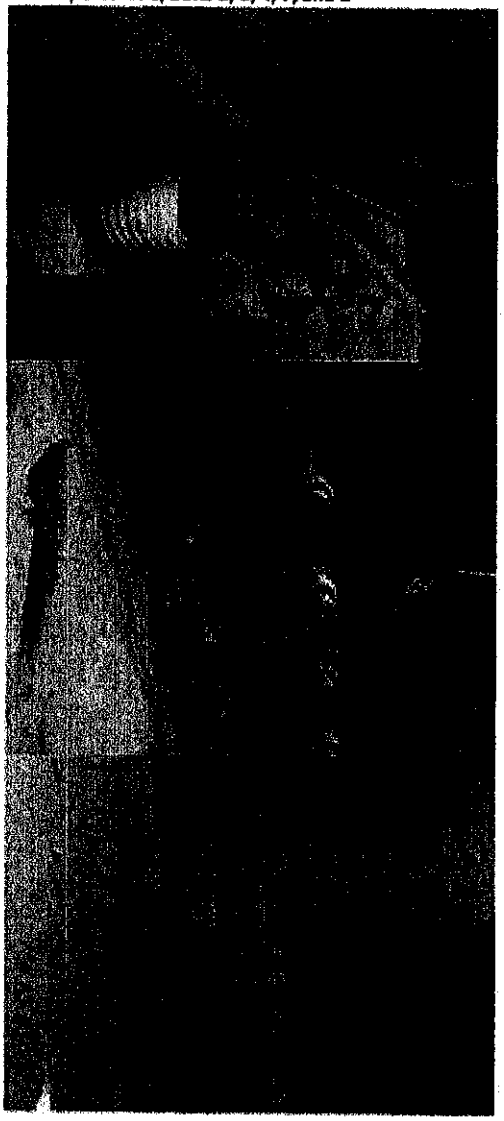
6. Gaps were cut in the corner welds of the end brackets at 51' and 98' to allow for the inside U-bolt washers and nuts. Not all of the washers could lay flush. (Photos 210, 239)
   Provide EOR approval.



EOR Comments: *the remaining weld length will not be sufficient* ***(Item Not Approved).***

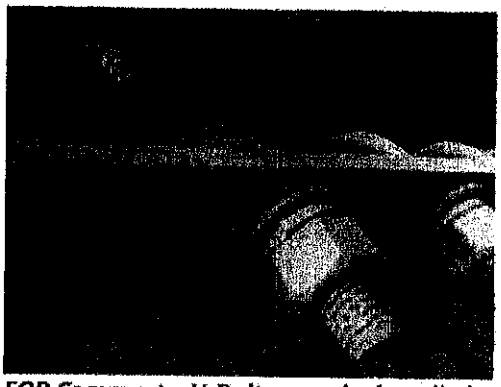
7. Box bolts were not installed flush to the bracket plate. Larger gaps were present in the following locations, numbered from the top of the end bracket: (Photos 191, 232, 237)
   Install the bolts so that they are tight and flush or provide EOR approval.
   a. 51', bracket 1, bolts 1 and 4

b. 51', bracket 3, bolt 5
c. 51', bracket 4, bolts 1, 3, 7, 9, and 10
d. 98', bracket 1, bolts 1, 4, 6, and 10
e. 98', bracket 2, bolts 1, 3, 4, 7, and 8



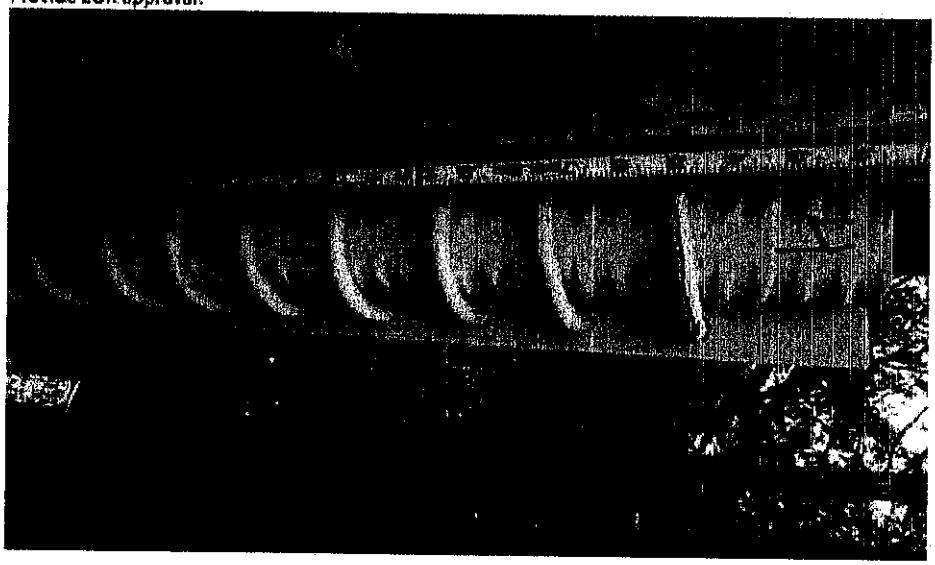
EOR Comments: *Bolts must be installed tight and flush* ***(Item Not Approved).***

8. Skewed U-bolts were observed on brackets 1 and 2 at 98'. (Photo 234)
Straighten the brackets and tighten to snug-tight condition.



EOR Comments: U-Bolts must be installed straight and tightened to snug-tight condition (Item Not Approved).

11. U-bolts in new brackets were offset slightly. This was not shown in the drawings. (196) Provide EOR approval.



EOR Comments: U-Bolts must fall between the threads then tightened to be snug-tight against the bracket (Item Not Approved).

Thanks,

Mody Said, E.I.
Structural Analyst
