Re:

EM-VER-023-120301 – Cellco Partnership d/b/a Verizon Wireless 540 Cherry Brook Road, Canton, Connecticut

Dear Mr. Martin:

On March 16, 2012, the Siting Council acknowledged receipt of Cellco's notice of intent to modify its telecommunications facility at 540 Cherry Brook Road in Canton. The modification involved the replacement of certain antennas and the installation of additional coax cables.

As a condition of the acknowledgement, Cellco was required to provide the Council with a letter stating that the recommendations specified in the structural report were implemented. Attached is a Tower Modification Certification Letter verifying that these conditions have been satisfied. All construction associated with these modifications has now been completed.

If you have any questions please do not hesitate to contact me or Rachel Mayo.

Boca Raton, Florida 33487

Engineer:

FDH Engineering

2730 Rowland Ave Raleigh, NC 27615

Centek Project No.: 12005.CO35

Dear Mr. Gauger,

We are providing this "Existing Telecommunications Facility Tower Modification Certification Letter" with regard to the antenna upgrade by Verizon Wireless at the above referenced project.

The following are the basis for substantiating compliance with the design documents prepared by FDH Engineering:

- Review of the FDH structural analysis dated 12/28/2011.
- Field observations by Centek personnel of coax installation on 2/19/2013 which determined all coax lines were installed in general compliance with the recommendations of the structural analysis report prepared by FDH on 12/28/2011.

The work under this Contract has been reviewed and found, to the Engineer's best knowledge, information and belief, to be completed in general compliance with the documents referenced above.

Sincerely,

Carlo F. Zentore, PE

Principal + Structural Engineer
