RE: Notice of Work Complete
100 Tatnic Hill Road, Brooklyn, CT
Sprint Site #: DOMU_CT33XC566
EM-SPRINT-019-180625

Members of the Siting Council:

On behalf of Sprint Spectrum, SBA Communications is hereby notifying the Connecticut Siting Council that work has been completed at the aforementioned telecommunications facility.

The requested documentation is attached, along with a reference copy of Council's acknowledgment of notice to modify.

Thank you,

A handwritten signature in black ink that reads "G. Scott Shepherd". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

Re: Letter of Completion
Sprint Site Number: CT33XC566
SBA Site ID: CT01915-S
SBA Site Name: South Brooklyn
Site Address: 100 Old Tatnic Hill Road
Brooklyn, CT 06234

To Whom It May Concern:

Infinigy has reviewed construction photos and general contractor redlined as-built drawings, provided by SBA Communication Corp. of the site at the aforementioned location. Construction appears to have been completed in general conformance with the Construction Drawings Rev. 0, dated April 10, 2018 by Infinigy Engineering, PLLC and reviewed by MasTec Network Solutions on January 31, 2019, with the following minor deviation from the original design:

- In the Antenna Mount Structural Analysis, the top handrail corner brace member was modeled as an angle, however, this is a pipe member per the construction photos. Additionally, the three (3) proposed corner brace pipes at the proposed bottom horizontal pipe location were not installed.

The installation appears to have been completed in general conformance with the structural recommendations provided in the Antenna Mount Structural Analysis Report by GeoStructural, LLC, dated March 19, 2018 and in accordance with all state and local building codes.

Please call me at 518.690.0790 should you have any questions on the matter.

Sincerely,
Infinigy

RE: **EM- SPRINT-019-180625** - Sprint notice of intent to modify an existing telecommunications facility located at 100 Tatnic Hill Road, Brooklyn, Connecticut.

Dear Ms. Pelletier:

The Connecticut Siting Council (Council) hereby acknowledges your notice to modify this existing telecommunications facility, pursuant to Section 16-50j-73 of the Regulations of Connecticut State Agencies with the following conditions:

1. Prior to Sprint's antenna installation, the existing mount assembly shall be modified in accordance with the Antenna Mount Structural Analysis prepared by Geostructural dated March 19, 2018 and stamped and signed by Gregory Durgin;
2. Within 45 days following completion of equipment installation, Sprint shall provide documentation showing that its installation complied with the recommendations presented in the Antenna Mount Structural Analysis;
3. Any deviation from the proposed modification as specified in this notice and supporting materials with the Council shall render this acknowledgement invalid;
4. Any material changes to this modification as proposed shall require the filing of a new notice with the Council;
5. Within 45 days after completion of construction, the Council shall be notified in writing that construction has been completed;
6. Any nonfunctioning antenna and associated antenna mounting equipment on this facility owned and operated by Sprint shall be removed within 60 days of the date the antenna ceased to function;
7. The validity of this action shall expire one year from the date of this letter; and
8. The applicant may file a request for an extension of time beyond the one year deadline provided that such request is submitted to the Council not less than 60 days prior to the expiration.

The proposed modifications including the placement of all necessary equipment and shelters within the tower compound are to be implemented as specified here and in your notice dated June 20, 2018. The modifications are in compliance with the exception criteria in Section 16-50j-72 (b) of the Regulations of Connecticut State Agencies as changes to an existing facility site that would not increase tower height, extend the boundaries of the tower site by any dimension, increase noise levels at the tower site boundary by six decibels or more, and increase the total radio frequencies electromagnetic radiation power density measured at the tower site boundary to or above the standards adopted by the Federal Communications Commission

pursuant to Section 704 of the Telecommunications Act of 1996 and by the state Department of Energy and Environmental Protection pursuant to Connecticut General Statutes § 22a-162. This facility has also been carefully modeled to ensure that radio frequency emissions are conservatively below state and federal standards applicable to the frequencies now used on this tower.

This decision is under the exclusive jurisdiction of the Council. Please be advised that the validity of this action shall expire one year from the date of this letter. Any additional change to this facility will require explicit notice to this agency pursuant to Regulations of Connecticut State Agencies Section 16-50j-73. Such notice shall include all relevant information regarding the proposed change with cumulative worst-case modeling of radio frequency exposure at the closest point of uncontrolled access to the tower base, consistent with Federal Communications Commission, Office of Engineering and Technology, Bulletin 65. Thank you for your attention and cooperation.

Sincerely,

Melanie A. Bachman
Executive Director
