RE:

EM-T-MOBILE-018-190606 – T-Mobile notice of intent to modify an existing telecommunications facility located at 37 Carmen Hill Road, Brookfield, Connecticut..

Dear Ms. Sabo:

The Connecticut Siting Council (Council) is in receipt of your correspondence of June 12, 2019 submitted in response to the Council's June 10, 2019 notification of an incomplete request for exempt modification with regard to the above-referenced matter.

The submission renders the request for exempt modification complete and the Council will process the request in accordance with the Federal Communications Commission 60-day timeframe.

Thank you for your attention and cooperation.

Sincerely,

Melanie A. Bachman Executive Director

RE: **EM-T-MOBILE-018-190606** – T-Mobile notice of intent to modify an existing telecommunications facility located at 37 Carmen Hill Road, Brookfield, Connecticut..

Dear Ms. Sabo:

The Connecticut Siting Council (Council) received a notice of intent to modify the above-referenced facility on June 6, 2019.

According to Section 16-50j-71 of the Regulations of Connecticut State Agencies, "...any modification, as defined in Section 16-50j-2a of the Regulations of Connecticut State Agencies, to an existing tower site, except as specified in Sections 16-50j-72 and 16-50j-88 of the Regulations of Connecticut State Agencies, may have a substantial adverse environmental effect."

Staff has reviewed this exempt modification request for completeness and has identified a deficiency in the Mount Review Letter (MA) dated April 29, 2019. The MA is signed but not stamped by a Professional Engineer registered in the State of Connecticut.

Therefore, the exempt modification request is incomplete at this time. The Council recommends that Northeast Site Solutions provide a MA for the proposed modification that is stamped and signed by a professional engineer duly licensed in the State of Connecticut, on or before July 12, 2019. If additional time is needed to gather the requested information, please submit a written request for an extension of time prior to July 12, 2019. Please provide an electronic version and one hard copy of the MA for the incomplete request to be rendered complete and processed.

This notice of incompletion shall have the effect of tolling the Federal Communications Commission (FCC) 60-day timeframe in accordance with Paragraph 217 of the FCC Wireless Infrastructure Report and Order issued on October 21, 2014 (FCC 14-153).

Thank you for your attention to this matter. Should you have any questions, please feel free to contact me at 860-827-2951.

Sincerely,

Melanie Bachman Executive Director

Mount Analysis: Site Pro 1 **Mount Model Number:** VFA14-HD

Job Number: N/A

Job Date: January 25, 2017

Dear Sheldon Freincle,

We are pleased to submit this 'Mount Review Letter' for the structural assessment of the aforementioned tower mounting device. The objective of this assessment is to determine the suitability of the existing tower mount to support the complete loading as specified in the attached Collocation Application.

Per the Collocation Application dated March 19, 2019 **T-Mobile** is a current tenant and is proposing to install new equipment. Proposed equipment is listed below in the attached Collocation Application.

Table 1 – Proposed Equipment to be installed:

| | | | Antenna/Equipment | | | | | | | | |
|-------------|--------------|-------|----------------------------|--------------------------|-------|-------|-------|-------|---|-----------------------|-----|
| Mount (ft.) | RAD (ft.) | Qty. | Antenna | Туре | | | | | | | |
| | - | 3 | Site Pro 1 VFA14-HD | Mount | | | | | | | |
| | | 3 | RFS APX16DWV-16DWV-S-E-ACU | Panel | | | | | | | |
| | 280.0 | 280.0 | 3 | RFS APXVAARR24_43-U-NA20 | Panel | | | | | | |
| | | | 280.0 | 280.0 | 280.0 | 280.0 | 200.0 | 280.0 | 3 | Ericsson KRY 112144 | TMA |
| 280.0 | | | | | | | | | 3 | Ericsson KRY 112 89-4 | TMA |
| | | | 3 | Ericsson RRU 4449 B71B12 | RRU | | | | | | |
| | | 3 | Ericsson AIR6488 2.5GHz | Panel | | | | | | | |
| | | 3 | Ericsson AIR 3246 B66 | Panel | | | | | | | |
| | | 3 | Ericsson 4415 B25 | RRU | | | | | | | |

Note: Proposed equipment shown in bold.

Mount Analysis Criteria

The mount was reviewed comparatively using the following design criteria.

| Company | Site Pro 1 | Vertical Bridge |
|-----------------------------------|------------------------------|------------------------------|
| State | N/A | Connecticut |
| City / County Building Code | N/A | Fairfield County (IBC 2015) |
| TIA/EIA Standard Code | TIA-222-G | TIA-222-G |
| Basic Wind Speed | $180 \text{ MPH } (V_{ult})$ | 115 MPH (V _{ult}) |
| | | / 89 MPH (V _{asd}) |
| Basic Wind Speed w/ Ice | 60 MPH / 2.75" Ice | 50 MPH / 0.75" Ice |
| Exposure Category | B or C | C |
| Topographic Category | 1 (0.0 ft) | 1 (0.0 ft) |
| (Height) | | |
| Risk Category | I or II | II |
| Mount Height | 400 ft | 280 ft |
| Normal Wind Load | 2400 lbs | 525 lbs |
| Normal Wind Load (Ice) | 700 lbs | 166 lbs |
| Tangential Wind Load | 2400 lbs | 208 lbs |
| Tangential Wind Load (Ice) | 700 lbs | 66 lbs |
| Weight Per Mount Pipe | 1200 lbs | 227 lbs |
| Weight Per Mount Pipe (Ice) | 2800 lbs | 439 lbs |

Note: Loads are given per mounting location and assume (4) locations per sector and symmetric loading.

Based on **Site Pro 1's** evaluation and **Vertical Bridge Engineering's** review, <u>it is acceptable</u> for the proposed equipment described in Table 1 above to be installed on the existing mount. This review is only valid for the Site Pro 1 VFA14-HD. If any other mount is used another mount analysis should be completed.

If the final antenna configuration installed differs from what is proposed above, an additional assessment should be completed to verify the structural impact.

DISCLAIMER OF WARRANTIES

The engineering services provided by Vertical Bridge Engineering, LLC in connection with the Mount Review Letter are limited to a structural assessment of the existing mount structure to support the proposed equipment. Vertical Bridge Engineering, LLC did not analyze the capacity or assess the condition of the existing structure to support the original tower design loads. The design of all structural systems to support the proposed loads and transfer them to the existing building structure will be prepared by others.

Vertical Bridge Engineering, LLC makes no warranties, expressed or implied, in connection with this report and disclaims any liability arising from the ability of the existing structure to support the design loads for which the mount was originally designed. Vertical Bridge Engineering, LLC will not be responsible whatsoever for or on account of, direct, indirect, punitive, special, consequential and/or incidental damages sustained by any person, firm or organization as a result of any data or conclusions contained in this report. The maximum liability of Vertical Bridge Engineering, LLC pursuant to this report will be limited to the total fee received for preparation of this report.

We appreciate the opportunity of providing our professional services to you. If you have any questions or need further assistance on this project, please feel free to give us a call.

Sincerely,

March 12, 2014

Date Accessed: Mon Apr 29 2019

Value provided is 3-second gust wind speeds at 33 ft above ground for Exposure C Category, based on linear interpolation between contours. Wind speeds are interpolated in accordance with the 7-10 Standard. Wind speeds correspond to approximately a 7% probability of exceedance in 50 years (annual exceedance probability = 0.00143, MRI = 700 years).

Site is in a hurricane-prone region as defined in ASCE/SEI 7-10 Section 26.2. Glazed openings need not be protected against wind-borne debris.

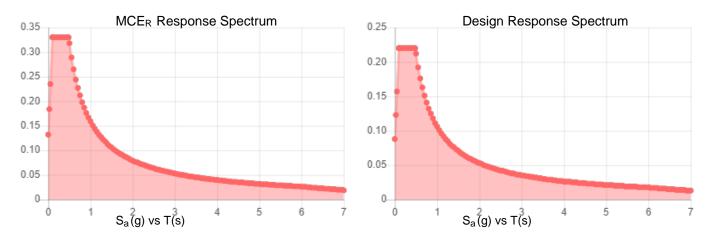

Mountainous terrain, gorges, ocean promontories, and special wind regions should be examined for unusual wind conditions.

Ice Thickness: 0.75 in.

Concurrent Temperature: 15 F

Gust Speed: 50 mph

Data Source: Standard ASCE/SEI 7-10, Figs. 10-2 through 10-8

Date Accessed: Mon Apr 29 2019

Ice thicknesses on structures in exposed locations at elevations higher than the surrounding terrain and in valleys and gorges may exceed the mapped values.

Values provided are equivalent radial ice thicknesses due to freezing rain with concurrent 3-second gust speeds, for a 50-year mean recurrence interval, and temperatures concurrent with ice thicknesses due to freezing rain. Thicknesses for ice accretions caused by other sources shall be obtained from local meteorological studies. Ice thicknesses in exposed locations at elevations higher than the surrounding terrain and in valleys and gorges may exceed the mapped values.

ADDITIONAL EQUIPMENT INFORMATION

- RRUs, TMAs and ODUs are required to be installed directly behind the antennas / MW dish. Otherwise there will be an additional charge.
- All equipment lines are required to be installed inside the tower when space is available. Carriers will be charged an additional \$25.00 per line per month if equipment lines are installed on the outside of the tower even though there is available space inside the tower.
 Vertical Bridge must approve any installation of lines on the outside of the tower.
- All tenant equipment must be installed within one continuous 10 ft vertical envelope. Exceeding this vertical space will be subject to additional rent.
