THE CONNECTICUT LIGHT AND POWER COMPANY
Doing Business As
EVERSOURCE ENERGY

REQUEST FOR TOWER SHARING ON
AN EXISTING TELECOMMUNICATIONS FACILITY
IN THE TOWN OF COVENTRY, CONNECTICUT

A. Introduction

Pursuant to Connecticut General Statutes ("CGS") §16-50aa[1], The Connecticut Light and Power Company, doing business as Eversource Energy ("Eversource" or the "Company"), hereby requests approval of the Connecticut Siting Council ("Council") for shared use on an existing wireless telecommunications facility ("Existing Facility") located at 400 Riley Mountain Road, Coventry, Connecticut ("Site"). Eversource proposes to collocate radio communication equipment at the Existing Facility, which is owned and maintained by Crown Castle ("Crown") and located at a latitude and longitude of 41° 47' 56.21" N and -72° 19' 55.88" W, respectively. The Existing Facility is situated in the eastern portion of a ±28.58-acre wooded lot owned by the Trustee of James L. and Concetta M. Wallbeoff. See Figure 1, *Site Location Map*.

Eversource requests that the Council find that the proposed shared use of the Crown facility satisfies the criteria of CGS §16-50aa and issue an order approving the shared use.

B. Background

Eversource is in the process of expanding its 900 megahertz ("MHz") Distribution Supervisory Control and Data Acquisition ("DSCADA") system throughout Connecticut. This system enhances the reliability of the electrical distribution system and public safety by remotely operating line disconnect equipment where wireless operated power switching equipment has been installed. Furthermore, Eversource is currently adding base stations throughout its service territory to improve land mobile radio voice communications with electrical workers when performing maintenance work on or repairs to the electric system infrastructure.

[1] Regulations of Connecticut State Agencies ("RCSA") §§16-50j-88 to 16-50j-90 also applies.

Proposed Wireless Telecommunications Facility
N. Coventry/Wallbeoff
Riley Mountain Road
Coventry, Connecticut

EVERSOURCE ENERGY

ALL-POINTS TECHNOLOGY CORPORATION

Crown currently owns and operates the Existing Facility, commonly referred to as the "Riley Mountain Road Facility"[2], located in an area that allows Eversource an opportunity to enhance its current communications system. The Existing Facility consists of an irregularly shaped, fence enclosed equipment compound, several equipment shelters and a ±152-foot steel monopole containing multiple commercial telecommunication service providers' antennas and appurtenances. The total height of the existing tower with top-mounted antennas is ±154.5 feet above ground level ("AGL").

Access to the Site is from the north, off Riley Mountain Road. The property on which the Site lies (identified in Coventry Assessor records as Parcel 011 0029A 0003) has frontage to Boston Turnpike; however nearly 400 feet of mature forest separates the Site from this road.

C. Description of the Project

Eversource proposes to install one (1) ±20-foot tall[3], dual pole omnidirectional whip antenna with a tower top amplifier on the Existing Facility mounted at an elevation of ±152 feet AGL. An irregular shaped gravel-based compound and fence expansion (±736 square feet) is proposed in the northern portion of the existing compound to provide space for a new ±10-foot by ±20-foot by ±10-foot tall concrete equipment shelter and a 1,000-gallon above ground propane tank. A short (±6-foot) extension off the existing compound's northeast corner would accommodate a 20-kW propane-fueled, emergency back-up power generator. Collectively, these proposed modifications are referred to herein as the "Project". The existing Site's ground elevation is approximately 707.75 feet above mean sea level. The height of the new whip antenna would extend a maximum of ±20 feet above the top of the tower, raising the total height to approximately 172 feet AGL. See Attachment 1, *Project Plans* (completed by the All Points Technology Corporation ["APT"]; dated June 6, 2018). Eversource would continue to own and maintain its equipment after the Project is completed.

[2] This existing telecommunications facility is identified in the Council's Statewide Comprehensive Tower Database (October 11, 2017).

[3] This is an approximate dimension. The proposed antenna model for installation (DB Spectra DS9A09F36D-N) is 19.2 feet.

Table 1, *Antenna Schedule*, summarizes the proposed antenna type and vertical center line location as proposed. Specifications for the Company's new antennas, emergency back-up power generator and 1,000-gallon above ground propane tank are included in Attachment 2, *Antenna & Emergency Back-Up Power Generator Specifications.*

Table 1: Antenna Schedule

Antenna Type	Antenna Make/Model	Antenna Center Line Elevation (ft. AGL)	Comments	Frequency
20-ft. Tall Dual Omni	DB Spectra DS9A09F36D-N	±162.0	DSCADA	900 MHz & 935 MHz

For additional elevation information and location drawings of the proposed installation, please refer to the Project Plans in Attachment 1.

D. Technical Feasibility

The existing Crown monopole is structurally capable of supporting Eversource's proposed improvements making the proposed shared use technically feasible. A structural loading analysis has been performed to ensure that the tower would be structurally capable of supporting the loading from the new antenna and appurtenances. A review of the design and structural analysis for the Project is included in Attachment 3, *Structural Analysis Report*, which was provided by Crown in August 2017.

E. Legal Feasibility

Under CGS §16-50aa[4], the Council has authority to issue orders approving the shared use of an existing tower such as the monopole at the Existing Facility. An order by the Council approving the requested shared use would permit Eversource to obtain a building permit, if required by the Town of Coventry, for the proposed Project.

F. Environmental Feasibility

The Project would not have a substantial adverse environmental effect because Eversource would use the Existing Facility, thus eliminating the need to construct a new tower. Additionally, the proposed modifications to the existing equipment compound requires minimal earthwork in areas adjacent to where prior ground disturbances have occurred.

[4] Regulations of Connecticut State Agencies ("RCSA") §§16-50j-88 to 16-50j-90 also applies.

1) Wetlands and Watercourses

The Project would not have a significant adverse effect on wetlands resources or watercourses as its scope is limited to areas within or immediately beyond the Existing Facility footprint. Two wetland resources were identified by APT during a field inspection on September 21, 2017[5].

Wetland 1

The closest wetland resource, Wetland 1, is located ±54 feet east of the access road and ±226 feet north of the proposed modifications to the Existing Facility. Wetland 1 consists of a small forested hillside seep system that drains west to east. This wetland is generally located on a topographic plateau and transitions to moderately drained uplands farther to the east as the slope steepens. The wetland is dominated by mature, closed-canopy forest with a sparse understory. Micro-topography within this area generally consists of shallow hummock/hollows. No evidence was observed of seasonal flooding within Wetland 1.

Wetland 2

Wetland 2, located approximately 346 feet north of the proposed compound expansion at its closest point, consists of a complex hillside seep system that drains west to east. Hillside seep portions of the wetland consist of very stony soils. Western extents of the wetland are dominated by closed-canopy mature forest. As the wetland drains east into a vernal pool habitat, the dominant cover type transitions to scrub/shrub.

Vernal Pool Habitat

The vernal pool habitat within Wetland 2 is located approximately 601 feet to the northeast of the Existing Facility. This resource was given a conservative priority rating of Tier 1[6] since the inspection was conducted during non-breeding vernal pool season. The topography consists of hummock/hollow with evidence of seasonal flooding exceeding eight (8) inches. The Existing Facility and proposed compound expansion are located within the Critical Terrestrial Habitat conservation zone ("CTH"; 100'-750' from the edge of a vernal pool breeding habitat). See Figure 2, *Environmental Resources Map*.

[5] The wetland inspection was conducted by a registered soil scientist. Wetlands and watercourses were delineated in accordance with applicable local, state and federal statutes, regulations and guidance.

[6] A Tier I rating is considered to have relatively high breeding activity and relatively intact terrestrial habitat. Vernal Pool Assessment Sheet (source: Calhoun and Klemens 2002).

EVERSOURCE ENERGY

ALL-POINTS TECHNOLOGY CORPORATION

The proposed modifications will not alter existing surface or subsurface flow conditions or directions. Site clearing and grading activities will not de-water the nearby wetland resources or vernal pool. Further, no alterations to surface water drainage patterns associated with these resources would occur since any new impervious surfaces would be minimized through the use of gravel surfaces that promote infiltration. Therefore, the proposed modifications will not alter the hydrology of the nearby wetlands or vernal pool. See Attachment 4, *Wetland Inspection Report & Vernal Pool Analysis* for more detailed information.

2) Soil Erosion, Sediment Control, and Soil Remediation

Minor ground disturbances would be associated with the modifications to the existing equipment compound and installation of the equipment shelter and excavations would not exceed ±4 feet below grade. Groundwork associated with the Project would include regrading/leveling of the Site where the compound expansion is proposed and trenching for the installation of new coax cables, concrete pads and fence posts. No modifications to the existing access road are required. Erosion and sedimentation controls would be installed and maintained in the required areas during construction in accordance with the *2002 Connecticut Guidelines for Soil Erosion and Sedimentation Control*; therefore, no adverse impacts to any of the wetland or vernal pool resources are anticipated from the Project.

3) Wildlife and Vegetation

Ground disturbance associated with the Project would be minor and take place within an area that has been previously disturbed as a result of the Exiting Facility's development and does not support any significant wildlife habitat. Therefore, the Project would not have an adverse impact to wildlife or vegetation.

According to the available Connecticut Department of Energy & Environmental Protection ("CTDEEP") Wildlife Division Natural Diversity Data Base ("NDDB") maps, the Project is not located within NDDB buffer area. The nearest buffer area is located ±0.85 mile to the west. APT submitted a NDDB review request with respect to this Project to confirm that no known populations of Federal or State Endangered, Threatened or Special Concern Species occur on this Site. The CTDEEP responded on October 23, 2017 stating that populations of one known species of special concern, Spotted Turtle (*Clemmys gutta*), are known to occur within the vicinity of the Project area and best management practices will need to be implemented. A recommended list of Spotted Turtle protection measures was included in the CTDEEP response. Eversource will adhere to DEEP's recommended turtle

protection measures during construction to avoid potential impact to this State-listed species.

A copy of the CTDEEP response letter and recommended Spotted Turtle protection measures are included in Attachment 5, *Agency Correspondence.*

One federally-listed threatened species, the northern long-eared bat ("NLEB"; *Myotis septentrionalis*), is known to occur in the vicinity of the Site. The NLEB's range encompasses the entire State of Connecticut. Consultations with CTDEEP Wildlife Division revealed that the Site is not within 150 feet of a known occupied maternity roost tree and is not within 0.25 mile of a known NLEB hibernaculum. The nearest NLEB habitat resource to the Project is a hibernaculum located in East Granby ±44 miles to the northwest of the Project. Based on this information, the Company believes that the Project is not likely to adversely affect NLEB.[7]

The proposed location for the compound expansion consists of bordering gravel and edge mature forest. The dominant cover type within this edge forest is red oak and Eastern white pine. Based upon the extent of the proposed compound expansion area and the surrounding vegetation, it does not appear that mature trees[8] will need to be removed. However, a 20-inch DBH Eastern white pine that is located approximately 10 feet to the north of the proposed compound expansion, could potentially be affected during construction if the root zone were compromised by earthwork activities. Eversource and its contractor will take precautions to protect this tree during construction. Two existing deceased trees will need to be removed to accommodate the proposed compound expansion. No other trees are anticipated to be affected by the proposed compound expansion[9].

4) Safety and Health

The Project would not create any safety or health hazards to persons or property. Eversource does not anticipate the need for any traffic control measures during construction on the Site

[7] A NLEB streamlined consultation form was submitted to the United States Fish and Wildlife Service ("USFWS") on October 16, 2017. If the USFWS does not respond within 30 days from submittal of the Northern Long-Eared Bat 4(d) Rule Streamlined Consultation Form, it is presumed that the USFWS concurs with the consultant's determination of no adverse effect and project responsibilities under 7(a)(2) of the Endangered Species Act with respect to the NLEB are fulfilled in accordance with the USFWS January 5, 2016 intra-Service Programmatic Biological Opinion. The USFWS did not respond to the submission within the 30-day time frame so it is presumed that no adverse effect would occur to NLEB from the Project. A USFWS NLEP Compliance Statement is included in Attachment 5, *Agency Correspondence*.

[8] Trees measuring greater than 6" Diameter at Breast Height ("DBH").

[9] Some existing trees near the proposed compound expansion may need minor pruning to allow for construction equipment to operate safely.

or equipment and materials delivery. After completion of construction, the Project would not generate any additional traffic to the area other than routine, periodic maintenance visits.

Radio-signal emissions from the proposed equipment after installation on the Site would not exceed the total radio-frequency ("RF") electromagnetic power density level permitted by the Federal Communications Commission ("FCC"). To ensure compliance with the applicable standard, the Company commissioned C Squared Systems to conduct RF power density calculations for the Project using site-specific data and the methodology prescribed by the FCC's Office of Engineering and Technology Bulletin No. 65, Edition 97-01 (August 1997). The calculations indicate that the cumulative power density level for the Project would increase current levels by 0.11% to a total of 8.99% of the FCC Standard for public exposure to RF emissions. Please refer to Attachment 6, *Calculated Radio Frequency Emissions Report*, dated November 22, 2017.

5) Visual

The Project would not result in a substantial change to existing conditions nor would it alter the current viewshed footprint of the Existing Facility. The Existing Facility is a ±152-foot monopole that includes several wireless communications antennas[10] for multiple carriers. Due to its remote location and the topography and dense mature tree canopy in the surrounding area, the monopole is not highly visible today. The proposed Eversource antenna would be installed at the top of the monopole and would extend approximately 20 feet above the tower. The outer diameter of the whip antenna would be 1.5 inches and as such, would not be easily visible beyond the immediate area of the Site. The Project would also include a small expansion of the existing equipment compound and the installation of a new equipment shelter, emergency back-up generator and propane tank. Views of the proposed modifications to the equipment area would be limited to the Site itself as the compound would be surrounded by undeveloped wooded areas. As a result, the Project would not have an adverse visual impact on the environment or character of the community.

For a visual comparison of the Existing Facility and the proposed modifications, please refer to the *Photo-Simulations* in Attachment 7.

[10] The overall height of the Existing Facility with appurtenances is ±154.5 feet AGL.

6) Historical and Archaeological Resources

A review of relevant historic and archaeological information was conducted to determine whether the Project area holds potential historical and/or archaeological significance.

No Historic Properties[11] previously listed or deemed eligible for the National Register of Historic Places were identified within the Area of Potential Effect ("APE" - 0.5 mile) for Direct or Visual Effects. A review of cultural resources on file with the Connecticut State Historic Preservation Office ("SHPO") revealed that no previously recorded archaeological sites have been identified on the Site or within the APE. It is evident that the Project area has been thoroughly disturbed and no intact soils remain. Thus, this area retains no potential to yield intact prehistoric or historic period cultural deposits.

This information was documented in a Preliminary Archaeological Assessment report prepared by Heritage Consultants, LLC and submitted with a Project Review Request to the SHPO. The SHPO responded to the Company's submission on October 25, 2017 with the determination that "no historic properties will be affected". A copy of the SHPO's response is included in Attachment 8.

7) Forests and Parks

The Site contains no publicly accessible areas of recreation or public interest administered by any federal, state, local, or private agencies.

8) Noise

A Noise Evaluation Report was prepared for the Project by HMB Acoustics LLC of Avon, Connecticut. Based on sound measurements obtained at the Site and adjacent locations, the average levels range from 26 to 38 dBA[12]. A copy of the Noise Evaluation Report is included in Attachment 9, *Noise Evaluation Report*.

[11] The Nationwide Programmatic Agreement defines a "Historic Property" as "Any prehistoric or historic district, site, building, structure, or object included in, or eligible for inclusion in, the National Register maintained by the Secretary of the Interior. This term includes artifacts, records, and remains that are related to and located within such properties. The term includes properties of traditional religious and cultural importance to an Indian tribe or NHO that meet the National Register criteria."

[12] Sound measurements obtained on July 28, 2017 by HMB Acoustics LLC, of Avon, Connecticut. The Town of Coventry does not currently have a noise ordinance or guidelines but the results of the Noise Evaluation are below standards set forth by the Connecticut Department of Energy & the Environment for a Class A Noise Zone (§ 22a-69-3.5(c) Noise Zone Standards Residential – 55 dBA day – 45 dBA night).

G. Municipal Outreach

The Coventry Town Manager was briefed and provided a copy of the tower share application for the shared use on an existing wireless telecommunications facility (located at Riley Mountain Road, Coventry, Connecticut). Eversource also provided a copy of the tower share application to the underlying property owner as required per the Tower Share Application Guide.

H. Colocation Feasibility

Eversource has entered into a tower share lease agreement with Crown Castle for the shared use of the existing facility. See Attachment 10, *Tower Share Lease Agreement.*

I. Schedule

The Project would begin as soon as practical after issuance of the requested approval by the Council and construction would be less than two months in duration. Eversource anticipates that construction would be completed by the end of the fourth quarter of 2018.

J. Conclusion

CGS Section §16-50aa[13] indicates that no Certificate of Environmental Compatibility and Public Need is needed for proposed sharing of an existing telecommunications facility. Based on the information provided herein, the proposed shared use of the Existing Facility satisfies the criteria stated in CGS §16-50aa. Eversource respectfully submits that the proposed installation of the whip antenna and ground equipment at this existing telecommunications facility would be technically, legally, environmentally, and economically feasible while preventing the unnecessary addition of towers in Connecticut. Therefore, Eversource respectfully requests that the Council issues an order approving the proposed shared use.

[13] Regulations of Connecticut State Agencies ("RCSA") §§16-50j-88 to 16-50j-90 also apply.

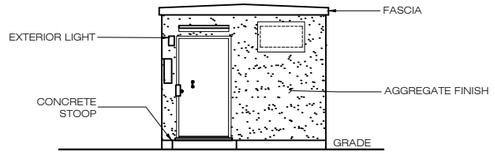
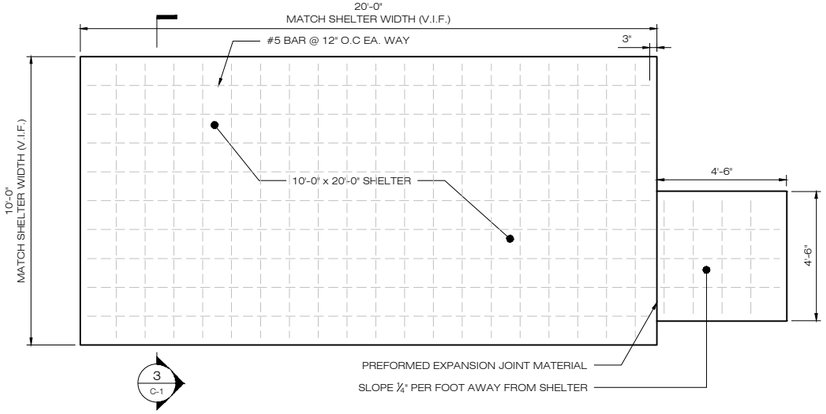
MODEL # RCS10201-00100-015
(RELOCATED FROM AN EXISTING SITE)



NORTH ELEVATION

1 C-1 EQUIPMENT SHELTER ELEVATIONS

SCALE : 3/16" = 1'-0"



2 C-1 TYPICAL FOUNDATION PLAN

SCALE : N.T.S.

CONCRETE FOUNDATION NOTES:

1. SLAB ON GRADE FOUNDATION DESIGN CONFORMS TO THE REQUIRMENTS OF THE 2012 INTERNATIONAL BUILDING CODE AS AMENDED BY THE 2016 CONNECTICUT STATE BUILDING CODE SUPPLEMENT SECTION 1809.5 'FROST PROTECTION AND SEI/ASCE STANDARD 32-01 SECTION 7.1 'SLAB ON GRADE CONSTRUCTION'.
2. FOUNDATION AREA SHALL BE EXCAVATED TO THE DEPTH AND DIMENSIONS SHOWN ON THE PLANS. EXISTING LEDGE AND ALL OTHER EXISTING UNSUITABLE MATERIAL SHALL BE REMOVED AND LEGALLY DISPOSED OF OFF-SITE. THE SUBGRADE SHALL BE ROLLED WITH A 1-TON, VIBRATORY, WALK-BEHIND ROLLER AT A SPEED OF LESS THAN 2 FPS, 6 PASSES MINIMUM, TO PROVIDE UNYIELDING SURFACE.
3. UNDERCUT SOFT OR "WEAVING" AREAS A MINIMUM OF 12 INCHES DEEP. BACKFILL UNDERCUT AREA WITH FILL MEETING THE SPECIFICATIONS OF STRUCTURAL FILL.
4. BEARING SHIMS, TIE-DOWN PLATES AND ASSOCIATED INSTALLATION ANCHORS PROVIDED WITH EXISTING SHELTER. CONTRACTOR SHALL VERIFY ALL SHIM & TIE DOWN QUANTITIES AND LOCATIONS WITH THE OWNER PRIOR TO PERFORMING FOUNDATION WORK.
5. ALL REINFORCING TO HAVE 2" MINIMUM CONCRETE COVER.
6. BAR REINFORCING TO BE ASTM A615 GRADE 60.
7. PER NEC REQUIRMENTS, THE REBAR IN FOUNDATION AMND FOOTING SHALL BE BONDED TO GROUND RING WITH A #2 AWG SOLID CONDUCTOR USING LISTED AND APPROVED METHODS.
8. CONCRETE TO HAVE A MINIMUM 28 DAY COMPRESSIVE STRENGTH (f'c)=3000 psi. CONCRETE TO BE AIR ENTRAINED, DESIRED AIR CONTENT TO BE 6% (PLUS OR MINUS 2%).
9. ALL CONCRETE MATERIALS AND WORKMANSHIP SHALL CONFORM TO LATEST EDITION OF ACI 318 BUILDING CODE, AND IBC 2009.
10. SLAB TO BE LEVEL 1/4"±.
11. TOP 8" OF FOUNDATION SIDES MUST BE FORMED FLAT TO ACCEPT TIE-DOWN PLATES.
12. CONTRACTOR TO VERIFY FINAL SHELTER DIMENSIONS PRIOR TO CONSTRUCTION OF FOUNDATION.
13. GRADE SHALL SLOPE AWAY FROM THE CONCRETE PAD TO ALLOW FOR PROPER WATER RUN OFF.
14. ANCHOR SHELTER TO FOUNDATION PER SHELTER MANUFACTURER'S RECOMMENDATIONS.

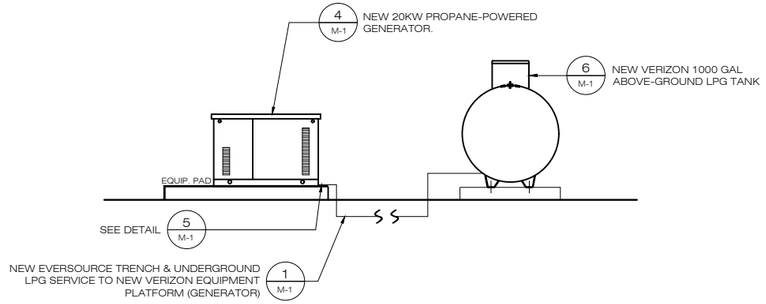
NOTES:
STEEL PIPE INSTALLED UNDERGROUND SHALL BE INSTALLED IN ACCORDANCE WITH NFPA54.
UNDERGROUND PIPING SHALL COMPLY WITH ONE OR MORE OF THE FOLLOWING:
1. THE PIPING SHALL BE MADE OF CORROSION RESISTANT MATERIAL THAT IS SUITABLE FOR BURIAL
2. PIPE SHALL HAVE A FACTORY APPLIED ELECTRICALLY INSULATING COATING. FITTINGS AND JOINTS BETWEEN SECTIONS OF COATED PIPE SHALL BE COATED IN ACCORDANCE WITH COATING MANUFACTURERS INSTRUCTIONS
3. THE PIPING SHALL HAVE A CATHODIC PROTECTION SYSTEM INSTALLED AND THE SYSTEM BE MAINTAINED.

1 M-1 PROPANE GAS TRENCH

SCALE : NTS



NOTES:
1. ALL VALVES USED IN METALLIC PIPING SYSTEMS MUST HAVE PRESSURE CONTAINING PARTS OF STEEL, DUCTILE (NODULAR) IRON, MALLEABLE IRON OR BRASS.
2. ALL MATERIALS USED, INCLUDING VALVE SEAT DISCS, PACKING, SEALS AND DIAPHRAGMS MUST BE RESISTANT TO THE ACTION OF LP GAS UNDER SERVICE CONDITIONS. MANY VALVES ARE LISTED BY INDEPENDENT TESTING LABORATORIES FOR USE IN LP GAS SERVICE. THESE CAN BE USED AS RECOMMENDED BY THE MANUFACTURER. OTHER VALVES CAN BE USED, BUT MUST COMPLY WITH THE REQUIREMENTS OF NFPA 58 AND SHOULD BE RECOMMENDED BY THE MANUFACTURER FOR LP GAS SERVICE TO BE SURE THAT ALL THE COMPONENT PARTS OF THE VALVE ARE APPROVED FOR LP GAS SERVICE.
3. VALVES USED WITH POLYETHYLENE PIPE AND TUBING MUST MEET THE REQUIREMENTS OF ASTM D2513 AND BE SO MARKED

GENERAL CONDITIONS

CODES:
2018 CONNECTICUT STATE BUILDING CODE, EIA/TIA 222G, et al, AS APPLICABLE.

IT IS THE CONTRACTORS SOLE RESPONSIBILITY TO COMPLY WITH ALL APPLICABLE FEDERAL, STATE AND LOCAL BUILDING CODES, PERMIT CONDITIONS AND SAFETY CODES DURING CONSTRUCTION.

THE ENGINEER IS NOT: A GUARANTOR OF THE INSTALLING CONTRACTORS WORK; RESPONSIBLE FOR SAFETY IN, ON OR ABOUT THE WORK SITE; IN CONTROL OF THE SAFETY OR ADEQUACY OF ANY BUILDING COMPONENT, SCAFFOLDING, OR OTHER RELATED WORK AIDS; OR RESPONSIBLE FOR SUPERINTENDING THE WORK.

THE CONTRACTOR IS RESPONSIBLE FOR PROVIDING ALL PERMITS, INSPECTIONS, TESTING AND CERTIFICATES NEEDED FOR LEGAL OCCUPANCY OF THE FINISHED PROJECT.

THE CONTRACTOR IS RESPONSIBLE TO REVIEW THIS COMPLETE PLAN SET AND VERIFY THE EXIST. CONDITIONS SHOWN IN THESE PLANS AS THEY RELATE TO HIS WORK PRIOR TO SUBMITTING PRICE. SIGNIFICANT DEVIATIONS FROM WHAT IS SHOWN AFFECTING THE WORK SHALL BE REPORTED IMMEDIATELY TO THE CONSTRUCTION MANAGER.

DETAILS INCLUDED IN THIS PLAN SET ARE TYPICAL AND APPLY TO SIMILAR CONDITIONS.

EXIST. ELECTRICAL AND MECHANICAL FIXTURES, PIPING, WIRING AND EQUIPMENT OBSTRUCTING THE WORK SHALL BE REMOVED AND/OR RELOCATED AS DIRECTED BY THE CONSTRUCTION MANAGER. TEMPORARY SERVICE INTERRUPTIONS MUST BE COORDINATED WITH OWNER.

THE CONTRACTOR SHALL DILIGENTLY PROTECT THE EXIST. BUILDING/SITE CONDITIONS AND THOSE OF ANY ADJOINING BUILDINGS/SITES AND RESTORE ANY DAMAGE CAUSED BY HIS ACTIVITIES TO THE PRECONSTRUCTION CONDITION.

THE CONTRACTOR SHALL SAFEGUARD AGAINST: CREATING A FIRE HAZARD, AFFECTING TENANT EGRESS OR COMPROMISING BUILDING/SITE SECURITY MEASURES.

THE CONTRACTOR SHALL REMOVE ALL DEBRIS AND CONSTRUCTION WASTE FROM THE SITE EACH DAY. WORK AREAS SHALL BE SWEPT AND MADE CLEAN AT THE END OF EACH WORK DAY.

ALL MATERIALS LEFT ON A ROOF SHALL BE ADEQUATELY TIED DOWN SO AS NOT TO CREATE A SAFETY HAZARD CAUSED BY WIND.

THE CONTRACTORS HOURS OF WORK SHALL BE IN ACCORDANCE WITH LOCAL CODES AND ORDINANCES AND BE APPROVED BY OWNER.

THE CONTRACTOR SHALL IMMEDIATELY NOTIFY THE CONSTRUCTION MANAGER IF ASBESTOS IS ENCOUNTERED DURING THE EXECUTION OF HIS WORK. THE CONTRACTOR SHALL CEASE ALL ACTIVITIES WHERE THE ASBESTOS MATERIAL IS FOUND UNTIL NOTIFIED BY THE CONSTRUCTION MANAGER TO RESUME HIS OPERATIONS.

THERMAL & MOISTURE PROTECTION

FIRESTOP

ALL PENETRATIONS FOR ELECTRICAL CONDUITS OR WAVEGUIDE CABLING THROUGH BUILDING WALLS, FLOORS AND CEILINGS SHALL BE FIRESTOPPED WITH ACCEPTED MATERIALS TO MAINTAIN THE FIRE RATING OF THE EXIST. ASSEMBLY. ALL FILL MATERIAL SHALL BE SHAPED, FITTED AND PERMANENTLY SECURED IN PLACE. FIRESTOPPING SHALL BE INSTALLED IN ACCORD WITH ASTM E814.

HILTI CP620 FIRE FOAM or 3M FIRE BARRIER FILL, VOID OR CAVITY MATERIAL OR ACCEPTED EQUAL SHALL BE APPLIED IN ACCORDANCE WITH MANUFACTURER'S RECOMMENDATIONS AND ASSOCIATED UNDERWRITERS LABORATORIES (UL) SYSTEM NUMBER.

FIRESTOPPING SHALL BE APPLIED AS SOON AS PRACTICABLE AFTER PENETRATIONS ARE MADE AND EQUIPMENT INSTALLED.

FIRESTOPPED PENETRATIONS SHALL BE LEFT EXPOSED AND MADE AVAILABLE FOR INSPECTION BEFORE APPLYING FINISHES CONCEALING SUCH PENETRATION. FIRESTOPPING MATERIAL CERTIFICATES SHALL BE MADE AVAILABLE AT THE TIME OF INSPECTION.

MOISTURE PROTECTION

ANY BUILDING ROOF PENETRATION AND/OR RESTORATION SHALL BE PERFORMED SO THAT ROOF WARRANTY IN PLACE IS NOT COMPROMISED. CONTRACTOR SHALL ARRANGE FOR OWNERS ROOFING CONTRACTOR TO PERFORM ANY AND ALL ROOFING WORK IF SO REQUIRED BY EXIST. ROOF WARRANTY. OTHERWISE, ROOF SHALL BE MADE WATERTIGHT WITH LIKE CONSTRUCTION AS SOON AS PRACTICABLE AND AT COMPLETION OF CONSTRUCTION.

ALL PENETRATIONS INTO AND/OR THROUGH BUILDING EXTERIOR WALLS SHALL BE SEALED WITH SILICONE SEALER

CONCRETE

ALL CONCRETE CONSTRUCTION SHALL BE DONE IN ACCORD WITH AMERICAN CONCRETE INSTITUTE (ACI) CODES 301 & 318, LATEST REVISION.

TOWER FOUNDATION WORK SHALL BE IN ACCORDANCE WITH TOWER MANUFACTURER'S DESIGNS AND SPECIFICATIONS.

ALL CONCRETE USED SHALL BE 4000 PSI (28 DAY COMP STRENGTH). THE CONCRETE MIX SHALL BE BASED ON USING THE FOLLOWING MATERIALS AND PARAMETERS:
PORTLAND CEMENT: ASTM C150, T1
AGGREGATE: ASTM C33, 1 INCH MAX
WATER POTABLE
ADMIXTURE: NON-CHLORIDE
AIR 6%*
SLUMP: 4 INCH
UNLESS NOTED OTHERWISE
*ALL CONCRETE EXPOSED TO FREEZING WEATHER SHALL CONTAIN ENTRAINED AIR PER ACI 211 TABLE 4.2.1 OF ACI 318-95.

ALL REINFORCING STEEL SHALL BE ASTM A615, GR 60 (DEFORMED) UNLESS NOTED OTHERWISE. WELDED WIRE FABRIC SHALL CONFORM TO ASTM A185 WELDED STEEL WIRE FABRIC UNLESS NOTED OTHERWISE. SPLICES SHALL BE CLASS 'B' AND ALL HOOKS SHALL BE ACI STANDARD UNO. REINFORCING BARS SHALL BE COLD BENT WHERE REQUIRED AND TIED (NOT WELDED).

THE FOLLOWING MINIMUM CONCRETE COVER SHALL BE PROVIDED FOR REINFORCING STEEL UNLESS SHOWN OTHERWISE ON DRAWINGS:
CONCRETE CAST AGAINST EARTH = 3 IN.
CONCRETE EXPOSED TO EARTH OR WEATHER:
#6 AND LARGER = 2 IN.
#5 AND SMALLER = 1 1/2 IN.
CONCRETE NOT EXPOSED TO EARTH OR WEATHER OR NOT CAST AGAINST THE GROUND:
SLAB AND WALL = 3/4 IN.
BEAMS AND COLUMNS = 1 1/2 IN.

A 3/4 IN. CHAMFER SHALL BE PROVIDED AT ALL EXPOSED EDGES OR CONCRETE, UNO, IN ACCORDANCE WITH ACI 301 SECTION 4.2.4.

CONCRETE SHALL BE PLACED IN A UNIFORM MANNER AND CONSOLIDATED IN PLACE.

CONCRETE FOOTINGS SHALL BE CAST AGAINST LEVEL, COMPACTED, NON-FROZEN BASE SOIL FREE OF STANDING WATER.

STEEL

MATERIALS:
WIDE FLANGE ASTM A992
TUBING ASTM A500, GR B
PIPE ASTM A53, GR B
BOLTS ASTM A325
GRATING TYPE GW (1-1/4"x3/16" BARS)
MISC. METALS ASTM A36
ALL STEEL SHAPES SHALL BE HOT-DIPPED GALVANIZED IN ACCORDANCE WITH ASTM A123 WITH A COATING WEIGHT OF 2 OZ/SF.

DESIGN, FABRICATION AND ERECTION OF STRUCTURAL STEEL SHALL CONFORM TO CURRENT AMERICAN INSTITUTE OF STEEL CONSTRUCTION SPECIFICATIONS.

THE STEEL STRUCTURE IS DESIGNED TO BE SELF-SUPPORTING AND STABLE AFTER COMPLETION. IT IS THE CONTRACTORS SOLE RESPONSIBILITY TO DETERMINE ERECTION PROCEDURE AND SEQUENCE AND TO INSURE THE SAFETY OF THE BUILDING AND ITS COMPONENT PARTS DURING ERECTION.

SHOP DRAWINGS ARE TO BE CHECKED BY THE CONTRACTOR AND SUBMITTED TO THE ENGINEER FOR APPROVAL PRIOR TO FABRICATION.

ALL STEEL ELEMENTS SHALL BE INSTALLED PLUMB AND LEVEL.

TOWER MANUFACTURER'S DESIGNS SHALL PREVAIL FOR TOWER.

CONNECTIONS:

CONNECTIONS SHALL BE DESIGNED BY THE FABRICATOR AND CONSTRUCTED IN ACCORDANCE WITH THE LATEST EDITION OF THE AISC MANUAL OF STEEL CONSTRUCTION. CONNECTIONS SHALL BE PROVIDED TO CONFORM TO THE REQUIREMENTS OF TYPE 2 CONSTRUCTION UNLESS OTHERWISE DETAILED.

DESIGN CONNECTIONS AT BEAM ENDS FOR 10 KIPS (MIN).

CONNECTIONS SHALL BE MADE USING 3/4" ASTM A325 BOLTS (SNUG TIGHT OR SLIP CRITICAL) OR WELDS. IF TENSION CONTROL BOLTS ARE USED, CONNECTIONS SHALL BE DESIGNED FOR SLIP CRITICAL BOLT ALLOWABLE LOAD VALUES.

USE THE LARGER OF 1/4" FILLET WELDS OR MINIMUM SIZE PER AISC REQUIREMENTS WHERE NO WELD SIZE IS SHOWN ON THE DRAWINGS.

ALL ARC AND GAS WELDING SHALL BE DONE BY A LICENSED AND CERTIFIED WELDER IN ACCORDANCE WITH AMERICAN WELDING SOCIETY.

ALL WELDING SHALL BE DONE USING E70XX ELECTRODES AND WELDING SHALL CONIFORM TO AISC AWS D1.1. UPON THE COMPLETION OF WELDING, ALL DAMAGE TO GALVANIZED COATING SHALL BE REPAIRED.

USE PRECAUTIONS AND PROCEDURES PER AWS D1.1 WHEN WELDING GALVANIZED METALS.

TOUCH-UP ALL DAMAGED GALVANIZED STEEL WITH COLD-ZINC, "GALVANOX-", "DRY GALV-" "ZINC-IT-" OR APPROVED EQUAL, IN ACCORDANCE WITH MANUFACTURERS GUIDELINES. TOUCH-UP DAMAGED NON-GALVANIZED STEEL WITH SAME PAINT APPLIED IN SHOP OR FIELD.

ANCHORS:

EXPANSION ANCHORS SHALL BE USED WHERE ATTACHING TO CONCRETE. MASONRY MOUNTS SHALL HAVE INJECTION ADHESIVE ANCHORING.

EXPANSION BOLTS SHALL BE HILTI KWIK BOLT III OR APPROVED EQUAL, MINIMUM EMBEDMENT 4 INCHES.

INJECTION ADHESIVE ANCHORING IN MASONRY WITH VOIDS SHALL BE HILTI HIT HY-20 OR EQUAL WITH THREADED ROD AND SCREEN TUBES TO THE FOLLOWING BASE MATERIALS.

BRICK WITH HOLES:
SPACE ANCHORS 2 COMPLETE BRICKS APART MINIMUM.
MAINTAIN 2 COMPLETE BRICKS OR 16 INCHES FROM FREE EDGES (WHICHEVER IS LESS).
EMBEDMENT: 3-1/2 INCHES MINIMUM

HOLLOW CONCRETE BLOCK:
USE 50% MORE ANCHORS THAN SHOWN IN DETAIL SPACING: ONE ANCHOR MAXIMUM PER BLOCK CELL.
MAINTAIN 12" SPACING FROM FREE EDGES
EMBEDMENT: THROUGH FACE

INJECTION ADHESIVE ANCHORING IN SOLID MASONRY AND GROUT FILLED BLOCK SHALL BE HILTI HIT HY-200 OR EQUAL WITH THREADED ROD. MAINTAIN 12 INCHES BETWEEN ANCHORS AND ALL FREE EDGES. MINIMUM SPACING BETWEEN ANCHORS IS 8 INCHES.

ANCHORS SHALL BE INSTALLED PER MANUFACTURER'S RECOMMENDATIONS AND SHALL NOT BE INSTALLED IN MORTAR JOINTS

GRATING SHALL BE ATTAQHED USING FOUR GRATING CLAMPS OR 1/4" FILLET WELDS PER SECTION.

SITE GENERAL

CONTRACTOR SHALL FOLLOW CONDITIONS OF ALL APPLICABLE PERMITS AND WORK IN ACCORD WITH OSHA REGULATIONS.

THESE PLANS DEPICT KNOWN UNDERGROUND STRUCTURES, CONDUITS AND/OR PIPELINES. THE LOCATIONS FOR THESE ELEMENTS ARE BASED UPON VARIOUS RECORD DRAWINGS AVAILABLE. THE CONTRACTOR IS HEREBY ADVISED THAT THESE DRAWINGS MAY NOT ACCURATELY DEPICT AS-BUILT LOCATIONS AND OTHER UNKNOWN STRUCTURES. THE CONTRACTOR SHALL THEREFORE DETERMINE THE EXACT LOCATION OF EXIST. UNDERGROUND ELEMENTS AND EXCAVATE WITH CARE AFTER CALLING MARKOUT SERVICE AT 1-800-272-4480 48 HOURS BEFORE DIGGING, DRILLING OR BLASTING.

ALL EXIST. ACTIVE SEWER, WATER, GAS, ELECTRIC, FIBER OPTIC, AND OTHER UTILITIES WHERE ENCOUNTERED IN THE WORK, SHALL BE PROTECTED AT ALL TIMES, AND WHERE REQUIRED FOR THE PROPER CONSTRUCTION OF THE WORK, SHALL BE RELOCATED AS DIRECTED BY ENGINEERS. EXTREME CAUTION SHOULD BE USED BY THE CONTRACTOR WHEN EXCAVATION OR PIER DRILLING AROUND OR NEAR UTILITIES. CONTRACTOR SHALL PROVIDE SAFETY TRAINING FOR THE WORKING CREW. THIS WILL INCLUDE, BUT NOT BE LIMITED TO A) FALL PROTECTION, B) CONFINED SPACE ENTRY, C) ELECTRICAL SAFETY, AND D) TRENCHING & EXCAVATION.

IF NECESSARY, RUBBISH, STUMPS, DEBRIS, STICKS, STONES, AND OTHER REFUSE SHALL BE REMOVED FROM THE SITE AND DISPOSED OF LEGALLY.

ALL EXIST. INACTIVE SEWER, WATER, GAS, ELECTRIC, FIBER OPTIC, OR OTHER UTILITIES, WHICH INTERFERE WITH THE EXECUTION OF THE WORK, SHALL BE REMOVED, AND/OR CAPPED, PLUGGED OR OTHERWISE DISCONTINUED AT POINTS WHICH WILL NOT INTERFERE WITH THE EXECUTION OF THE WORK, SUBJECT TO THE APPROVAL OF THE CONSTRUCTION MANAGER.

CONTRACTOR IS RESPONSIBLE FOR REPAIRING OR REPLACING STRUCTURES OR UTILITIES DAMAGED BY HIS OPERATIONS.

CONTRACTOR SHALL PROTECT EXIST. PAVED AND GRAVEL SURFACES, CURBS, LANDSCAPE AND STRUCTURES AND RESTORE SITE TO PRECONSTRUCTION CONDITION WITH AS GOOD, OR BETTER, MATERIALS. NEW MATERIALS SHALL MATCH EXIST. THICKNESS AND TYPE.

THE CONTRACTOR SHALL SHORE ALL TRENCH EXCAVATION GREATER THAN 5 FEET IN DEPTH OR LESS WHERE SOIL CONDITIONS ARE DEEMED UNSTABLE. ALL SHEETING AND/OR SHORING METHODS SHALL BE DESIGNED BY A PROFESSIONAL ENGINEER.

THE CONTRACTOR IS RESPONSIBLE FOR MANAGING GROUNDWATER LEVELS IN THE VICINITY OF EXCAVATIONS TO PROTECT ADJACENT PROPERTIES AND NEW WORK. GROUNDWATER SHALL BE DRAINED IN ACCORDANCE WITH LOCAL SEDIMENTATION & EROSION CONTROL GUIDELINES.

EXCAVATION

CONTRACTOR SHALL GRADE ONLY AREAS SHOWN TO BE MODIFIED HEREIN AND ONLY TO THE EXTENT REQUIRED TO SHED OVERLAND WATER FLOW AWAY FROM SITE. ALL NEW SLOPES SHALL NOT BE STEEPER THAN 3:1 (HORIZ:VERTICAL), UNO. SEDIMENTATION AND EROSION CONTROLS SHOWN AND SPECIFIED SHALL BE ESTABLISHED BEFORE STRIPPING EXIST. VEGETATION.

ORGANIC MATERIAL AND DEBRIS SHALL BE STRIPPED AND STOCKPILED BEFORE ADDING FILL MATERIAL.

NO FILL OR EMBANKMENT MATERIAL SHALL BE PLACED ON FROZEN GROUND. FROZEN MATERIAL, SNOW OR ICE SHALL NOT BE PLACED IN ANY FILL OR EMBANKMENT.

ALL FILL SHALL BE PLACED IN ONE FOOT LIFTS AND COMPACTED IN PLACE. STRUCTURAL FILL SHALL BE COMPACTED TO 95% OF ITS MAXIMUM DRY UNIT WEIGHT TESTED IN ACCORDANCE WITH ASTM D1557.

EXCAVATIONS FOR FOOTINGS SHALL BE CUT LEVEL TO THE REQUIRED DEPTH AND TO UNDISTURBED SOIL. REPORT UNSUITABLE SOIL CONDITIONS TO THE CONSTRUCTION MANAGER.

TRENCH EXCAVATIONS SHALL BE BACKFILLED AT THE END OF EACH DAY.

SURPLUS MATERIAL SHALL BE REMOVED FROM THE SITE.

TOWER FOUNDATION EXCAVATION, BACKFILL AND COMPACTION SHALL BE IN ACCORD WITH TOWER MANUFACTURER'S DESIGNS AND SPECIFICATIONS.

MATERIAL

NATIVE GRAVEL MATERIAL MAY BE USED FOR TRENCH BACKFILL WHERE SELECT MATERIAL IS NOT SPECIFIED. GRAVEL MATERIAL FOR CONDUIT TRENCH BACKFILL SHALL NOT CONTAIN ROCK GREATER THAN 2 INCHES IN DIAMETER.

BANK OR CRUSHED GRAVEL SHALL CONSIST OF TOUGH, DURABLE PARTICLES OF CRUSHED OR UNCRUSHED GRAVEL FREE OF SOFT, THIN, ELONGATED OR LAMINATED PIECES AND MEET THE GRADATION.

PROCESSED AGGREGATE BASE SHALL CONSIST OF COURSE AND FINE AGGREGATES COMBINED AND MIXED SO THAT THE RESULTING MATERIAL CONFORMS TO THE GRADATION. COURSE AGGREGATE SHALL BE EITHER GRAVEL OR BROKEN STONE AND FINE AGGREGATE SHALL CONSIST OF SAND.

SQUARE MESH SIEVES	PERCENT PASSING BY WEIGHT BANK GRAVEL FILL	BANK GRAVEL BASE	PROCESSED AGG BASE
PASS 5"		100	
PASS 3-1/2"		100	90-100
PASS 2-1/4"		100	
PASS 2"		95-100	
PASS 1-1/2"		55-100	55-95
PASS 1"			
PASS 3/4"			50-75
PASS 1/4"	25-60	25-60	25-45
PASS #10	15-45	15-45	
PASS #40	2-25	5-25	5-20
PASS #100	0-10	0-10	2-12
PASS #200	0-5	0-5	

FILL MATERIAL SHALL BE FREE OF ORGANIC MATERIAL, ICE, TRASH AND DEBRIS.

SEDIMENTATION & EROSION CONTROL

CONTRACTOR SHALL MINIMIZE DISTURBANCE TO EXIST. SITE DURING CONSTRUCTION. EROSION CONTROL MEASURES, IF REQUIRED DURING CONSTRUCTION, SHALL BE IN CONFORMANCE WITH THE LOCAL GUIDELINES FOR EROSION AND SEDIMENTATION CONTROL.

LIMITS OF CLEARING AND GRUBBING SHALL BE CLEARLY MARKED BEFORE COMMENCING WITH SUCH WORK.

SEDIMENTATION AND EROSION CONTROL (SEC) MEASURES SHOWN SHALL BE INSTALLED PRIOR TO LAND CLEARING, EXCAVATION OR GRADING OPERATIONS. REQUIREMENTS OF LOCAL WETLAND AGENCY SHALL BE MET PRIOR TO EARTHWORK OPERATIONS.

IT IS THE CONTRACTORS RESPONSIBILITY TO MAINTAIN SEC MEASURES THROUGHOUT DURATION OF PROJECT UNTIL DISTURBED LAND IS THOROUGHLY VEGETATED.

FAILURE OF THE SEC SYSTEMS SHALL BE CORRECTED IMMEDIATELY AND SUPPLEMENTED WITH ADDITIONAL MEASURES AS NEEDED.

TOPSOIL SHALL BE SPREAD TO FINISH GRADES AND SEEDED AS SOON AS FINISHED GRADES ARE ESTABLISHED. STRAW MULCH, JUTE NETTING OR MATS SHALL BE USED WHERE THE NEW SEED IS PLACED.

VEGETATIVE SEEDING -
AREA TO BE SEEDED SHALL BE LOOSE AND FRIABLE TO A DEPTH OF 3". TOPSOIL SHALL BE LOOSENED BY RAKING OR DISKING BEFORE SEEDING. APPLY 50 Lbs. OF DOLOMITIC LIMESTONE AND 25 Lbs. OF 10-10-10 FERTILIZER PER 1000 SF. HARROW LIME AND FERTILIZER INTO LOOSE SOIL.
APPLY COMMON BERMUDA AND RYE GRASS AT 50 Lbs/ACRE. USE CYCLONE SEED DRILL, CULTIPACKER SEEDER OR HYDROSEEDER (SEED & FERTILIZER SLURRY) FOR STEEP SLOPES. IRRIGATE UNTIL VEGETATION IS COMPLETELY ESTABLISHED.

HVAC GENERAL NOTES AND SPECIFICATIONS:

ALL WORK SHALL COMPLY WITH AND BE INSTALLED IN ACCORDANCE WITH ALL CODES HAVING JURISDICTION OVER THE WORK.

CONTRACTOR SHALL VERIFY EXACT LOCATION OF ALL EXIST. EQUIPMENT AND PIPING IN FIELD PRIOR TO BID, FABRICATION AND INSTALLATION OF ANY WORK.

PIPING SHOWN ON PLANS IS DIAGRAMMATIC. EXACT ROUTING OF NEW PIPING SHALL BE DETERMINE IN THE FIELD.

THE WORDS PROVIDE OR INSTALL, SHALL MEAN FURNISH AND INSTALL.

THE GENERAL CONTRACTOR SHALL PROVIDE ALL CUTTING AND PATCHING AS REQUIRED FOR THE INSTALLATION OF HIS WORK.

THIS CONTRACTOR SHALL BE RESPONSIBLE FOR THE PROTECTION OF HIS WORK AND NEWLY INSTALLED OR EXIST. WORK, INCLUDING PROTECTION OF THE BUILDING OCCUPANTS, PUBLIC AND PERSONNEL, PROVIDE APPROPRIATE BARRIERS, AND SAFETY GUARDS AS REQUIRED.

LIMIT THE SPREAD OF DUST WHEN CUTTING BY INSTALLING BARRIERS TO CONTAIN AIRBORNE MATERIALS.

ANY DISRUPTION IN BUILDING SERVICES SHALL BE KEPT TO A MINIMUM AND SHALL NOT BE IMPLEMENTED WITHOUT RECEIVING PRIOR WRITTEN APPROVAL OF THE FACILITIES DIRECTOR.

ALL WORK SHALL BE COORDINATED WITH ALL TRADES AND WITH THE FACILITIES DIRECTOR RELATED TO THE INSTALLATION OF THIS PROJECT.

THE CONTRACTOR SHALL TURN OVER TO THE OWNER AT THE TIME OF COMPLETION OF ALL WORK, THREE COPIES OF THE OPERATING, MAINTENANCE AND INSTRUCTION MANUALS WHICH SHALL INCLUDE ALL EQUIPMENT BROCHURES, PIPING AND WIRING DIAGRAMS, DRAWINGS, TEMPERATURE CONTROLS, AND START-UP AND SHUTDOWN PROCEDURES OF ALL NEW EQUIPMENT INSTALLED.

THE CONTRACTOR SHALL FILE FOR ALL PERMITS AND PAY ALL FEES REQUIRED FOR THE INSTALLATION OF HIS WORK.

THE CONTRACTOR SHALL GUARANTEE ALL MATERIAL AND WORK INSTALLED BY HIM TO BE FREE OF DEFECTS AND WORKMANSHIP FOR A PERIOD OF ONE YEAR, AFTER ACCEPTANCE OF THE INSTALLATION BY THE ENGINEER AND OWNER.

THE CONTRACTOR SHALL PROVIDE ALL RIGGINGS, HOISTING AND SCAFFOLDING AS REQUIRED FOR THE INSTALLATION OF HIS WORK.

ALL WORK SHALL BE PERFORMED BY LICENSED CONTRACTORS IN THE TRADE HAVING JURISDICTION.

ANY DEVIATION OR CHANGE IN DESIGN SHALL NOT BE MADE WITHOUT WRITTEN APPROVAL OF THE ENGINEER OR OWNER.

PATCHING OF WALLS SHALL MATCH EXIST. SURROUNDING AREA IN ALL RESPECTS. ALL REMOVED MATERIAL AND RUBBISH SHALL BE REMOVED FROM THE PREMISES DAILY IN AN APPROVED SAFE MANNER.

THIS CONTRACTOR SHALL SUBMIT SHOP DRAWINGS OF ALL EQUIPMENT AND MATERIALS INCLUDING CONTROL WIRING DIAGRAMS TO THE ENGINEER FOR APPROVAL PRIOR TO THE FABRICATIONS AND INSTALLATION OF WALLS, FLOORS, DUCTWORK, ETC. WITH ELEVATIONS AT WHICH NEW WORK IS TO BE INSTALLED. ANY DEVIATION IN DESIGN SHALL NOT BE MADE WITHOUT WRITTEN APPROVAL OF THE ENGINEER OR OWNER.

THE CONTRACTOR SHALL MAINTAIN ON THE JOB SITE A SET OF SHOP DRAWINGS IN WHICH ANY DEVIATIONS FROM THE ORIGINAL DESIGN SHALL BE NOTED.

PROVIDE SLEEVES FOR AND PIPING PASSING THROUGH PARTITIONS, FLOOR OR MASONRY WALL PACK SLEEVE AROUND DUCT WITH APPROVED FIRE RATED MATERIAL. SLEEVES SHALL BE 18 GAGE GALVANIZED SHEET STEEL. SEAL ALL SLEEVES WEATHERTIGHT THROUGH EXTERIOR WALLS.

SUSPEND AND SUPPORT ALL NEW DUCTWORK AND PIPING FROM BUILDING STRUCTURE ONLY.

DUCTWORK SHALL BE FABRICATED AND INSTALLED ACCORDING TO NEW STATE CODES AND SMACNA LOW PRESSURE FLEXIBLE AND METAL DUCT STANDARDS LATEST EDITION. PROVIDE VOLUME DAMPERS WITH LOCKING QUADRANT AS INDICATED ON THE PLANS. DUCTWORK SHALL BE GALV. SHEET METAL.

PROVIDE SUPPORT STEEL AS REQUIRED FOR DUCTWORK.

ALL WIRING OF FANS, ALARMS, ETC. SHALL BE PROVIDED BY THE ELECTRICAL CONTRACTOR UNDER SUPERVISION OF THE HVAC CONTRACTOR.

COAT ALL SUPPORT STEEL EXPOSED TO WEATHER WITH 2 COATS OF RUST INHIBITING PAINT.

ALL EQUIPMENT SHALL BE INSTALLED IN ACCORDANCE WITH MANUFACTURERS RECOMMENDATIONS.

ALL SUPPLY DUCTWORK SHALL BE INSULATED WITH FIBERGLASS INSULATION WITH FOIL FACE VAPOR BARRIER JACKET.

THE CONTRACTOR SHALL CAP ALL DUCTWORK AS SHOWN ON PLANS AND REMOVE ALL BRANCH DUCTWORK AND FLEXIBLE DUCTWORK AS SHOWN ON PLAN.

REMOVE ALL DUCTWORK AS SHOWN ON MECHANICAL REMOVAL PLAN INCLUDING, EGG CRATE GRILLES AND OTHER ASSOCIATED DEVICES.

THE FITOUT OF EXIST. BUILDING SPACE REQUIRES THE INSTALLATION OF AN AIR HANDLER WITHIN THE EQUIPMENT ROOM AND CONDENSER UNIT LOCATED ELSEWHERE AS SHOWN.

AIR HANDLER AND CONDENSER SHALL BE INSTALLED WITH VIBRATION ISOLATORS.

THE HVAC SYSTEM SHALL BE INSTALLED IN ACCORDANCE WITH THE MANUFACTURER'S RECOMMENDATIONS

ALUMINUM SUPPLY (ADJUSTABLE) AND RETURN GRILLES SHALL BE INSTALLED ON AIR HANDLER AS SHOWN

HVAC SYSTEM SHALL BE INTERFACED WITH SMOKE ALARM SHUTTING DOWN HVAC SYSTEM OPERATION IN THE EVENT OF ALARM

GROUNDING

MATERIALS:

#6 THWN SHALL BE STRANDED #6 COPPER WITH GREEN THWN INSULATION SUITABLE FOR WET INSTALLATIONS.

#2 THWN SHALL BE STRANDED #2 COPPER WITH THWN INSULATION SUITABLE FOR WET INSTALLATIONS.

#2 BARE TINNED SHALL BE SOLID COPPER TINNED. ALL BURIED WIRE SHALL MEET THIS CRITERIA.

FENCE GATE BONDING JUMPER SHALL BE 4/0 WELDING CABLE THAT HAS BEEN CRIMPED ON EACH END WITH A CAP FOR THE CADWELD™ PROCESS.

ALL LUGS SHALL BE 2-HOLE, LONG BARREL, TINNED SOLID COPPER UNLESS OTHERWISE SPECIFIED. LUGS SHALL BE THOMAS AND BETTS SERIES 548##tbe OR EQUIVALENT (I.E., #2 THWN - 54856BE; #2 SOLID - 54856BE; AND #6 THWN - 54852BE).

ALL HARDWARE, BOLTS, NUTS, WASHERS, AND BELLEVILLE WASHERS SHALL BE 18-8 STAINLESS STEEL. EVERY CONNECTION SHALL BE BOLT-FLAT WASHER-BUSS-LUG-FLAT WASHER-BELLEVILLE WASHER-NUT IN THAT EXACT ORDER. BACK-TO-BACK LUGGING, BOLT-FLAT WASHER- LUG- BUSS- LUG- FLAT WASHER- BELLEVILLE WASHER-NUT, IN THAT EXACT ORDER, IS ACCEPTED WHERE NECESSARY TO CONNECT MANY LUGS TO A BUSS BAR. STACKING OF LUGS, BUSS-LUG-LUG, IS NOT ACCEPTABLE.

WHERE CONNECTIONS ARE MADE TO STEEL OR DISSIMILAR METALS, A THOMAS AND BETTS DRAGON TOOTH WASHER MODEL DTW### SHALL BE USED BETWEEN THE LUG AND THE STEEL, BOLT-FLAT WASHER-STEEL-DRAGON TOOTH WASHER-LUG - FLAT WASHER- BELLEVILLE WASHER-NUT.

WATER PIPE CLAMPS SHALL BE CUSTOM MADE FROM BRASS. THE CLAMP SHALL COME IN CONTACT WITH A MINIMUM OF 4 LINEAR INCHES OF PIPE ON THE SERVICE SIDE OF THE MAIN. DRILL CLAMP TO ACCEPT A 2-HOLE 1/2 INCH HARDWARE AND TO MCM LUG.

ALL CONNECTIONS, INTERIOR AND EXTERIOR, SHALL BE MADE WITH THOMAS AND BETTS KPOR-SHIELD™. COAT ALL WIRES BEFORE LUGGING AND COAT ALL SURFACES BEFORE CONNECTING.

THE MINIMUM BEND RADIUS SHALL BE 8 INCHES FOR #6 WIRE AND SMALLER AND 12 INCHES FOR WIRE LARGER THAN #6.

GROUND RODS SHALL BE 5/8 IN STEEL, CLAD WITH A PURE COPPER JACKET OF NOT LESS THAN 0.0012 INCHES THICK, 10 FEET LONG. THE TOP OF GROUND RODS SHALL BE INSTALLED AT THE SAME DEPTH AS THE GROUND RING.

BELOW-GRADE GROUND RINGS SHALL BE BARE TINNED #2 SOLID COPPER WIRE, AS SPECIFIED. FOR ABOVE-GRADE INSTALLATIONS, THE USE OF THWN-INSULATED, CONTINUOUS GREEN COLOR, SOLID COPPER WIRE OR THWN, CONTINUOUS GREEN COLOR, STRANDED COPPER WIRE IS ACCEPTABLE.

ALL CONNECTIONS TO THE GROUND RING SHALL BE CADWELD™

THE GROUND RING SHALL BE WITHIN 12 TO 36 INCHES OF A PREFABRICATED EQUIPMENT SHELTER.

FOR A LAND SITE, THE GROUND RING SHALL BE BURIED AT LEAST 18 INCHES BELOW FINAL GRADE OR TO THE MINIMUM DEPTH REQUIRED BY LOCALLY ENFORCED CODES, REGULATIONS, AND ORDINANCES, WHICHEVER IS GREATER. THE TRENCH SHALL BE DUG WITH A BACK HOE WITH A MINIMUM 8 INCH BUCKET. USE OF A TRENCHER IS NOT ALLOWED. THE TRENCH SHALL BE DUG 6 INCHES BELOW THE REQUIRED WIRE DEPTH. THE BACK FILL SHALL BE POWER TAMPED BACK IN PLACE WITH A MAXIMUM OF 12 INCHES OF FILL BETWEEN LIFTS.

A GROUND ROD SHALL BE DRIVEN AT A MINIMUM OF EVERY 10 LINEAR WIRE FOOT INTERVAL (OR 1X THE LENGTH OF THE ROD) OF THE GROUND RING. THE RING SHALL BE CADWELD™ TO THE ROD.

BOND THE FENCE TO THE GROUND RING AT EACH CORNER, AND AT EACH GATE POST WITH #2 SOLID TINNED WIRE. CADWELD™ BOTH ENDS.

BOND EACH GATE TO THE GATE POST AT THE HINGED END WITH A GATE JUMPER AS SPECIFIED.

BOND EACH HORIZONTAL POLE/BRACE TO EACH OTHER AND TO EACH VERTICAL POLE THAT IS BONDED TO THE EXTERIOR GROUND RING.

GROUND KITS SHALL BE SOLID COPPER STRAP WITH #6 WIRE AND 2-HOLE COMPRESSION CRIMPED LUGS.

BOND THE SUPPORTING STRUCTURE FOR THE WAVEGUIDE BRIDGE TO THE EXTERIOR RING AT EACH END OF THE BRIDGE. EACH SECTION OF BRIDGE CANOPY SHALL BE BONDED TO ONE ANOTHER VIA CADWELD™ CONNECTION OF #2 TINNED WIRE.

FERROUS METAL CLIPS WHICH COMPLETELY SURROUND THE GROUNDING CONDUCTOR SHALL NOT BE USED.

GROUND BARS SHALL BE FURNISHED AND INSTALLED WITH PRE-DRILLED HOLE DIAMETERS AND SPACINGS. GROUND BARS SHALL NEITHER BE FIELD FABRICATED NOR NEW HOLES DRILLED. GROUND LUGS SHALL MATCH THE HOLE SPACING ON THE BAR. HARDWARE DIAMETER SHALL BE MINIMUM 3/8 INCH.

GROUNDING SOURCE RESISTANCE IS NOT TO EXCEED 5 OHMS. NOTIFY CONSTRUCTION MANAGER IF GROUNDING RESISTANCE LEVEL CAN NOT BE MET.

FOR ROOF TOP SHELTER SITES - A GROUND BAR SHALL BE LOCATED AT EACH ANTENNA SECTOR (AGB), AT END OF CABLE TRAY AT SHELTER (AGB), UNDER WAVEGUIDE PORT EXTERIOR (EGB) AND INTERIOR (MGB). BOTH THE AGB AT CABLE TRAY AND EGB ON SHELTER SHALL BE CONNECTED TO A GROUND RING LAID ON THE ROOF AROUND THE

KOHLER Power Systems

Multi-Fuel
LPG/Natural Gas

The Kohler® Advantage

- **High Quality Power**
  Kohler home generators provide advanced voltage and frequency regulation along with ultra-low levels of harmonic distortion for excellent generator power quality to protect your valuable electronics.
- **Extraordinary Reliability**
  Kohler is known for extraordinary reliability and performance and backs that up with a premium 5-year or 2000 hour limited warranty.
- **Perfect for Tight Lot Lines**
  Can be placed as close as 18 inches from your home or small business, providing installation flexibility even on smaller lots. *
- **Powerful Performance**
  Exclusive PowerBoost™ technology provides excellent starting power.*
- **Fast Response**
  Kohler generators restore power to your home quickly and reliably.
- **Quiet Operation**
  Kohler home generators provide quiet, neighborhood-friendly performance.

Standard Features

- **RDC2 Controller**
  - One digital controller manages both the generator set and transfer switch functions (with optional Model RXT transfer switch)
  - Designed for today's most sophisticated electronics
  - Electronic speed control responds quickly to varying household demand
  - Digital voltage regulation protects your sensitive electronics from harmonic distortion and unstable power quality
  - Two-line, backlit LCD display with adjustable contrast is easy to read, even in direct sunlight or low light
- **Kohler Command PRO Engine Features**
  - Kohler Command PRO® OHV engine with hydraulic valve lifters for reliable performance without routine valve adjustment or lengthy break-in requirements
  - Powerful, reliable air-cooled performance
  - Simple field conversion between natural gas and LPG fuels while maintaining emission certification
- **Aluminum Sound Enclosure and Skid**
  - Wind rated up to 181 mph
  - Weather-resistant cashmere textured finish
- **Designed for Easy Installation**
  - Hinged, locking roof
  - Fuel and electrical connections through the enclosure wall eliminate the need for stub-ups through the bottom
  - Load connection terminal block allows easy field wiring
  - Designed for outdoor installation only
- **Certifications**
  - Meets emission regulations for U.S. Environmental Protection Agency (EPA) with both natural gas and LPG **Note:** CARB does not regulate emergency standby generators with outputs less than 50 HP. Only the EPA standards apply.
  - UL 2200/cUL listed (60 Hz model)
  - CSA certification available (60 Hz model)
  - Accepted by the Massachusetts Board of Registration of Plumbers and Gas Fitters
- Approved for stationary standby applications in locations served by a reliable utility source.
- **Warranty**
  - 5-year/2000 hour warranty for on-grid (standby) applications in locations served by a reliable utility source

Generator Ratings

					Standby Ratings			
					Natural Gas		LPG	
Model	Voltage	Phase	Hz	Alternator	kW/kVA	Amps	kW/kVA	Amps
20RESD	120/240	1	60	2F7	18/18	75.0	20/20	83.3
	115/230	1	50	2F7	14/14	60.8	15/15	65.2

RATINGS: Standby ratings apply to installations served by a reliable utility source. All single-phase units are rated at 1.0 power factor. The standby rating is applicable to variable loads with an average load factor of 80% for the duration of the power outage. No overload capacity is specified at this rating. Ratings are in accordance with ISO-3046/1, BS5514, AS2789, and DIN 6271. GENERAL GUIDELINES FOR DERATING: *ALTITUDE*: Derate 4% per 305 m (1000 ft.) elevation above 153 m (500 ft.). *TEMPERATURE*: Derate 2% per 5.5°C (10°F) temperature increase above 16°C (60°F). Availability is subject to change without notice. The generator set manufacturer reserves the right to change the design or specifications without notice and without any obligation or liability whatsoever. Contact your local Kohler Co. generator distributor for availability.

* The required distance from a structure is dependent on state and local codes. Generator must be located away from doors, windows, and fresh air intakes. See the installation manual for guidelines.

Alternator Specifications

Alternator Specifications

Specifications	PowerBoost™ Generator 1-Phase
Manufacturer	Kohler
Output reconnectable	120/240
Type	2-Pole, Rotating Field
Leads, quantity	4
Voltage regulator	Digital
Insulation:	NEMA MG1-1.66
Material	Class H
Temperature rise	Class H
Bearing: quantity, type	1, Sealed Ball
Coupling	Direct
Amortisseur windings	Full
Voltage regulation, no-load to full-load RMS	±1.0%
One-step load acceptance	100% of Rating
Peak motor starting kVA @ 240 V:	
20RESD	40.5

Alternator Features

- Compliance with NEMA, IEEE, and ANSI standards for temperature rise
- Self-ventilated and drip-proof construction
- Windings are vacuum-impregnated with epoxy varnish for dependability and long life.
- Superior voltage waveform and minimum harmonic distortion from skewed alternator construction
- Digital voltage regulator with ±1.0% no-load to full-load RMS regulation
- Rotating-field alternator with static exciter for excellent load response
- Total harmonic distortion (THD) from no load to full load with a linear load is less than 5%

Displacement, cm^3 (cu. in.)	999 (61)
Bore and stroke, mm (in.)	90 x 78.5 (3.54 x 3.1)
Compression ratio	8.8:1
Main bearings: quantity, type	2, Parent Material
Rated RPM	
60 Hz	3600
50 Hz	3000
Max. engine power at rated rpm, kW (HP)	
LPG, 60 Hz	23.0 (30.9)
LPG, 50 Hz	20.0 (26.8)
Natural gas, 60 Hz	20.2 (27.1)
Natural gas, 50 Hz	16.8 (22.5)
Cylinder head material	Aluminum
Valve material	Steel/Stellite®
Piston type and material	Aluminum Alloy
Crankshaft material	Heat Treated, Ductile Iron
Governor: type	Electronic
Frequency regulation, no load to full load	Isochronous
Frequency regulation, steady state	±0.5%
Air cleaner type	Dry

Exhaust

Exhaust System	
Exhaust temperature exiting the enclosure at rated kW, dry, °C (°F)	260 (500)

Engine Electrical

Engine Electrical System	
Ignition system	Electronic, Capacitive Discharge
Starter motor rated voltage (DC)	12
Battery (purchased separately):	
Ground	Negative
Volts (DC)	12
Battery quantity	1
Recommended cold cranking amps:	
(CCA) rating for −18°C (0°F)	500
Group size	26

Lubrication

Lubricating System	
Type	Full Pressure
Oil capacity (with filter), L (qt.)	1.9 (2.0)
Oil filter: quantity, type	1, Cartridge
Oil cooler	Integral

Fuel Pipe Size

Minimum Gas Pipe Size Recommendation, in. NPT

Pipe Length, m (ft.)	Natural Gas 281,000 Btu/hr.	LPG 340,000 Btu/hr.
8 (25)	1	3/4
15 (50)	1	1
30 (100)	1 1/4	1
46 (150)	1 1/4	1 1/4
61 (200)	1 1/4	1 1/4

Fuel Requirements

Fuel System	20RESD
Fuel types	Natural Gas or LPG
Fuel supply inlet	1/2 NPT
Fuel supply pressure, kPa (in. H_2O):	
Natural gas	0.9–2.7 (3.5-11)
LP	1.7–2.7 (7-11)

Fuel Composition Limits *	Nat. Gas	LPG
Methane, % by volume (minimum)	90 min.	—
Ethane, % by volume (maximum)	4.0 max.	—
Propane, % by volume	1.0 max.	85 min.
Propene, % by volume (maximum)	0.1 max.	5.0 max.
C_4 and higher, % by volume	0.3 max.	2.5 max.
Sulfur, ppm mass (maximum)	25 max.	
Lower heating value, MJ/m^3 (Btu/ft^3), (minimum)	33.2 (890)	84.2 (2260)

* Contact your local distributor for suitability and rating derates based on fuel compositions outside these limits.

Operation Requirements

Fuel Consumption

Model	Fuel Type	% Load	Fuel Consumption, m^3/hr. (cfh) 60 Hz		50 Hz	
20RESD	Natural Gas	100	8.0	(281)	6.4	(225)
		75	6.9	(243)	5.4	(189)
		50	4.6	(161)	3.9	(139)
		25	3.6	(127)	2.9	(103)
		Exercise	2.0	(71)	2.0	(71)
	LPG	100	3.9	(136)	2.9	(102)
		75	3.1	(109)	2.4	(85)
		50	2.3	(82)	1.8	(63)
		25	1.7	(59)	1.3	(47)
		Exercise	1.0	(35)	1.0	(35)

Nominal fuel rating: Natural gas: 37 MJ/m^3 (1000 $Btu/ft.^3$)
LPG: 93 MJ/m^3 (2500 $Btu/ft.^3$)

LPG conversion factors: 8.58 $ft.^3$ = 1 lb.
0.535 m^3 = 1 kg
36.39 $ft.^3$ = 1 gal.

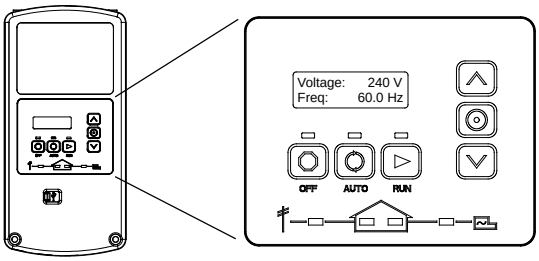
Sound Data

Model 20RESD 8 point logarithmic average sound levels are 64 dB(A) during weekly engine exercise and 69 dB(A) during full-speed generator diagnostics and normal operation. For comparison to competitor ratings, the lowest sound levels are 62 dB(A) and 67 dB(A) respectively.*

All sound levels are measured at 7 meters with no load.

* Lowest of 8 points measured around the generator. Sound levels at other points around generator may vary depending on installation parameters.

RDC2 Controller



The RDC2 controller provides integrated control for the generator set, Kohler® Model RXT transfer switch, programmable interface module (PIM), and load shed kit.

The RDC2 controller's 2-line LCD screen displays status messages and system settings that are clear and easy to read, even in direct sunlight or low light.

RDC2 Controller Features

- Membrane keypad
  - OFF, AUTO, and RUN push buttons
  - Select and arrow buttons for access to system configuration and adjustment menus
- LED indicators for OFF, AUTO, and RUN modes
- LED indicators for utility power and generator set source availability and ATS position (Model RXT transfer switch required)
- LCD display
  - Two lines x 16 characters per line
  - Backlit display with adjustable contrast for excellent visibility in all lighting conditions
- Scrolling system status display
  - Generator set status
  - Voltage and frequency
  - Engine temperature
  - Oil pressure
  - Battery voltage
  - Engine runtime hours
- Date and time displays
- Smart engine cooldown senses engine temperature
- Digital isochronous governor to maintain steady-state speed at all loads
- Digital voltage regulation: ±1.0% RMS no-load to full-load
- Automatic start with programmed cranking cycle
- Programmable exerciser can be set to start automatically on any future day and time, and run every week or every two weeks
- Exercise modes
  - Unloaded weekly exercise with complete system diagnostics
  - Unloaded full-speed exercise
  - Loaded full-speed exercise (Model RXT ATS required)
- Front-access mini USB connector for SiteTech™ or USB Utility connection
- Integral Ethernet connector for Kohler® OnCue® Plus
- Built-in 2.5 amp battery charger
- Remote two-wire start/stop capability for optional connection of a Model RDT transfer switch

See additional controller features on the next page.

Additional RDC2 Controller Features

- Diagnostic messages
  - Displays diagnostic messages for the engine, generator, Model RXT transfer switch, programmable interface module (PIM), and load shed kit
  - Over 70 diagnostic messages can be displayed
- Maintenance reminders
- System settings
  - System voltage, frequency, and phase
  - Voltage adjustment
  - Measurement system, English or metric
- ATS status (Model RXT ATS required)
  - Source availability
  - ATS position (normal/utility or emergency/generator)
  - Source voltage and frequency
- ATS control (Model RXT ATS required)
  - Source voltage and frequency settings
  - Engine start time delay
  - Transfer time delays
  - Voltage calibration
  - Fixed pickup and dropout settings
- Programmable Interface Module (PIM) status displays
  - Input status (active/inactive)
  - Output status (active/inactive)
- Load control menus
  - Load status
  - Test function

Generator Set Standard Features

- Battery cables
- EPA certified fuel system
- Aluminum sound enclosure
- Critical silencer
- Field-connection terminal block
- Fuel solenoid valve and secondary regulator
- Line circuit breaker, 100 amps
- Multi-fuel system, LPG/natural gas, field-convertible
- Oil drain extension with shutoff valve
- Premium 5-year/2000 hour limited warranty
- RDC2 generator set/ATS controller
- Rodent-resistant construction
- Sound-deadening, flame-retardant foam per UL 94, class HF-1

	152 Foot - Monopole Tower	

Dear Charles Trask,

Crown Castle is pleased to submit this **"Structural Analysis Report"** to determine the structural integrity of the above mentioned tower. This analysis has been performed in accordance with the Crown Castle Structural 'Statement of Work' and the terms of Crown Castle Purchase Order Number 1389303, in accordance with application 386809, revision 1.

The purpose of the analysis is to determine acceptability of the tower stress level. Based on our analysis we have determined the tower stress level for the structure and foundation, under the following load case, to be:

LC7: Existing + Reserved + Proposed Equipment **Sufficient Capacity**
Note: See Table I and Table II for the proposed and existing/reserved loading, respectively.

This analysis has been performed in accordance with the 2016 Connecticut State Building Code based upon an ultimate 3-second gust wind speed of 130 mph converted to a nominal 3-second gust wind speed of 101 mph per Section 1609.3 and Appendix N as required for use in the TIA-222-G Standard per Exception #5 of Section 1609.1.1. Exposure Category B and Risk Category II were used in this analysis.

All modifications and equipment proposed in this report shall be installed in accordance with the attached drawings for the determined available structural capacity to be effective.

We at *Crown Castle* appreciate the opportunity of providing our continuing professional services to you and Crown Castle. If you have any questions or need further assistance on this or any other projects please give us a call.

tnxTower Report - version 7.0.5.1

08-07-2017

TABLE OF CONTENTS

1) INTRODUCTION

This tower is a 152 ft Monopole tower designed by Engineered Endeavors, Inc. in September of 2000. The tower was originally designed for a wind speed of 90 mph per TIA/EIA-222-F. The tower was designed to be extendable to a height of 194 ft.

2) ANALYSIS CRITERIA

The structural analysis was performed for this tower in accordance with the requirements of TIA-222-G Structural Standards for Steel Antenna Towers and Antenna Supporting Structures using a 3-second gust wind speed of 101 mph with no ice, 50 mph with 1 inch ice thickness and 60 mph under service loads, exposure category B.

4-TOWER MANUFACTURER DRAWINGS	Engineered Endeavors, Inc.	1614566	CCISITES

3.1) Analysis Method

tnxTower (version 7.0.5.1), a commercially available analysis software package, was used to create a three-dimensional model of the tower and calculate member stresses for various loading cases. Selected output from the analysis is included in Appendix A.

3.2) Assumptions

1) Tower and structures were built in accordance with the manufacturer's specifications.
2) The tower and structures have been maintained in accordance with the manufacturer's specification.
3) The configuration of antennas, transmission cables, mounts and other appurtenances are as specified in Tables 1 and 2 and the referenced drawings.

This analysis may be affected if any assumptions are not valid or have been made in error. Crown Castle should be notified to determine the effect on the structural integrity of the tower.

4) ANALYSIS RESULTS

Table 5 - Section Capacity (Summary)

Section No.	Elevation (ft)	Component Type	Size	Critical Element	P (K)	SF*P_allow (K)	% Capacity	Pass / Fail
L1	152 - 137.42	Pole	TP37.31x33.03x0.313	1	-3.101	2526.220	2.0	Pass

Table 6 - Tower Component Stresses vs. Capacity – LC7

Notes	Component	Elevation (ft)	% Capacity	Pass / Fail
1	Anchor Rods	0	28.3	Pass
1	Base Plate	0	37.4	Pass
1	Base Foundation (Structural)	0	34.3	Pass
1	Base Foundation (Soil Interaction)	0	27.1	Pass

Structure Rating (max from all components) =	**37.4%**

Notes:
1) See additional documentation in "Appendix C – Additional Calculations" for calculations supporting the % capacity consumed.

4.1) Recommendations

The tower and its foundation have sufficient capacity to carry the existing, reserved, and proposed loads. No modifications are required at this time.

TOWER DESIGN NOTES

1. Tower is located in Tolland County, Connecticut.
2. Tower designed for Exposure B to the TIA-222-G Standard.
3. Tower designed for a 101 mph basic wind in accordance with the TIA-222-G Standard.
4. Tower is also designed for a 50 mph basic wind with 1.00 in ice. Ice is considered to increase in thickness with height.
5. Deflections are based upon a 60 mph wind.
6. Tower Structure Class II.
7. Topographic Category 1 with Crest Height of 0.000 ft
8. TOWER RATING: 29.7%

Tower Input Data

There is a pole section.
This tower is designed using the TIA-222-G standard.
The following design criteria apply:

1) Tower is located in Tolland County, Connecticut.
2) Basic wind speed of 101 mph.
3) Structure Class II.
4) Exposure Category B.
5) Topographic Category 1.
6) Crest Height 0.000 ft.
7) Nominal ice thickness of 1.000 in.
8) Ice thickness is considered to increase with height.
9) Ice density of 56.000 pcf.
10) A wind speed of 50 mph is used in combination with ice.
11) Temperature drop of 50.000 °F.
12) Deflections calculated using a wind speed of 60 mph.
13) A non-linear (P-delta) analysis was used.
14) Pressures are calculated at each section.
15) Stress ratio used in pole design is 1.
16) Local bending stresses due to climbing loads, feed line supports, and appurtenance mounts are not considered.

Options

	Consider Moments - Legs		Distribute Leg Loads As Uniform		Use ASCE 10 X-Brace Ly Rules
	Consider Moments - Horizontals		Assume Legs Pinned		Calculate Redundant Bracing Forces
	Consider Moments - Diagonals	√	Assume Rigid Index Plate		Ignore Redundant Members in FEA
	Use Moment Magnification	√	Use Clear Spans For Wind Area		SR Leg Bolts Resist Compression
√	Use Code Stress Ratios		Use Clear Spans For KL/r		All Leg Panels Have Same Allowable
√	Use Code Safety Factors - Guys		Retension Guys To Initial Tension		Offset Girt At Foundation
	Escalate Ice	√	Bypass Mast Stability Checks	√	Consider Feed Line Torque
	Always Use Max Kz	√	Use Azimuth Dish Coefficients		Include Angle Block Shear Check
	Use Special Wind Profile	√	Project Wind Area of Appurt.		Use TIA-222-G Bracing Resist. Exemption
	Include Bolts In Member Capacity		Autocalc Torque Arm Areas		Use TIA-222-G Tension Splice Exemption
	Leg Bolts Are At Top Of Section		Add IBC .6D+W Combination		Poles
	Secondary Horizontal Braces Leg	√	Sort Capacity Reports By Component	√	Include Shear-Torsion Interaction
	Use Diamond Inner Bracing (4 Sided)		Triangulate Diamond Inner Bracing		Always Use Sub-Critical Flow
	SR Members Have Cut Ends		Treat Feed Line Bundles As Cylinder		Use Top Mounted Sockets
	SR Members Are Concentric

Attachment 4 – Wetlands Inspection Report & Vernal Pool Analysis

WETLAND INSPECTION

October 16, 2017 **APT Project No.: CT259620**

Prepared For: Eversource Energy
56 Prospect Street
Hartford, CT 06103
Attn: Steven Florio

Eversource Wireless Site Name: North Coventry/Wallbeoff

Site Address: Crown Castle Telecommunications Facility
Riley Mountain Road, Coventry, Connecticut

Date(s) of Investigation: 9/21/2017

Field Conditions: **Weather:** partly cloudy**,** low 70's
Soil Moisture: dry to moist

Wetland/Watercourse Delineation Methodology*:

☒Connecticut Inland Wetlands and Watercourses
☐Connecticut Tidal Wetlands
☐Massachusetts Wetlands
☐U.S. Army Corps of Engineers

Municipal Upland Review Area/Buffer Zone:
Wetlands: 75 feet
Watercourses: 75 feet

The wetlands inspection was performed by†:

Matthew Gustafson, Registered Soil Scientist

Enclosures: Wetland Delineation Field Forms & Wetland Inspection Map

This report is provided as a brief summary of findings from APT's wetland investigation of the referenced Study Area that consists of proposed development activities and areas generally within 200 feet.‡ If applicable, APT is available to provide a more comprehensive wetland impact analysis upon receipt of site plans depicting the proposed development activities and surveyed location of identified wetland and watercourse resources.

---

* *Wetlands and watercourses were delineated in accordance with applicable local, state and federal statutes, regulations and guidance.*

† *All established wetlands boundary lines are subject to change until officially adopted by local, state, or federal regulatory agencies.*

‡ *APT has relied upon the accuracy of information provided by Eversource Energy regarding proposed project activity locations for identifying wetlands and watercourses within the study area.*

GENERAL COMMENTS:

Eversource Energy is proposing to expand an existing telecommunications facility compound. The existing chain-link fenced compound is opposed to be expanded by ±20' by ±50' along the north side of the compound. The expansion would include the addition of a 10' by 20' equipment shelter, propane-fired generator on a 4' by 6' concrete pad, and 1,000-gallon propane tank on a 5' by 18' concrete pad. Access and utility routing would be via the existing gravel/dirt road off Riley Mountain Road requiring no additional improvements. Two wetland resources occur in proximity to the proposed compound expansion activities.

Wetland 1 consists of a small forested hillside seep system that drains west to east. This wetland is generally located on a topographic plateau and transitions to moderately drained uplands farther to the east as the slope steepens. The wetland is dominated by mature, closed-canopy forest with a sparse understory. Micro-topography generally consists of shallow hummock/hollows. No evidence was observed of seasonal flooding within Wetland 1.

Wetland 1 is located approximately 54' east of the existing access road and 226' north of the proposed compound expansion. Provided erosion and sedimentation controls are installed and maintained during construction in accordance with the 2002 Connecticut Guidelines for Soil Erosion and Sedimentation Control, no likely adverse impact to Wetland 1 would be anticipated from the proposed Eversource Energy project due to the distance to this nearby wetland area.

If no, describe field identified soils		

DOMINANT PLANTS:

Highbush Blueberry (Vaccinium corymbosum)	Sensitive Fern (Onoclea sensibilis)
Sweet Pepperbush (Clethera alnifolia)	

* denotes Connecticut Invasive Species Council invasive plant species

GENERAL COMMENTS:

Eversource Energy is proposing to expand an existing telecommunications facility compound. The existing chain-link fenced compound is opposed to be expanded by ±20' by ±50' along the north side of the compound. The expansion would include the addition of a 10' by 20' equipment shelter, propane-fired generator on a 4' by 6' concrete pad, and 1,000-gallon propane tank on a 5' by 18' concrete pad. Access and utility routing would be via the existing gravel/dirt road off Riley Mountain Road requiring no additional improvements. Two wetland resources occur in proximity to the proposed compound expansion activities.

Wetland 2 consists of a complex hillside seep system that drains west to east. Western extents of the wetland are dominated by closed-canopy mature forest. As the wetland drains east into the vernal pool habitat the dominant cover type transitions to scrub/shrub. Hillside seep portions of the wetland consist of very stony soils. The vernal pool habitat consists of hummock/hollow topography with evidence of seasonal flooding exceeding 8 inches.

Wetland 2 is located approximately 346' north of the proposed facility expansion at its closest point. Provided erosion and sedimentation controls are installed and maintained during construction in accordance with the 2002 Connecticut Guidelines for Soil Erosion and Sedimentation Control, no likely adverse impact to Wetland 2 would be anticipated from the proposed Eversource Energy project due to the distance to this nearby wetland area.

However, the proposed activity would occur within ±601' of the vernal pool habitat, located within the Critical Terrestrial Habitat conservation zone ("CTH"; 100'-750' from the edge of a vernal pool breeding habitat). An evaluation of the proposed activity's impact on this vernal pool resource and its CTH will be provided under separate cover.

Vernal Pool Analysis

Physical Impact to Vernal Pool and Surrounding Terrestrial Habitat

This section details a recognized scientific method for analyzing the potential impact a project may have on a particular vernal pool and its surrounding upland habitat.

Construction and operation of the modified Facility would not result in direct physical impact to the vernal pool located ±600 feet to the northeast. It is widely documented that vernal pool dependent amphibians are not solely dependent upon the actual vernal pool habitat for breeding and egg and juvenile development but also require surrounding upland habitat for most of their adult lives. Various recognized scientific studies recommend protection of adjacent habitat up to 750 feet from the vernal pool edge for obligate pool-breeding amphibians.[1]

In order to evaluate potential impacts to this vernal pool and its surrounding upland habitat, the nearby vernal pool habitat was assessed using methodology developed by Calhoun and Klemens (2002). This methodology assesses vernal pool ecological significance based on two parameters: 1) biological value of the vernal pool, and 2) conditions of the critical terrestrial habitat. The biological rating is based on the presence of federal or state-listed species and abundance and diversity of vernal pool indicator species. The terrestrial habitat is assessed based on the integrity of the vernal pool envelope (within 100 feet of the pool's edge; "VPE") and the critical terrestrial habitat (within 100-750 feet of the pool's edge; "CTH"). Since the wetland investigation was performed on September 21, 2017 during the non-breeding vernal pool season, a conservative priority rating of Tier I was assigned since less than 75% of the VPE is developed (0% is developed), less than 50% of the CTH is developed (3% is developed) and it is assumed that either two or more vernal pool indicator species breed in the pool or 25 or more egg masses would be present in the pool by the conclusion of the breeding season. A Tier I rating is considered to have relatively high breeding activity and relatively intact terrestrial habitat[2] (Tier II and III pools represent lower amphibian productivity and fragmented terrestrial habitat). Pools with 25% or less developed areas in the CTH are identified as having high priority for maintaining less than 25% development within this terrestrial habitat, including site clearing, grading and construction[1]. The vernal pool's CTH has 3% development under existing conditions and therefore would qualify for this conservation priority.

The vernal pool evaluated in this assessment was rated based on these criteria for both the existing condition and the future developed condition to determine if the modified Facility would result in a reduction in the tier rating system. The results of this analysis demonstrate that the proposed development will not result in further degradation of the existing conservation priority Tier I rating or terrestrial habitat integrity of the vernal pool due to the small amount of disturbance associated with the proposed expansion. The VPE would not be impacted as the new development area is located approximately ±600 feet southwest of the nearest vernal pool edge. Currently, the total CTH development area of ±1.5 acres are mainly associated with Hartford Providence Turnpike (U.S. Highway 44) along with the existing telecommunications compound and portions of the access road. Please refer to the enclosed Vernal Pool Analysis Map.

The Facility is located within the CTH and the proposed expansion would result in ±0.07 acre of additional development, an increase of only ±0.13% of the developed CTH associated with the vernal pool. Therefore, the

---

[1] Calhoun, A.J.K. and M.W. Klemens. 2002. Best Development Practices (BDPs): Conserving Pool-Breeding Amphibians in Residential and Commercial Developments in the Northeastern United States. WCS/MCA Technical Paper No. 5.

[2] Vernal Pool Assessment Sheet (source: Calhoun and Klemens 2002)

proposed expansion represents a de minimis increase in development of the vernal pool's CTH. Since the 75% non-development criterion tipping point would not be exceeded (97.11% remains non-developed), the proposed expansion would not result in a likely adverse impact to existing amphibian productivity nor will it result in long-term adverse impact to the terrestrial habitat. The modified Facility would occupy a relatively small area of development and create minimal impact to the vegetated buffer separating the vernal pool from the proposed expansion.

The potential exists for possible short-term impact to herpetofauna associated with the nearby vernal pool habitat due to possible encounters with migrating and basking individuals that may intercept the proposed development footprint should construction occur during their active season. Short-term construction-related impacts associated with the proposed expansion within the vernal pool CTH would be minimized by the proper installation and maintenance of protection measures in accordance with *2002 Connecticut Guidelines for Soil Erosion and Sediment Control*. Since a significant buffer of ±600 feet exists between the proposed expansion area and the vernal pool, additional protective measures (e.g., contractor awareness training, third-party monitoring, etc.) does not appear warranted in this case.

Hydraulic Alterations

Land-use changes (i.e., clearing, increases in impervious surface) can increase surface runoff in the watershed of a vernal pool. Direct inputs of stormwater flows into a pool may produce sudden water level increases in a short period of time and may lengthen the duration of flooding (hydroperiod). Diversion of stormwater flows past a pool may have the opposite effect of decreasing water levels and shortening the pool's hydroperiod. In addition, stormwater features that create temporary pools of water can result in a biological "sink" as breeding amphibians deposit eggs into a water body without the necessary hydraulic period to allow for successful development of the eggs into juveniles.

The proposed expansion will not alter existing surface or subsurface flow conditions or directions. Site clearing and grading activities will not de-water the nearby vernal pool. Further, no alterations to surface water drainage patterns associated with the pool would occur since any new impervious surfaces would be minimized with the use of gravel surfaces that promote infiltration. Therefore, the proposed expansion will not alter the hydrology of the nearby vernal pool. No stormwater management features are proposed that would result in creation of a temporary "decoy" pool and "sink" features. In addition, final grading activities will be carefully performed to avoid creating artificial shallow depressions that could also serve as decoy features.

Project: Eversource Energy Service Company North Coventry Wallbeoff, Site I.D. # CC-876385; Collocation on Existing Telecommunication Tower with Minor Expansion of Existing Fenced Compound, Riley Mountain Rd, Coventry, Connecticut
NDDB Determination No.: 20178850

Dear Dean Gustafson,

I have reviewed Natural Diversity Data Base maps and files regarding the area delineated on the map you provided for the proposed Eversource Energy Service Company North Coventry Wallbeoff, SIte I.D. # CC-876385; Collocation on Existing Telecommunication Tower with Minor Expansion of Existing Fenced Compound, Riley Mountain Rd, Coventry, Connecticut.

State Listed Turtles

There are extant know populations of state special concern and *Clemmys guttata* (spotted turtle) that occur within the project area and best management practices will need to be implemented.

Spotted Turtle:
Spotted turtles are semi-aquatic in nature, which means they live both on terrestrial land and water. This species lives in several types of habitats including bogs, swamps, fens, woodland streams, wet pastures and marshes. They sometimes also inhabit brackish streams influenced by tides. These reptiles always live in areas with slow moving water and soft soil. Spotted turtles are active hunters and they mainly hunt underwater they sometimes move onto terrestrial lands for hunting. Habitat destruction, degradation or alteration and fragmentation all threaten spotted turtle populations. Turtles are also particularly vulnerable to any activity that consistently reduces adult survivorship. The greatest concern during projects occurring in spotted turtle habitat are turtles being run over and crushed by mechanized equipment. Reducing the frequency that motorized vehicles enter spotted turtle habit**a**t would be beneficial in minimizing direct mortality of adults.

Protection for Turtles during Inactive Period (October 1st through March 30th):

- Keeping heavy equipment in the open ROW to the greatest extent possible and hand-felling trees to the greatest extent possible will minimize the potential for heavy machinery to crush hibernating turtles located in wetland edges along the ROW
- Avoid and limit any equipment use within 50 feet of wetlands
- When felling trees adjacent to brooks and streams please cut them to fall away from the waterway and do not drag trees across the waterway or remove stumps from banks.
- No heavy machinery or vehicles may be parked in any turtle habitat.
- All construction personnel working within the turtle habitat must be apprised of the species description and the possible presence of a listed species, and instructed to notify the appropriate authorities to relocate any observed turtle.

- Any confirmed sightings of box, wood or spotted turtles should be reported and documented with the NDDB (nddbrequestdep@ct.gov) on the appropriate special animal form found at (http://www.ct.gov/deep/cwp/view.asp?a=2702&q=323460&depNav_GID=1641)

Protection for Turtles during Active Period (April 1st through September30th):

- Hiring a qualified herpetologist to be on site to ensure these protection guidelines remain in effect and prevent turtles from being run over when moving heavy equipment. This is especially important in the month of June when turtles are selecting nesting sites. All construction personnel working within the turtle habitat must be apprised of the species description and the possible presence of a listed species, and instructed to relocate turtles found inside work areas or notify the appropriate authorities to relocate individuals. The Contractor and consulting herpetologist must search the work area each morning prior to any work being done. If a turtle is discovered later in the day after the initial search

work should stop until the turtle can be relocated by the qualified herpetologist or educated construction worker. Any turtles encountered within the immediate work area shall be carefully moved to an adjacent area outside of the excluded area and any exclusionary fencing should be inspected to identify and remove access point. The goal is to keep turtles from being unintentionally killed during this project.

- Exclusionary practices will be required to prevent any turtle access into construction areas. These measures will need to be installed at the limits of disturbance.
- Exclusionary fencing must be at least 20 in tall and must be secured to and remain in contact with the ground and be regularly maintained (at least bi-weekly and after major weather events) to secure any gaps or openings at ground level that may let animal pass through. Do not use plastic or netted silt-fence.
- All staging and storage areas, outside of previously paved locations, regardless of the duration of time they will be utilized, must be reviewed to remove individuals and exclude them from re-entry.
- In areas where silt fence is used for exclusion, it shall be removed as soon as the area is stable to allow for reptile and amphibian passage to resume.
- No heavy machinery or vehicles may be parked in any turtle habitat.
- Special precautions must be taken to avoid degradation of wetland habitats including any wet meadows and seasonal pools.
- When felling trees adjacent to brooks and streams please cut them to fall away from the waterway and do not drag trees across the waterway or remove stumps from banks.

- Avoid and limit any equipment use within 50 feet of wetlands.
- If mowing during the active season is required, vegetation will be mowed to no lower than 7". Flail type mowers will not be used for mowing in the active season.
- Any confirmed sightings of box, wood or spotted turtles should be reported and documented with the NDDB (nddbrequestdep@ct.gov) on the appropriate special animal form found at (http://www.ct.gov/deep/cwp/view.asp?a=2702&q=323460&depNav_GID=1641)

This determination is good for two years. Please re-submit an NDDB Request for Review if the scope of work changes or if work has not begun on this project by October 23, 2019.

Natural Diversity Data Base information includes all information regarding critical biological resources available to us at the time of the request. This information is a compilation of data collected over the years by the Department of Energy and Environmental Protection's Natural History Survey and cooperating units of DEEP, private conservation groups and the scientific community. This information is not necessarily the result of comprehensive or site-specific field investigations. Consultations with the Data Base should not be substitutes for on-site surveys required for environmental assessments. Current research projects and new contributors continue to identify additional populations of species and locations of habitats of concern, as well as, enhance existing data. Such new information is incorporated into the Data Base as it becomes available.

Please contact me if you have further questions at (860) 424-3592, or dawn.mckay@ct.gov . Thank you for consulting the Natural Diversity Data Base. A more detailed review may be conducted as part of any subsequent environmental permit applications submitted to DEEP for the proposed site.

Sincerely,

Dawn M. McKay

Request for Natural Diversity Data Base (NDDB) State Listed Species Review

Please complete this form in accordance with the instructions (DEEP-INST-007) to ensure proper handling of your request.
There are no fees associated with NDDB Reviews.

Part I: Preliminary Screening & Request Type

Before submitting this request, you must review the most current Natural Diversity Data Base "State and Federal Listed Species and Significant Natural Communities Maps" found on the DEEP website. These maps are updated twice a year, usually in June and December.

Does your site, including all affected areas, fall in an NDDB Area according to the map instructions:

☐ Yes ☒ No **Enter the date** of the map reviewed for pre-screening: **June 2017**

This form is being submitted for a :

☒ *New* NDDB request ☐ *Renewal/Extension* of a NDDB Request, ***without*** *modifications and within* ***one year*** *of issued NDDB determination* (no attachments required) [*CPPU Use Only - NDDB-Listed Species Determination* # 1736]	☐ *New* **Safe Harbor Determination** (optional) must be associated with an application for a GP for the Discharge of Stormwater and Dewatering Wastewaters from Construction Activities ☐ *Renewal/Extension* of an existing Safe Harbor Determination ☐ With modifications ☐ Without modifications (no attachments required) [*CPPU Use Only - NDDB-Safe Harbor Determination* # 1736]
Enter NDDB Determination Number for Renewal/Extension:	Enter Safe Harbor Determination Number for Renewal/Extension:

Part II: Requester Information

If the requester is a corporation, limited liability company, limited partnership, limited liability partnership, or a statutory trust, it must be registered with the Secretary of State. If applicable, the name shall be stated **exactly as it is registered with the Secretary of State. Please note, for those entities registered with the Secretary of State, the registered name will be the name used by DEEP. This information can be accessed at the Secretary of the State's database CONCORD.* (www.concord-sots.ct.gov/CONCORD/index.jsp)

If the requester is an individual, provide the legal name (include suffix) in the following format: First Name; Middle Initial; Last Name; Suffix (Jr, Sr., II, III, etc.).

If there are any changes or corrections to your company/facility or individual mailing or billing address or contact information, please complete and submit the Request to Change company/Individual Information to the address indicated on the form.

1. Requester*

Company Name: **Eversource Energy Service Company**

Contact Name: **Robert Deptula**

Address: **107 Selden Street**

City/Town: **Berlin** State: **CT** Zip Code: **06037**

Business Phone: **860-665-3695** ext.

E-mail: **robert.deptula@eversource.com

**By providing this email address you are agreeing to receive official correspondence from the department, at this electronic address, concerning this request. Please remember to check your security settings to be sure you can receive emails from "ct.gov" addresses. Also, please notify the department if your e-mail address changes

a) Requester can best be described as:

☐ Individual ☐ Federal Agency ☐ State agency ☐ Municipality ☐ Tribal

☒ *business entity (* if a business entity complete i through iii):

i) Check type ☐ corporation ☐ limited liability company ☐ limited partnership ☐ limited liability partnership ☐ statutory trust ☐ Other:

ii) Provide Secretary of the State Business ID #: 0033981 This information can be accessed at the Secretary of the State's database (CONCORD). (www.concord-sots.ct.gov/CONCORD/index.jsp)

iii) ☐ Check here if your business is **NOT** registered with the Secretary of State's office.

b) Acting as (Affiliation), pick one:

☐ Property owner ☒ Consultant ☐ Engineer ☐ Facility owner ☐ Applicant

☐ Biologist ☐ Pesticide Applicator ☐ Other representative:

2. List Primary Contact to receive Natural Diversity Data Base correspondence and inquiries, if different from requester.

Company Name: **All-Points Technology Corporation, P.C.**

Contact Person: **Dean Gustafson** Title: **Senior Environmental Scientist**

Business Phone: **860-663-1697** ext. **201**

E-mail: **dgustafson@allpointstech.com

Part III: Site Information

This request can only be completed for one site. A separate request must be filed for each additional site.

1. SITE NAME AND LOCATION

Site Name or Project Name: **N. Coventry/Wallbeoff, Site I.D. # CC-876385**

Town(s): **Coventry**

Street Address or Location Description:
Riley Mountain Road

Size in acres, or site dimensions: **±28.58 acres**

Latitude and longitude of the center of the site in decimal degrees (e.g., 41.23456 -71.68574):

Latitude: **41° 47 56.21" N** Longitude: **72° 19' 55.88" W**

Method of coordinate determination (check one):

☐ GPS ☐ Photo interpolation using CTECO map viewer ☒ Other (specify): **survey**

2a. Describe the current land use and land cover of the site.

The subject property consists of a predominantly forested parcel that contains an existing wireless telecommunications facility in the central-western portion of the property. An Eversource Energy electrical transmission right-of-way is located in the southwestern corner of the property. A small forested wetland is located just east of an existing gravel road that provides access to the tower facility from Riley Mountain Road. A large forested wetland, which contains a large cryptic style vernal pool habitat in the interior of the wetland, is located in the northern-central portion of the property.

b. Check all that apply and enter the size in acres or % of area in the space after each checked category.

☐ Industrial/Commercial _____	☐ Residential _____	☒ Forest 95%
☒ Wetland 10%	☐ Field/grassland _____	☐ Agricultural _____
☐ Water _____	☒ Utility Right-of-way 5%	
☐ Transportation Right-of-way _____	☐ Other (specify): _____	

Part IV: Project Information

1. PROJECT TYPE:

Choose Project Type: Cellular/Communications tower installation/maint. , If other describe: _____

2. Is the subject activity limited to the maintenance, repair, or improvement of an existing structure within the existing footprint? ☒ Yes ☐ No If yes, explain.

The Project would consist of collocation on an existing telecommunications tower and a minor expansion of an existing fenced compound.

Part IV: Project Information (continued)

3. Give a detailed description of the activity which is the subject of this request and describe the methods and equipment that will be used. Include a description of steps that will be taken to minimize impacts to any known listed species.

   Eversource proposes to collocate on an existing 152-foot tall telecommunications monopole tower ("Existing Facility") that is owned and maintained by Crown Castle ("Crown"). The Existing Facility is situated in the eastern portion of a ±28.58 acre wooded lot. Eversource proposes to install one (1) ±20-foot tall, dual pole omnidirectional whip antenna ("Project") with a tower top amplifier, on the Existing Facility. An irregular proposed compound expansion (±736 SF), surrounded by an 8-foot high chain link fence, is proposed along the northern side corner of the existing fenced compound to provide space for an ±10-foot by ±20-foot equipment shelter, a 20kW propane-fueled, back-up power generator and a 1,000-gallon aboveground propane tank.

   Typical equipment used to construct this facility include excavator, crane, various sized trucks and support vehicles. Typical methods include excavation/forming/pouring of concrete foundations for shelter, generator and propane tank, installation of antennas and equipment on existing tower, construction of compound and installation of equipment shelter, generator and supporting electrial equipment. Erosion control measures will follow the CTDEEP 2002 Connecticut Guidelines for Soil Erosion and Sediment Control. No significant stormwater would be generated by the proposed compound expansion, which will be underlain with gravel to promote infiltration.

4. If this is a renewal or extension of an existing Safe Harbor request *with* modifications, explain what about the project has changed.

5. Provide a contact for questions about the project details if different from Part II primary contact.

   Name:

   Phone:

   E-mail:

Part V: Request Requirements and Associated Application Types

Check *one* box from either Group 1, Group 2 *or* Group 3, indicating the appropriate category for this request.

Group 1. If you check one of these boxes, complete Parts I – VII of this form and submit the required attachments A and B.

- ☒ Preliminary screening was negative but an NDDB review is still requested
- ☐ Request regards a municipally regulated or unregulated activity (no state permit/certificate needed)
- ☐ Request regards a preliminary site assessment or project feasibility study
- ☐ Request relates to land acquisition or protection
- ☐ Request is associated with a *renewal* of an existing permit, with no modifications

Group 2. If you check one of these boxes, complete Parts I – VII of this form and submit required attachments A, B, *and* C.

- ☒ Request is associated with a *new* state or federal permit application
- ☐ Request is associated with modification of an existing permit
- ☐ Request is associated with a permit enforcement action
- ☐ Request regards site management or planning, requiring detailed species recommendations
- ☐ Request regards a state funded project, state agency activity, or CEPA request

☐ **Group 3.** If you are requesting a **Safe Harbor Determination**, complete Parts I-VII and submit required attachments A, B, and D. Safe Harbor determinations can only be requested if you are applying for a GP for the Discharge of Stormwater and Dewatering Wastewaters from Construction Activities

If you are filing this request as part of a state or federal permit application(s) enter the application information below.

Permitting Agency and Application Name(s):
FCC rules implemeting the National Environmental Policy Act ("NEPA") & Connecticut Siting Council, Petition for Declaratory Ruling

State DEEP Application Number(s), if known: **N/A**

State DEEP Enforcement Action Number, if known: **N/A**

State DEEP Permit Analyst(s)/Engineer(s), if known: **N/A**

Is this request related to a previously submitted NDDB request? ☐ Yes ☒ No

If yes, provide the previous NDDB Determination Number(s), if known: _____

Part VI: Supporting Documents

Check each attachment submitted as verification that *all* applicable attachments have been supplied with this request form. Label each attachment as indicated in this part (e.g., Attachment A, etc.) and be sure to include the requester's name, site name and the date. **Please note that Attachments A and B are required for all new requests and Safe Harbor renewals/extensions with modifications.** Renewals/Extensions with no modifications do not need to submit any attachments. Attachments C and D are supplied at the end of this form.

☒ Attachment A:	**Overview Map:** an 8 1/2" X 11" print/copy of the relevant portion of a USGS Topographic Quadrangle Map clearly indicating the exact location of the site.
☒ Attachment B:	**Detailed Site Map:** fine scaled map showing site boundary and area of work details on aerial imagery with relevant landmarks labeled. (Site and work boundaries in GIS [ESRI ArcView shapefile, in NAD83, State Plane, feet] format can be substituted for detailed maps, see instruction document)
☒ Attachment C:	**Supplemental Information, Group 2 requirement (attached, DEEP-APP-007C)** ☒ Section i: Supplemental Site Information and supporting documents ☒ Section ii: Supplemental Project Information and supporting documents
☐ Attachment D:	**Safe Harbor Report Requirements, Group 3 (attached, DEEP-APP-007D)**

Part VII: Requester Certification

The requester *and* the individual(s) responsible for actually preparing the request must sign this part. A request will be considered incomplete unless all required signatures are provided.

"I have personally examined and am familiar with the information submitted in this document and all attachments thereto, and I certify that based on reasonable investigation, including my inquiry of the individuals responsible for obtaining the information, the submitted information is true, accurate and complete to the best of my knowledge and belief."

Signature of Requester (a typed name will substitute for a handwritten signature)	Date: 10/10/17
Robert Deptula, Eversource Energy Service Company Name of Requester (print or type)	**Supv. Licensing and Permitting** Title (if applicable)
Signature of Preparer (if different than above)	Date: October 9, 2017
Dean Gustafson, All-Points Technology Corp. Name of Preparer (print or type)	**Sr. Environmental Scientist** Title (if applicable)

Note: Please submit the completed Request Form and all Supporting Documents to:

CENTRAL PERMIT PROCESSING UNIT
DEPARTMENT OF ENERGY & ENVIRONMENTAL PROTECTION
79 ELM STREET
HARTFORD, CT 06106-5127

Or email request to: **deep.nddbrequest@ct.gov**

Attachment C: Supplemental Information, Group 2 requirement

Section i: Supplemental Site Information

1. Existing Conditions

Describe all natural and man-made features including wetlands, watercourses, fish and wildlife habitat, floodplains and any existing structures potentially affected by the subject activity. Such features should be depicted and labeled on the site plan that must be submitted. Photographs of current site conditions may be helpful to reviewers.

Expansion of the existing telecommunications facility compound would occur within a partially cleared upland area that would require removal of two snags; no live trees 6 inches DBH or greater would be impacted by the proposed expansion. In addition, no wetlands or watercourses would be impacted by the proposed activity. The nearest wetlands are located ±252 feet north of the existing telecommunications facility. The large wetland with associated vernal pool habitat is located over 300 feet northeast of the facility. Therefore, no wildlife habitat would be adversely affected by the proposed activity.

☒ **Site Photographs (optional) attached**

☒ **Site Plan/sketch of existing conditions attached**

2. Biological Surveys

Has a biologist visited the site and conducted a biological survey to determine the presence of any endangered, threatened or special concern species ☐ Yes ☒ No

If yes, complete the following questions and submit any reports of biological surveys, documentation of the biologist's qualifications, and any NDDB survey forms.

Biologist(s) name: _____

Habitat and/or species targeted by survey: _____

Dates when surveys were conducted: _____

☐ **Reports of biological surveys attached**

☐ **Documentation of biologist's qualifications attached**

☐ **NDDB Survey forms for any listed species observations attached**

Section ii: Supplemental Project Information

1. Provide a schedule for all phases of the project including the year, the month and/or season that the proposed activity will be initiated and the duration of the activity.

   The proposed construction project is anticipated to extend over a period of 2 to 3 months. The schedule for construction will be developed pending approval from the Connecticut Siting Council.

2. Describe and quantify the proposed changes to existing conditions and describe any on-site or off-site impacts. In addition, provide an annotated site plan detailing the areas of impact and proposed changes to existing conditions.

   The proposed ±736 SF compound exansion of the existing telecommunications facility would be located within a partially cleared area associated with the facility and would only result in the removal of two snags, saplings and shrubs within an upland area. No significant impact to wildlife habitat would result from the proposed activity.

Concord, NH 03301-5087

Attn: Thomas R. Chapman

Re: Proposed Eversource Energy
N. Coventry / Wallbeoff CT Facility
Riley Mountain Road
Coventry, Tolland County, CT
Lat: 41° 47 56.21" N
Long: 72° 19' 55.88" W
Overall Height: 172-feet AGL

Dear Mr. Chapman,

On behalf of Eversource Energy Service Company ("Eversource"), All-Points Technology Corporation, P.C. ("APT") performed an evaluation with respect to possible federally-listed, threatened or endangered species to determine if proposed collocation on the referenced existing communications facility ("Facility") would result in a potential adverse effect to federally-listed species. This consultation was completed in accordance with the Federal Communications Commission ("FCC") rules implementing the National Environmental Policy Act ("NEPA") and Section 7 of the Endangered Species Act through the U.S. Fish and Wildlife Service's ("USFWS") Information, Planning, and Conservation System ("IPaC")[1] for a proposed Facility at the referenced subject property.

Northern Long-eared Bat

One federally-listed[2] threatened species is known to occur in the vicinity of the subject property documented as the northern long-eared bat ("NLEB"; *Myotis septentrionalis*). Northern long-eared bat's range encompasses the entire State of Connecticut. As a result of this preliminary finding, APT performed an evaluation to determine if the proposed collocation on the referenced Facility would result in a likely adverse effect to NLEB. This consultation framework allows federal agencies to rely upon the USFWS January 5, 2016, intra-Service Programmatic Biological Opinion ("BO") on the Final 4(d) Rule for the NLEB for section 7(a)(2) compliance by: (1) notifying the USFWS that an action agency will use the streamlined framework; (2) describing the project with sufficient detail to support the required determination; and (3) enabling the USFWS to track effects and determine if reinitiation of consultation is required per 50 CFR 402.16.

The ±736 SF compound expansion proposed by Eversource to accommodate its ground equipment adjacent to the Facility's fenced compound would be located within a partially cleared area and would only result in the removal of two snags, saplings (less than 3 inches DBH) and shrubs within an upland area. In addition,

[1] IPaC Consultation Tracking Number: 05E1NE00-2017-SLI-2651, dated September 11, 2017

[2] Listing under the federal Endangered Species Act

the project is not located near known NLEB hibernacula or maternity roost trees. Consultation with the Connecticut Department of Energy & Environmental Protection ("CTDEEP") Wildlife Division Natural Diversity Data Base ("NDDB") revealed that the Facility is not within 150 feet of a known occupied maternity roost tree and is not within 0.25 mile of a known NLEB hibernaculum. The nearest NLEB habitat resource to the proposed activity is located in Granby ±22.8 miles to the northwest. Therefore, the proposed project is not likely to adversely affect NLEB. Please find enclosed the completed USFWS's NLEB final 4(d) rule Streamlined Consultation Form. In accordance with USFWS NLEB Streamlined Consultation review policy, no other attachments (site plans, map and/or site photos) are required.[3]

Eversource understands that if the USFWS does not respond within 30 days from submittal of this form, we may presume that USFWS determination is informed by the best available information and that Eversource's project responsibilities under 7(a)(2) with respect to the NLEB are fulfilled through the USFWS January 5, 2016, Programmatic BO.

Eversource would consider following additional voluntary measures for NLEB conservation, noted below and as the project schedule allows.

- Conduct tree removal activities outside of the NLEB pup season (June 1-July 31) and active season (April 1-October 31) to minimize impacts to pups at roosts not yet identified.
- Avoid clearing suitable spring staging and fall swarming habitat within a five-mile radius of known or assumed NLEB hibernacula during the staging and swarming seasons (April 1-May 15 and August 15-November 14, respectively). NOT APPLICABLE.
- Maintain dead trees and large trees when possible.
- Use herbicides and pesticides only if unavoidable.
- Minimize exterior lighting, opting for down-shielded, motion-sensor security lights or other light minimization measures.

Migratory Bird Treaty Act

In August 2016, the USFWS prepared its *Recommended Best Practices for Communication Tower Design, Siting, Construction, Operation, Maintenance, and Decommissioning*. These suggested best practices were developed to assist tower companies in developing their communication systems in a way which minimizes the risk to migratory birds and threatened and endangered species. The Facility would comply with the USFWS' recommended guidelines for reducing impacts to migratory birds as follows. The Facility would consist of installation of a 20-foot whip antenna at the top of the existing 152-foot tall monopole structure which requires neither guy wires nor lighting and is therefore consistent with USFWS' suggested tower design criteria: tower height is less than 200 feet above ground level; no guy wires; no tower lighting and on-ground security lighting will be down-shielded and motion-sensored. In addition, expansion of the existing compound avoids wetlands, known bird concentration areas (closest Important Bird Area is ±7 miles away – Meshomasic State Forest Block), rare species habitat (site is not located within or near a DEEP NDDB buffer area) and ridgelines, thereby minimizing environmental impacts that could affect migratory birds.

[3] Personal communication with Maria Tur, USFWS New England Field Office, May 23, 2017.

Eversource would consider following the USFWS' construction recommendations, noted below, as the project schedule allows.

- If construction activities should occur during the peak nesting period of April 15 through July 15[4], efforts would be taken to complete tree clearing work prior to April 15.
- If tree clearing has not been completed by April 15, an avian survey may be conducted to determine if breeding birds would be disturbed.
- If the avian survey concludes that breeding birds would be disturbed, tree clearing activities may be restricted from the April 15 through July 15 peak nesting period (or a modified time frame based on the specific findings of the survey).

Therefore, the proposed construction activities are not anticipated to result in significant disturbance to breeding birds protected by the Migratory Bird Treaty Act ("MBTA").

Please feel free to contact me with any questions or requests for additional information by phone at (860) 663-1697 ext. 201 or via email at dgustafson@allpointstech.com.

Sincerely,

Dean Gustafson
Senior Environmental Scientist

Enclosure

[4] USFWS identifies the peak avian nesting season as April 15 through July 15 and recommends clearing activities be performed before this period in order to comply with the Migratory Bird Treaty Act, personal communication with Maria Tur, USFWS New England Field Office, February 27, 2014.

Northern Long-Eared Bat 4(d) Rule Streamlined Consultation Form

Northern Long-Eared Bat 4(d) Rule Streamlined Consultation Form

Federal agencies should use this form for the optional streamlined consultation framework for the northern long-eared bat (NLEB). This framework allows federal agencies to rely upon the U.S. Fish and Wildlife Service's (USFWS) January 5, 2016, intra-Service Programmatic Biological Opinion (BO) on the final 4(d) rule for the NLEB for section 7(a)(2) compliance by: (1) notifying the USFWS that an action agency will use the streamlined framework; (2) describing the project with sufficient detail to support the required determination; and (3) enabling the USFWS to track effects and determine if reinitiating of consultation is required per 50 CFR 402.16.

This form is not necessary if an agency determines that a proposed action will have no effect to the NLEB or if the USFWS has concurred in writing with an agency's determination that a proposed action may affect, but is not likely to adversely affect the NLEB (i.e., the standard informal consultation process). Actions that may cause prohibited incidental take require separate formal consultation. Providing this information does not address section 7(a)(2) compliance for any other listed species.

Information to Determine 4(d) Rule Compliance:	**YES**	**NO**
1. Does the project occur wholly outside of the WNS Zone[1]?	☐	☒
2. Have you contacted the appropriate agency[2] to determine if your project is near known hibernacula or maternity roost trees?	☒	☐
3. Could the project disturb hibernating NLEBs in a known hibernaculum?	☐	☒
4. Could the project alter the entrance or interior environment of a known hibernaculum?	☐	☒
5. Does the project remove any trees within 0.25 miles of a known hibernaculum at any time of year?	☐	☒
6. Would the project cut or destroy known occupied maternity roost trees, or any other trees within a 150-foot radius from the maternity roost tree from June 1 through July 31.	☐	☒

You are eligible to use this form if you have answered yes to question #1 **or** yes to question #2 **and** no to questions 3, 4, 5 and 6. The remainder of the form will be used by the USFWS to track our assumptions in the BO.

Agency and Applicant[3] Eversource Energy Service Company, 107 Selden Street, Berlin, CT 06037

Project Name: N. Coventry/Wallbeoff

Project Location: Riley Mountain Road, Coventry, CT (Lat: 41° 47 56.21" N Long: 72° 19' 55.88" W)

Project IPaC SLI#: 05E1NE00-2017-SLI-2651

Basic Project Description: Eversource proposes to collocate on an existing 152-foot telecommunications monopole tower that is owned and maintained by Crown Castle. Eversource proposes to install one (1) ±20-foot tall, dual pole omnidirectional whip antenna with a tower top amplifier, on the existing tower. An irregularly shaped compound expansion (736 +/- SF) is proposed, surrounded by an 8-foot high chain link fence, to accommodate a ±10-foot by ±20-foot equipment shelter, a 20kW propane-fueled, back-up power generator and a 1,000-gallon above ground propane tank.

Agency Determination:

By signing this form, the action agency determines that this project may affect the NLEB, but that any resulting incidental take of the NLEB is not prohibited by the final 4(d) rule.

If the USFWS does not respond within 30 days from submittal of this form, the action agency may presume that its determination is informed by the best available information and that its project responsibilities under 7(a)(2) with respect to the NLEB are fulfilled through the USFWS January 5, 2016, Programmatic BO. The action agency will update this determination annually for multi-year activities.

The action agency understands that the USFWS presumes that all activities are implemented as described herein. The action agency will promptly report any departures from the described activities to the appropriate USFWS Field Office. The action agency will provide the appropriate USFWS Field Office with the results of any surveys conducted for the NLEB. Involved parties will promptly notify the appropriate USFWS Field Office upon finding a dead, injured, or sick NLEB.

Signature: Robert D Deptula Date Submitted: 10/16/17

Robert Deptula, Supervisor Licensing and Permitting, Eversource Energy Service Company

[4] Any activity that temporarily or permanently removes suitable forested habitat, including, but not limited to, tree removal from development, energy production and transmission, mining, agriculture, etc. (see page 48 of the BO).
[5] If the project removes less than 10 trees and the acreage is unknown, report the acreage as less than 0.1 acre.
[6] If the activity includes tree clearing in June and July, also include those acreage in April to October.

ALL-POINTS TECHNOLOGY CORPORATION
3 SADDLEBROOK DRIVE · KILLINGWORTH, CT 06419

NLEB COMPLIANCE

Date: December 1, 2017

Subject: Eversource Energy N. Coventry/Walbeoff CT Facility
Tower Collocation/Mod
172-foot Monopole Communications Tower Site
Riley Mountain Road, Coventry, Tolland County, Connecticut

To Whom It May Concern,

The U.S. Fish and Wildlife Service ("USFWS") did not respond within 30 days to All-Points Technology Corporation's ("APT") determination, received by USFWS on October 16, 2017, that the proposed project is not likely to adversely affect northern long-eared bat ("NLEB"; *Myotis septentrionalis*). If the USFWS does not respond within 30 days from our submittal of the NLEB 4(d) Rule Streamlined Consultation Form, it is presumed that the USFWS concurs with the consultant's determination of no adverse effect to NLEB. Therefore, the project responsibilities under Section 7(a)(2) of the Endangered Species Act with respect to the NLEB are fulfilled in accordance with the USFWS January 5, 2016 intra-Service Programmatic Biological Opinion ("BO").

To minimize adverse effects on the NLEB, the Federal Communications Commission encourages the industry to follow these USFWS recommendations:

- Conduct tree removal activities outside of the NLEB pup season (June 1-July 31) and active season (April 1-October 31) to minimize impacts to pups at roosts not yet identified.
- Avoid clearing suitable spring staging and fall swarming habitat within a five-mile radius of known or assumed NLEB hibernacula during the staging and swarming seasons (April 1-May 15 and August 15-November 14, respectively). *Not applicable: site is located > 5 miles from the nearest hibernacula.*
- Maintain dead trees and large trees when possible.
- Use herbicides and pesticides only if unavoidable.
- Minimize exterior lighting, opting for down-shielded, motion-sensor security lights under towers instead of constant illumination.

Sincerely,

Dean Gustafson
Senior Biologist

Calculated Radio Frequency Emissions Report

EVERSOURCE ENERGY

400 Riley Mountain Road, Coventry, CT 06238

July 5, 2017

Table of Contents

List of Tables

List of Figures

1. Introduction

The purpose of this report is to investigate compliance with applicable FCC regulations for the proposed addition of an Eversource antenna on the existing monopole tower located at 400 Riley Mountain Road in Coventry, CT. The coordinates of the tower are 41° 47' 56.21" N, 72° 19' 55.88" W.

Eversource is proposing to install the following:

1) Install one 935 MHz omnidirectional antenna.

2. FCC Guidelines for Evaluating RF Radiation Exposure Limits

In 1985, the FCC established rules to regulate radio frequency (RF) exposure from FCC licensed antenna facilities. In 1996, the FCC updated these rules, which were further amended in August 1997 by OET Bulletin 65 Edition 97-01. These new rules include Maximum Permissible Exposure (MPE) limits for transmitters operating between 300 kHz and 100 GHz. The FCC MPE limits are based upon those recommended by the National Council on Radiation Protection and Measurements (NCRP), developed by the Institute of Electrical and Electronics Engineers, Inc., (IEEE) and adopted by the American National Standards Institute (ANSI).

The FCC general population/uncontrolled limits set the maximum exposure to which most people may be subjected. General population/uncontrolled exposures apply in situations in which the general public may be exposed, or in which persons that are exposed as a consequence of their employment may not be fully aware of the potential for exposure or cannot exercise control over their exposure.

Public exposure to radio frequencies is regulated and enforced in units of milliwatts per square centimeter (mW/cm^2). The general population exposure limits for the various frequency ranges are defined in the attached “FCC Limits for Maximum Permissible Exposure (MPE)” in Attachment B of this report.

Higher exposure limits are permitted under the occupational/controlled exposure category, but only for persons who are exposed as a consequence of their employment and who have been made fully aware of the potential for exposure, and they must be able to exercise control over their exposure. General population/uncontrolled limits are five times more stringent than the levels that are acceptable for occupational, or radio frequency trained individuals. Attachment B contains excerpts from OET Bulletin 65 and defines the Maximum Exposure Limit.

Finally, it should be noted that the MPE limits adopted by the FCC for both general population/uncontrolled exposure and for occupational/controlled exposure incorporate a substantial margin of safety and have been established to be well below levels generally accepted as having the potential to cause adverse health effects.

3. RF Exposure Prediction Methods

The emission field calculation results displayed in the following figures were generated using the following formula as outlined in FCC bulletin OET 65:

$$\text{Power Density} = \left(\frac{1.6^2 \times EIRP}{4\pi \times R^2} \right) \text{x Off Beam Loss}$$

Where:

EIRP = Effective Isotropic Radiated Power

R = Radial Distance = $\sqrt{\left(H^2 + V^2\right)}$

H = Horizontal Distance from antenna in meters

V = Vertical Distance from radiation center of antenna in meters

Ground reflection factor of 1.6

Off Beam Loss is determined by the selected antenna pattern

These calculations assume that the antennas are operating at 100 percent capacity and power, and that all channels are transmitting simultaneously. Obstructions (trees, buildings, etc.) that would normally attenuate the signal are not taken into account. The calculations assume even terrain in the area of study and do not take into account actual terrain elevations which could attenuate the signal. As a result, the predicted signal levels reported below are much higher than the actual signal levels will be from the final site configuration.

4. Calculation Results

Table 1 below outlines the power density information for the site. The proposed Eversource omnidirectional antenna has a relatively narrow vertical beamwidth which causes the majority of the RF power to be focused out towards the horizon, with respect to the vertical plane. As a result, there will be less RF power directed below the antenna relative to the horizon, and consequently lower power density levels around the base of the tower. Please refer to Attachment C for the vertical pattern of the proposed Eversource antenna. The calculated results in Table 1 include a nominal 10 dB off-beam pattern loss to account for the lower relative gain below the antenna.

Carrier	Antenna Height (Feet)	Operating Frequency (MHz)	Number of Trans.	ERP Per Transmitter (Watts)	Power Density (mw/cm^2)	Limit	%MPE
AT&T	120	880	2	565	0.0313	0.5867	0.53%
AT&T	120	1900	2	875	0.0484	1.0000	0.48%
AT&T	120	880	1	283	0.0078	0.5867	0.13%
AT&T	120	1900	4	525	0.0581	1.0000	0.58%
AT&T	120	734	1	1615	0.0447	0.4893	0.91%
Pocket (now MetroPCS)	107	2130	3	631	0.0668	1.0000	0.67%
Sprint	147	1962.5	11	384	0.0764	1.0000	0.76%
T-Mobile	136	1900	6	1102	0.1408	1.0000	1.41%
T-Mobile	136	700	1	865	0.0184	0.4667	0.39%
Verizon	126	1970	11	194	0.0533	1.0000	0.53%
Verizon	126	869	9	378	0.0850	0.5793	1.47%
Verizon	126	2145	1	2302	0.0575	1.0000	0.57%
Verizon	126	746	1	850	0.0212	0.4973	0.43%
Eversource	162	935	1	240	0.0035	0.6233	0.06%
						Total	**8.94%**

Table 1: Carrier Information[1] [2]

[1] The power density information for all other operators at this location was taken directly from the CSC database dated 6/1/2017.

[2] The total %MPE listed is a summation of each unrounded contribution. Therefore, summing each rounded value may not reflect the total value listed in the table.

5. Conclusion

The above analysis verifies that RF emissions from the site, after the proposed installation has been completed, will be below the maximum power density levels as outlined by the FCC in the OET Bulletin 65 Ed. 97-01. Even when using conservative methods, the cumulative power density from the proposed antenna configuration is below the limits for the general public. The highest expected percent of Maximum Permissible Exposure at ground level is **8.94% of the FCC General Population/Uncontrolled limit**.

As noted previously, obstructions (trees, buildings, etc.) that would normally attenuate the signal are not taken into account. As a result, the predicted signal levels are more conservative (higher) than the actual signal levels will be from the final site configuration.

6. Statement of Certification

I certify to the best of my knowledge that the statements in this report are true and accurate. The calculations follow guidelines set forth in ANSI/IEEE Std. C95.3, ANSI/IEEE Std. C95.1 and FCC OET Bulletin 65 Edition 97-01.

October 25, 2017

Mr. Brian Parker
Project Manager
All Points Technology Corp.
3 Saddlebrook Drive
Killingworth, CT 06419

Subject: Proposed Telecommunications Facility Upgrades
Riley Mountain Road at Boston Turnpike
Parcel 011 0029A 0003
Coventry, CT

Dear Mr. Parker:

The State Historic Preservation Office is in receipt of the proposal for the above-referenced project, submitted for review and comment pursuant to the National Historic Preservation Act and in accordance with Federal Communications Commission regulations.

The proposed undertaking includes the expansion of the existing telecommunications facility compound to the north, installation of a propane tank, equipment shelter and generator, and the installation of a 20-foot whip antenna on the top of an existing 152-foot tall monopole, for a total height of 172-feet above ground level (AGL).

Though the project area is characterized by well-drained soil on low-sloping terrain, which would normally indicate a moderate level of archeological sensitivity, all work will be undertaken in areas previously disturbed by the construction of the telecommunications facility, and it is unlikely that the subject property would contain intact archaeological deposits. The SHPO concurs with All Point's determination that the work proposed will not impact historic resources. Based on the information provided to this office, no historic properties will be affected.

The State Historic Preservation Office appreciates the opportunity to review and comment upon this project. These comments are provided in accordance with the Connecticut Environmental Policy Act and Section 106 of the National Historic Preservation Act. For further information please contact Marena Wisniewski, Environmental Reviewer, at (860) 500-2357 or marena.wisniewski@ct.gov.

Sincerely,

Catherine Labadia
Deputy State Historic Preservation Officer

Attachment 9 – Noise Evaluation Report

HMB

HMB Acoustics LLC 3 Cherry Tree Lane, Avon, CT 06001 860-677-5955

Noise Evaluation Report

Eversource
Wireless Telecommunications Facility
Riley Mountain Road
Coventry, CT

July 28, 2017

Prepared For:
All-Points Technology Corporation
3 Saddlebrook Drive
Killingworth, CT

Prepared By:
Allan Smardin
HMB Acoustics LLC
3 Cherry Tree Lane
Avon, CT

Introduction

A new “Eversource” telecommunications facility is being proposed, and will be located between Riley Mountain Road and US Hwy 44 (Boston Tpke), in Coventry, CT. The facility will include a Kohler 20 kw emergency stand-by generator in a sound enclosure at grade level; and an equipment shelter that will have two (2) wall mounted air-conditioning units. These units are used to cool the radio equipment inside the shelter. The purpose of the noise evaluation is to determine whether the generator and wall mounted air-conditioners, operating simultaneously, will comply with the State of CT Noise Regulations.

On July 22, 2017, background noise levels were taken in residential areas around the proposed site. These levels measured, on average, 50-55 dBA. The major source of background noise was vehicular traffic. The surrounding neighborhood is residential in nature.

It is important to note that the generator operates approximately 15-20 minutes each week for testing. All testing is carried out during the daytime hours. Other than these testing periods, the generator runs only in times of emergency when commercial power to the facility is interrupted. This report and the noise regulations utilize a dBA scale. This scale is used because it closely approximates the response characteristic of the human ear to loudness, and is the scale most commonly used in the measurement of community noise.

Noise Regulations

The State of CT has enacted regulations which limit the amount of noise which may be transferred from one property to another. In pertinent part, the Regulations provide as follows:

Daytime hours are between 7 a.m. and 10 p.m. local time.

Nighttime hours are between 10 p.m. and 7 a.m. local time.
(Sec. 22a-69-1.1 (h) & (n)).
It shall be unlawful for any person to emit or cause to be emitted any noise beyond the property lines of his / her premises in excess of 55 dBA daytime; or 45 dBA nighttime when the Emitter borders a Receptor's Residential property line.
(Sec. 22a-69-3.5 (c)).

Noise Evaluation Results

Calculated Noise Levels (dBA)
Projected To The Nearest Residential Property Lines

Combined Generator & Two Air-Conditioners Operating Simultaneously

Property Line	dBA Level
North	35 dBA
South	38 dBA
East	26 dBA
West	38 dBA

The noise levels (dBA) take into account the effect of acoustical shielding provided by other structures on the premises. The calculated noise data demonstrates that the noise levels meet the conditions for compliance as set forth in the State of CT Noise Regulations when projected to the nearest residential property lines.

SHORT FORM TOWER LICENSE AGREEMENT

THIS SHORT FORM TOWER LICENSE AGREEMENT (this "Agreement") is entered into as of this 20th day of March, 2018 (the "Effective Date"), between Global Signal Acquisitions II LLC, a Delaware limited liability company, with a place of business at 2000 Corporate Drive, Canonsburg, Washington County, Pennsylvania 15317 ("Licensor"), and The Connecticut Light and Power Company d/b/a Eversource Energy, a Connecticut corporation, with a place of business at 107 Selden Street, Berlin, Connecticut 06037 ("Licensee").

In consideration of the mutual covenants contained herein and intending to be legally bound hereby, the parties hereto agree as follows:

1. DEFINITIONS

The following terms as used in this Agreement are defined as follows:

"Acquiring Party" Any person acquiring title to Licensor's interest in the real property of which the Site forms a part through a Conveyance.

"Adjustment Date" The date on which the Basic Payment shall be adjusted as set forth in Section 5.2 below.

"AM Detuning Study" A study to determine whether measures must be taken to avoid disturbance of an AM radio station signal pattern, as described in Section 2.3 below.

"Base Fee" The then-current Basic Payment, as described in Section 5.2 below.

"Basic Payment" The consideration paid by Licensee for the right to use the Licensed Space as described in Section 5.1 below and subject to adjustment as described in Section 5.2 below.

"Closeout Documentation" As-built drawings and other installation documentation required by Licensor, as described in Section 2.6 below.

"Conveyance" Including, without limitation, any exercise by a Lender of its rights under the Security Instrument, including a foreclosure, sheriff's or trustee's sale under the power of sale contained in the Security Instrument, the termination of any superior lease of the Site and any other transfer, sale or conveyance of the Licensor's interest in the property of which the Site forms a part under peril of foreclosure or similar remedy, including, without limitation to the generality of the foregoing, an assignment or sale in lieu of foreclosure or similar remedy.

"Equipment" Licensee's communications equipment including, but not limited to Licensee's antennas, cables, connectors, wires, radios, radio shelter or cabinet, and related transmission and reception hardware and software, and other personal property.

"FCC" The Federal Communications Commission.

"Government Entity" Any federal, state or local governmental unit or agency thereof with jurisdiction applicable to the Site.

"Intermodulation Study" A study to determine whether an RF interference problem may arise, as described in Section 2.3 below.

"Intermodulation Study Fee" The fee payable by Licensee to Licensor to defray Licensor's costs incurred in preparing or obtaining an Intermodulation Study. The amount of the Fee shall be reasonably commensurate with the scope and complexity of the subject Intermodulation Study.

"Lender" Any and all lenders, creditors, indenture trustees and similar parties.

"Licensed Space" That portion of the Site which is licensed to Licensee hereunder.

"Licensee" The party named as "Licensee" in the first paragraph hereof and its successors in interest.

"Licensor" The party named as "Licensor" in the first paragraph hereof and its successors in interest.

"Modification" (i) Any modification to the Equipment as specified herein or an approved Site Engineering Application; (ii) any alterations in the frequency ranges or FCC licensed allocation or power levels specified in the approved Site Engineering Application; (iii) any change in Licensee's technology protocol (e.g., GSM, CDMA, TDMA, iDEN, etc.); (iv) any addition of Equipment or occupation of additional space, or relocation of Equipment on the tower or on the ground, or relocation of ground space or equipment shelter space; or (v) any repair to the Equipment that affects tower loading capacity.

"Modification Application Fee" The fee payable by Licensee to Licensor in the amount of Five Hundred and 00/100 Dollars ($500.00) to defray Licensor's costs incurred in evaluating a Site Engineering Application.

"Prime Lease" The lease(s), sublease(s) or other prior agreement(s) or instrument(s) (e.g., deed) from which Licensor derives its rights in the Site and/or which contain(s) restrictions on use of the Site, as described in Article 18 below.

"Pro Rata Share" The fraction or decimal equivalent determined by dividing one (1) by the total number of then-existing users of the Site. In no event shall the Pro Rata Share exceed fifty percent (50%).

"Regulatory Compliance Costs" The reasonable costs, including reasonable attorneys' fees, incurred by Licensor at the Site after the Effective Date in order to comply with any applicable law, regulation, rule, guideline, directive or requirement promulgated by a Government Entity.

"RF" Radio frequency.

"Security Instrument" Any and all mortgages, deeds of trust or other deeds, and any similar security agreements that encumber the Site to secure the debt of Licensor.

"Site" The property referred to in Section 2.1 below, which is owned, leased, or otherwise controlled by Licensor and which contains the Licensed Space.

"Site Application Fee" The fee paid by Licensee to Licensor to evaluate a Site Engineering Application to determine whether the tower and Site have sufficient capacity to accommodate the Equipment.

"Site Engineering Application" The application form (as may be amended by Licensor from time to time), which shall be submitted to Licensor by Licensee when Licensee desires to apply for a license to install or make a Modification to Equipment. The approved Site Engineering Application is attached to, and incorporated into, this Agreement as part of **Exhibit B**.

"Site Plan" The site plan referred to in Section 2.2 below, a copy of which is attached hereto as **Exhibit C**.

"Site Rules" The "Site Rules" or its successor, issued by Licensor from time to time, as described in Section 2.2 below.

"Structural Analysis" An engineering analysis performed to determine whether the physical and structural capacity of the tower are sufficient to accommodate the proposed Equipment, which analysis takes into consideration factors such as weight, wind loading and physical space requirements.

"Structural Analysis Fee" The fee payable by Licensee to Licensor in the amount of [redacted] to defray Licensor's costs incurred with respect to its performance of a Structural Analysis.

"Subsequent Use" Any installation or modification to Licensor's or another user's equipment subsequent to the installation or modification of the Equipment as described in Section 6.1 below.

"Term" The term of this Agreement, as set forth in Article 4 below.

"Term Commencement Date" The earlier of: i) the first (1st) day of the month in which Licensor's issuance of written notice to proceed with the installation of Licensee's Equipment at the Site occurs, or ii) April 1, 2018.

"Tower Level Drawing" The tower level drawing referred to in Section 2.2 below, a copy of which is attached hereto as part of **Exhibit B**.

"Work" The installation of Equipment or construction of an approved Modification to Equipment at the Site, as set forth in Section 2.5 below.

2. SITE, LICENSE, EQUIPMENT, LICENSED SPACE, APPLICATION FOR MODIFICATIONS, CONDITIONS PRECEDENT

2.1 **The Site.** The Site consists of that certain parcel of property, located in the Town of Coventry, the County of Tolland, and the State of Connecticut, which is described in **Exhibit A** hereto.

2.2 **License to Install, Operate and Maintain the Equipment**. Licensor hereby grants a license to Licensee to install, operate and maintain the Equipment at the Site within the Licensed Space, as such Equipment and Licensed Space is described in, and subject to, the approved Site Engineering Application and Tower Level Drawing attached hereto as **Exhibit B** and as shown in the Site Plan attached hereto as **Exhibit C**. Such license is subject to the Site Rules and is restricted exclusively to the installation, operation and maintenance of antennas and equipment consistent with the specifications and in the locations identified in **Exhibit B** and **Exhibit C**. If Licensee fails to install the total number of permitted antennas and transmission lines as described in **Exhibit B** and **Exhibit C** within one hundred eighty (180) days of commencement of its initial installation of Equipment, the right to install any such antennas and lines not installed shall be deemed waived, with no reduction of the Basic Payment. No capacity or rights will be reserved for future installation of such Equipment after such one hundred eighty (180) day period.

2.3 **Application for Modifications**. Licensee shall apply to make Modifications by submitting a Site Engineering Application to Licensor together with payment of the Modification Application Fee. A Structural Analysis, AM Detuning Study or an Intermodulation Study may be required by Licensor in connection with a proposed Modification, and Licensee will be liable for the cost thereof. Any approved Modification shall be evidenced by an amendment to this Agreement, and the Site Engineering Application approved by Licensor describing the Modification shall be an exhibit to said amendment.

2.4 **Conditions Precedent to Installation of Equipment or Modification**. Notwithstanding anything to the contrary herein, the parties agree that Licensee's right to install Equipment or make a Modification to Equipment at the Site shall not commence until the following conditions are satisfied: (i) Licensor has received any written consent required under the Prime Lease to allow Licensor to license the Licensed Space to Licensee; (ii) a Site Engineering Application has been approved by Licensor; (iii) the Site Application Fee, Structural Analysis Fee, Intermodulation Study Fee and fee for AM Detuning Study (if any) have been paid; (iv) Licensee has received all required permits (if any) for its installation of, or Modification to, the Equipment and all required regulatory or governmental approvals of Licensee's proposed use of the Site, and Licensor has received, reviewed, and accepted copies of such required permits (if any) and such required regulatory or governmental approvals; and (v) Licensor has received a waiver of any applicable rights of first refusal in and to the space or Licensed Space that Licensee identifies in the Site Engineering Application. With respect to Licensee's initial installation of Equipment at the Site, if any applicable conditions precedent are not satisfied within one hundred eighty (180) days of the date of full execution of this Agreement, either party shall have the right to terminate this Agreement upon written notice to the other party, unless and until all applicable conditions precedent are thereafter satisfied. Upon satisfaction of all conditions precedent, Licensor shall provide written notice to Licensee to confirm said satisfaction. In the event that Licensee breaches this Agreement by installing Equipment or making a Modification other than as permitted hereunder, then in addition to all other remedies available to Licensor, Licensor shall be entitled to receive, and Licensee shall pay to Licensor, upon notice from Licensor, an administrative fee equal to six (6) times the Basic Payment, if payable monthly, or one-half (1/2) the Basic Payment, if payable annually, based on the amount of the Basic Payment at the time of said notice.

2.5 **Performance of Work.** Licensee may engage Licensor to install Licensee's Equipment, and to make approved Modifications to Licensee's Equipment pursuant to this Article 2 (the "Work"), upon terms mutually agreed upon by the parties in writing; provided, however, in the event that Licensee does not engage Licensor to perform the Work, Licensee shall (i) only engage a vendor approved by Licensor to perform the Work and (ii) pay to Licensor [redacted] upon completion of the Work for the purpose of defraying the cost associated with Licensor's inspection of the Work. Notwithstanding Licensor's inspection of any Work not performed by Licensor, Licensor shall in no way be liable for any defect in the Work or any of the materials used, and Licensee shall not rely on Licensor's inspection of the Work as confirmation that no defects exist. All Work shall be performed in accordance with the standards set forth in the Site Rules.

2.6 **Closeout Documentation.** In the event that Licensee engages Licensor to perform any Work for Licensee, Licensor shall provide to Licensee all Closeout Documentation within forty-five (45) days of completion of the Work. In the event that Licensee does not engage Licensor to perform any Work for Licensee and Licensee engages a vendor approved by Licensor to perform the Work in accordance with Section 2.5, Licensee shall provide to Licensor all Closeout Documentation within forty-five (45) days of completion of the Work; provided, however, in the event that Licensee fails to provide to Licensor said Closeout Documentation within said forty-five (45) day period, Licensee shall pay to Licensor [redacted] for the purpose of defraying Licensor's costs associated with preparation of the Closeout Documentation required hereunder.

3. ACCESS, USE OF SITE

3.1 **Access to Site**. Licensor hereby grants to Licensee a non-exclusive license for pedestrian and vehicular ingress to and egress from the Site over the designated access area to the Site as described in **Exhibit A**, on a 24 hour per day, 7 day per week basis, subject, however, to any restrictions in the Prime Lease or any underlying easement, for the purposes of maintaining, operating and repairing the Equipment, together with license to maintain, operate and repair utility lines, wires, cables, pipes, lines, or any other means of providing utility service, including electric and telephone service, to the Licensed Space. Licensor shall have no duty to remove snow or otherwise maintain the access area.

3.2 **Authorized Persons; Safety of Personnel**. Licensee's right of access shall be limited to authorized employees, contractors or subcontractors of Licensee, or persons under their direct supervision. Licensee shall not allow any person to climb a tower without ensuring that such person works for a vendor approved by Licensor for the subject work.

3.3 **Notice to Licensor**. Licensee agrees to provide prior notice of any access to be made by Licensee or its contractors or subcontractors to the Site by calling Licensor's Network Operations Center at (800) 788-7011 (or by providing notice as otherwise directed by Licensor). For safety reasons, access to the Site is restricted to times when elevated work is not being performed on any tower at the Site by any other person

3.4 **Licensee's Use of the Site**. Licensee shall use the Licensed Space at the Site to install, operate and maintain only the Equipment and shall transmit and receive only within the FCC licensed frequency ranges and at the power levels specified herein.

3.5 **Permits, Authorizations and Licenses**. Licensee shall be solely responsible for obtaining, at its own expense, all permits, authorizations and licenses associated with its occupancy of Licensed Space at the Site and utilization of Equipment thereon and shall promptly provide copies thereof to Licensor.

3.6 **Zoning Approval.** Licensee must provide Licensor with copies of any zoning application or amendment that Licensee submits to the applicable zoning authority in relation to its installation or modification of Equipment at the Site, at least seventy-two (72) hours prior to submission to the applicable zoning authority. Licensor reserves the right to (i) require that it be named as co-applicant on any such zoning application or amendment and/or (ii) require revisions to any such zoning application or amendment. Licensor also reserves the right, prior to any decision by the applicable zoning authority, to approve or reject any conditions of approval, limitations or other obligations that would apply to the owner of the Site or property, or any existing or future Site licensee, as a condition of such zoning authority's approval; provided, however, Licensor shall not unreasonably withhold or delay approval of any such conditions of approval, limitations or other obligations. Licensee agrees that any Modification, or change in use of the Licensed Space, as approved herein, requires an amendment hereto which may entitle Licensor to additional compensation. Licensee shall be solely responsible for all costs

and expenses associated with (i) any zoning application or amendment submitted by Licensee, (ii) making any improvements or performing any other obligations required as a condition of approval with respect to same and (iii) any other related expenses.

3.7 **Utilities**. Licensee shall pay for all electricity and other utilities it uses. If separate metering is unavailable, Licensee shall pay a share of such costs as allocated by Licensor.

4. TERM

4.1 **Term of Agreement.** The term of this Agreement shall commence on the Term Commencement Date and continue for a period of Five (5) year(s), ending on the day immediately prior to the Fifth (5th) anniversary of the Term Commencement Date at twelve o'clock (12:00 p.m.) EST (the "Term").

4.2 **Automatic Term Renewal.** The Term shall automatically extend for Four (4) renewal period(s) of Five (5) year(s) each unless either party provides written notice to the other of its election not to renew the Term, at least One Hundred Twenty (120) days prior to the end of the current Term.

4.3 **Term Subject to Prime Lease**. Notwithstanding the foregoing, if Licensor's rights in the Site are derived from a Prime Lease, then the Term shall continue and remain in effect only as long as Licensor retains its interest under said Prime Lease.

5. CONSIDERATION

5.1 **Basic Payment.** Licensee shall pay to Licensor [redacted] per month (the "Basic Payment") for its license and use of the Licensed Space. The Basic Payment shall be paid in advance and without demand, in equal monthly payments payable on the Term Commencement Date, and on the first day of each month thereafter continuing for the Term, subject to extensions as provided for herein. Payments shall be made by check payable to Global Signal Acquisitions II LLC, PO Box 403551 Atlanta, GA 30384-3551. Licensee shall include the JDE Business Unit No. 876385 on or with each payment.

5.2 **Adjustments to Basic Payment**. The Basic Payment shall be increased on the first anniversary of the Term Commencement Date and every anniversary of such date thereafter (the "Adjustment Date") by three percent (3%). Licensor's failure to demand any such increase shall not be construed as a waiver of any right thereto and Licensee shall be obligated to remit all increases notwithstanding any lack of notice or demand thereof. The adjustment to the Basic Payment shall be calculated by the following formula:

The adjusted Basic Payment = Base Fee + (Base Fee x 3%)

"Base Fee" shall mean the then-current Basic Payment.

5.3 **Regulatory Compliance Costs**. In the event that Licensor incurs Regulatory Compliance Costs at the Site during the Term, Licensee shall pay to Licensor its Pro Rata Share of such Regulatory Compliance Costs within thirty (30) days of receipt of Licensor's invoice for same.

5.4 **Taxes, Fees and Assessments**. Licensee shall pay directly to the applicable Government Entity or to Licensor if Licensor is invoiced by such Government Entity, all taxes, fees, assessments or other charges assessed by any Government Entity against the Equipment and/or Licensee's use of the Site or the Licensed Space. Licensee shall pay to Licensor or the appropriate taxing authority, if and when due, any sales, use, ad valorem or other taxes or assessments which are assessed or due by reason of this Agreement or Licensee's use of the Site or the Licensed Space. Licensee shall also pay to Licensor its Pro Rata Share of all taxes, fees, assessments or charges assessed by any Government Entity against the Site or against Licensor's improvements thereon. Licensor shall provide notice of any assessments to be paid by Licensee promptly upon receipt. Licensor shall invoice Licensee annually, indicating the amount of the assessment, its Pro Rata Share and the amount due. Said invoices shall be paid within thirty (30) days of Licensee's receipt.

5.5 **Reimbursement Payment.** Beginning on the date of the commencement of the recurring rent, lease payment, license fee or other similar fee payable under the Agreement as set forth herein, Licensee shall pay to Licensor [redacted] per month (the "Reimbursement Payment") in addition to and concurrently with the recurring rent, lease payment, license fee or other similar fee payable under the Agreement. Said Reimbursement Payment is to reimburse Licensor for certain payments ("Additional Lease Payments") that it is required to pay pursuant to the real property lease or other instrument from which its rights in the site are derived (the "Real Property Lease"), as a result of the rights granted to Licensee herein. Said Reimbursement Payment shall be adjusted in the same manner as, and simultaneously with, the periodic adjustments to the recurring rent, lease payment, license fee or other similar fee payable under the Agreement.

6. INTERFERENCE

6.1 **Interference to Licensee's Operations**. Licensor agrees that neither Licensor nor Licensor's other users of the Site or property adjacent to the Site controlled or owned by Licensor, whose equipment is installed or modified subsequently to Licensee's Equipment ("Subsequent Use"), shall permit their equipment to interfere with Licensee's permitted transmissions or reception. In the event that Licensee experiences RF interference caused by such Subsequent Use, Licensee shall notify Licensor in writing of such RF interference and Licensor shall cause the party whose Subsequent Use is causing said RF interference to reduce power and/or cease operations in order to correct and eliminate such RF interference within seventy-two (72) hours after Licensor's receipt of such notice. In the event Licensor is notified of any RF interference experienced by Licensee alleged to be caused by a Subsequent Use, the entity responsible for the Subsequent Use shall be obligated to perform (or cause to be performed) whatever actions are commercially reasonable and necessary at no cost or expense to Licensee to eliminate such RF interference. Licensor further agrees that any licenses or other agreements with third parties for a Subsequent Use will contain provisions that similarly require such users to correct or

eliminate RF interference with Licensee's operation of its Equipment following receipt of a notice of such interference.

6.2 **Interference by Licensee**. Notwithstanding any prior approval by Licensor of Licensee's Equipment, Licensee agrees that it will not allow its Equipment to cause RF interference to Licensor and/or other pre-existing uses of users of the Site in excess of levels permitted by the FCC. If Licensee is notified in writing that its operations are causing such RF interference, Licensee will immediately take all necessary steps to determine the cause of and eliminate such RF interference. If the interference continues for a period in excess of seventy-two (72) hours following such notification, Licensor shall have the right to require Licensee to reduce power and/or cease operations until such time as Licensee can make repairs to the interfering Equipment. In the event that Licensee fails to promptly take such action as agreed, then Licensor shall have the right to terminate the operation of the Equipment causing such RF interference, at Licensee's cost, and without liability to Licensor for any inconvenience, disturbance, loss of business or other damage to Licensee as the result of such actions. Licensee shall indemnify and hold Licensor and its subsidiaries and affiliates harmless from all costs, expenses, damages, claims and liability that result from RF interference caused by Licensee's Equipment.

7. RELOCATION OF EQUIPMENT BY LICENSOR

7.1 **Relocation of Equipment at Licensor's Option**. Licensor shall have the right to change the location of the Equipment (including re-location of Equipment on the tower to an elevation used by other licensees) upon sixty (60) days written notice to Licensee, provided that said change does not, when complete, materially alter the signal pattern of the Equipment existing prior to the change. Any such relocation shall be performed at Licensor's expense and with reasonably minimal disruption to Licensee's operations and shall be evidenced by an amendment to this Agreement.

7.2 **Third Party Offers for Licensed Space.** In the event that Licensor receives a proposal from a third party to license the Licensed Space for a fee in excess of [redacted] per month, then, unless Licensee agrees to amend the Basic Payment to equal the amount offered by said third party (within thirty (30) days of the date of said notice from Licensor), Licensor shall have the right to either (i) relocate the Equipment, or (ii) if Licensor determines, in its sole judgment, that such relocation is not feasible, terminate this Agreement on thirty (30) days written notice.

8. RF EXPOSURE

Licensee agrees to reduce power or suspend operation of its Equipment if necessary and upon reasonable notice to prevent exposure of workers or the public to RF radiation in excess of the then-existing regulatory standards.

9. LIENS

Licensee shall keep the Licensed Space, the Site and any interest it or Licensor has therein free from any liens arising from any work performed, materials furnished or obligations incurred by or at the request of Licensee, including any mortgages or other financing obligations, and shall discharge any such lien filed, in a manner satisfactory to Licensor, within thirty (30) days after Licensee receives written notice from any party that the lien has been filed.

10. INDEMNIFICATION

Licensee shall indemnify, defend and hold Licensor, and Licensor's affiliates, subsidiaries, directors, officers, managers, employees and contractors, harmless from and against any claim, action, damages, liability, loss, cost or expense (including reasonable attorney's fees), resulting from or arising out of Licensee's or any of Licensee's contractors', subcontractors', servants', agents' or invitees' use or occupancy of the Site.

11. INSURANCE

Licensee shall carry commercial general liability insurance on a form providing coverage at least as broad as the ISO CG 0001 10 01 policy form covering its occupancy and use of the Site. Licensee shall ensure that its policy, and that its independent contractors' policies, be endorsed to cover Licensor as an additional insured on a primary and non-contributory basis with Licensor's policies on a form that does not exclude the concurrent negligence of the additional insured. At a minimum, Licensee and all parties accessing the Site for or on behalf of Licensee (other than independent contractors of Licensee, which must provide coverage as separately specified by Licensor) shall obtain the following insurance coverage: (i) statutory workers' compensation including employer's liability with the following limits: $1,000,000 per accident; $1,000,000 disease, each employee; and $1,000,000 disease policy limit; (ii) commercial general liability covering bodily injury, death and property damage including, but not limited to, coverage for explosion, collapse and underground exposures (XCU) and products/completed operations with limits not less than $1,000,000 per occurrence, combined single limit with a $2,000,000 general policy aggregate and a separate products/completed operations aggregate of $2,000,000; (iii) automobile liability covering all owned, hired and non-owned vehicles with combined single limits not less than $1,000,000 per accident; (iv) umbrella liability insurance of $5,000,000; and (v) commercial all risk of loss fire with extended coverage insurance covering all of Licensee's equipment and improvements at the Site. The commercial general liability limits identified above shall be increased on every tenth (10^{th}) anniversary of this Agreement by twenty-five percent (25%) over the limit of insurance for the immediately preceding ten (10) year period. All insurers will carry a minimum A.M. Best A-(FSC VIII) or equivalent rating and must be licensed to do business in the state where the Site is located. All policies required to be provided pursuant to this section shall contain a waiver of subrogation in favor of Licensor. The insurance requirements in this Agreement shall not be construed to limit or otherwise affect the liability of the Licensee. Licensee shall provide certificates of insurance evidencing said coverage to Licensor upon execution of this agreement and at least annually as the policies renew. Any failure on the part of

Licensor to request the required certificates of insurance shall not in any way be construed as a waiver of any of the aforesaid insurance requirements. Licensee shall agree to provide a copy of said policies upon receipt of written request by Licensor. Licensee agrees to provide notice to Licensor within two (2) business days of receipt of any cancellation notice of any of the required insurance policies.

12. CASUALTY OR CONDEMNATION

12.1 **Casualty**. In the event that the Site, or any part thereof, is damaged by fire or other casualty not caused by Licensee, Licensor shall have ninety (90) days from the date of damage, if the damage is less than total destruction of the Site, in which to make repairs, and one hundred and eighty (180) days from date of destruction, if the Site (including the tower structure) is destroyed, in which to replace the destroyed portion of the Site. If Licensor fails for any reason to make such repair or restoration within the stipulated period and the damage or destruction effectively precludes Licensee's use of the Site as authorized under this Agreement, then either party may, at its option, terminate this Agreement without further liability of the parties, as of the date of partial or complete destruction. If, for any reason whatsoever, Licensee's use of the Site is interrupted due to casualty, Licensee's sole remedy shall be abatement of the Basic Payment for the period during which Licensee's use of the Site is interrupted. Except with regard to repair of the Site as stated in this Section 12.1, Licensor shall not be responsible for any damage caused by vandalism or acts of God. In no event shall Licensor be liable to Licensee for damage to the Equipment or interruption or termination of Licensee's operations caused by forces majeure or acts of God.

12.2 **Condemnation**. If any part of the Site shall be taken under the power of eminent domain, Licensor and Licensee shall be entitled to assert their respective claims in accordance with applicable state law.

13. DEFAULT, REMEDIES, WAIVER OF CONSEQUENTIAL DAMAGES

Either of the following shall constitute an event of default hereunder: (i) Licensee's failure to either pay any amount due hereunder within ten (10) days of written notice from Licensor that said payment is delinquent; or (ii) either party's failure to cure any breach of any covenant of such party (not related to timeliness of payments) herein within thirty (30) days of written notice from the non-breaching party of said breach; provided, however, such thirty (30) day cure period shall be extended upon the breaching party's request if deemed by the non-breaching party to be reasonably necessary to permit the breaching party to complete the cure, and further provided that the breaching party shall commence any cure within the thirty (30) day period and thereafter continuously and diligently pursue and complete such cure. In the event of default by Licensee, Licensee shall immediately make full payment of all amounts that Licensor would have been entitled to receive hereunder for the remainder of the then-current Term and Licensor shall have the right to accelerate and collect said payments. All delinquent amounts shall bear interest at the lesser of one and one-half percent (1 ½%) per month, or the maximum amount permitted by law. Except as otherwise provided in this Agreement, neither party shall be liable to the other for consequential, indirect, special, punitive or exemplary damages for any cause of action whether in contract, tort or otherwise, hereunder.

14. USE OF HAZARDOUS CHEMICALS

Licensee must inform Licensor if it will house batteries or fuel tanks at the Site. The use of any other hazardous chemicals at the Site requires Licensor's prior written approval. Licensee agrees to provide to Licensor no later than each January 15th, an annual inventory of its hazardous chemicals at the Site.

15. GOVERNING LAW, VENUE

The laws of the state where the Site is located, regardless of conflict of law principles, shall govern this Agreement, and any dispute related to this Agreement shall be resolved by arbitration or litigation in said state.

16. ASSIGNMENT, SUBLEASE, SHARING

This Agreement may not be sold, assigned or transferred, in whole or in part, by Licensee without the prior written approval or consent of Licensor, which consent may not be unreasonably withheld. Any such assignment shall be evidenced by a form provided by Licensor and executed by Licensor, Licensee and the assignee. Notwithstanding the foregoing, Licensee shall have the right to assign its interest hereunder to any entity that owns or acquires all or substantially all of Licensee's assets or shares of ownership without the consent of Licensor, upon one hundred eighty (180) days prior written notice. Licensee shall not sublease or license its interest in this Agreement, either directly or through subsidiaries or affiliated entities. Licensee shall not share the use of its Equipment with any third party.

17. NOTICES

Except for notices of access which are to be provided as set forth in Section 3.3 above, all notices hereunder shall be in writing and shall be given by (i) established express delivery service which maintains delivery records, (ii) hand delivery or (iii) certified or registered mail, postage prepaid, return receipt requested. Notices are effective upon receipt, or upon attempted delivery if delivery is refused or if delivery is impossible. The notices shall be sent to the parties at the following addresses:

As to Licensee:

The Connecticut Light and Power Company
d/b/a Eversource Energy
Attn: Salvatore Giuliano, Manager
Real Estate and Land Management
107 Selden Street
Berlin, Connecticut 06037
Telephone Number: (860) 665-6173

As to Licensor: Global Signal Acquisitions II LLC
2000 Corporate Drive
Canonsburg, PA 15317
Attention: Legal Department
Telephone Number: (724) 416-2000

Licensor or Licensee may from time to time designate any other address for this purpose by giving written notice to the other party.

18. PRIME LEASE AGREEMENT

Licensor and Licensee acknowledge that Licensee's use of the Site is subject and subordinate to the Prime Lease. A redacted copy of the Prime Lease is attached as **Exhibit D** hereto. Licensee agrees to be bound by and to perform all of the duties and responsibilities required of the lessee, grantee or licensee as set forth in the Prime Lease to the extent they are applicable to the access to and use of the Site.

19. TERMINATION

19.1 **Withdrawal or Termination of Approval or Permit**. In the event any previously approved zoning or other permit of a Government Entity affecting the use of the Site as a communications facility is withdrawn or terminated, this Agreement shall be deemed to have been terminated effective as of the date of the termination of the permit or approval.

19.2 **Termination of Prime Lease**. In the event that the Prime Lease terminates for any reason, this Agreement shall be deemed to have terminated effective as of the date of the termination of the Prime Lease.

20. NO WAIVER

No provision of this Agreement will be deemed to have been waived by either party unless the waiver is in writing and signed by the party against whom enforcement is attempted.

21. NON-DISCLOSURE

The parties agree that without the express written consent of the other party, neither party shall reveal, disclose or publish to any party the terms of this Agreement or any portion thereof, except to such party's auditor, accountant, lender or attorney or to a Government Entity if required by regulation, subpoena or government order to do so. Notwithstanding the foregoing, either party may disclose the terms of this Agreement to any of its affiliated entities, and Licensor may disclose the terms of this Agreement to any of its lenders or creditors or to third parties that are existing or potential lessees or licensees of space at the Site as may be reasonably necessary with respect to the operation, leasing, licensing and marketing of the Site, including, without limitation, terms relating to Licensee's permitted

frequencies for the purposes of RF compliance tests and terms relating to Licensee's Equipment installed, or to be installed, on the tower for the purposes of structural analysis.

22. SUBORDINATION, NON-DISTURBANCE, ATTORNMENT

22.1 **Subordination**. Subject to Section 22.2, this Agreement and Licensee's rights hereunder are and will be subject and subordinate in all respects to: (i) the Security Instrument from Licensor in favor of Lender insofar as the Security Instrument affects the property of which the Site forms a part; (ii) any and all advances to be made thereunder; and (iii) any and all renewals, extensions, modifications, consolidations and replacements thereof. Said subordination is made with the same force and effect as if the Security Instrument had been executed prior to the execution of this Agreement.

22.2 **Non-Disturbance**. The subordination described in Section 22.1 is conditioned upon the agreement by Lender that, so long as this Agreement is in full force and effect and Licensee is not in material default (beyond applicable notice and cure periods) hereunder, Lender, for itself and on behalf of its successors in interest, and for any Acquiring Party, agrees that the right of possession of the Site and all other rights of Licensee pursuant to the terms of this Agreement shall remain in full force and effect and shall not be affected or disturbed by Lender in the exercise of its rights under the Security Instrument.

22.3 **Liability of Parties**. Licensee and Licensor agree (i) that any Conveyance shall be made subject to this Agreement and the rights of Licensee hereunder and (ii) that the parties shall be bound to one another and have the same remedies against one another for any breach of this Agreement as Licensee and Licensor had before such Conveyance; provided, however, that Lender or any Acquiring Party shall not be liable for any act or omission of Licensor or any other predecessor-in-interest to Lender or any Acquiring Party. Licensee agrees that Lender may join Licensee as a party in any action or proceeding to foreclose, provided that such joinder is necessary to foreclose on the Security Instrument and not for the purpose of terminating this Agreement.

22.4 **Attornment**. Licensee agrees that, upon receipt by Licensee of notice to attorn from Lender or any Acquiring Party, along with reasonable supporting documentation, (i) Licensee shall not seek to terminate this Agreement and shall remain bound under this Agreement, and (ii) Licensee shall attorn to, accept and recognize Lender or any Acquiring Party as the licensor or lessor hereunder pursuant to the provisions expressly set forth herein for the then remaining balance of the Term of this Agreement and any extensions or expansions thereof as made pursuant hereto. Licensee agrees, however, to execute and deliver, at any time and from time to time, upon the request of Lender or any Acquiring Party any reasonable instrument which may be necessary or appropriate to evidence such attornment.

23. PRIOR AGREEMENT SUPERSEDED

The parties hereby agree that, as of the Effective Date, (i) this Agreement shall be deemed to have revoked and superseded any active prior oral or written agreements (as may have been amended and/or assigned) between Licensor and Licensee to the extent applicable to the Site and the subject matter

described herein, and (ii) the terms of this Agreement (together with applicable laws) shall control with respect to all matters hereunder occurring on or after the said date.

24. HOLDOVER FEE

Licensee shall remove its Equipment from the Site prior to the expiration or termination of this Agreement. Should Licensee's Equipment remain at the Site after the expiration or termination of this Agreement, no tenancy or interest in the Site shall result, but this "holding over" shall be an unlawful detainer and all such Equipment shall be subject to immediate removal. Licensee shall, upon demand, pay to Licensor, as a holdover fee, a sum equal to one and one-half (1 ½) times the Basic Payment, if payable monthly, or one-eighth (1/8) the Basic Payment, if payable annually (based on the amount of the Basic Payment at the time of said expiration or termination), for each month or partial month during which Licensee shall "hold over" at the Site after the expiration or termination of this Agreement.

25. COUNTERPARTS AND ELECTRONIC SIGNATURE

This Agreement may be executed by original, facsimile, or electronic signatures (complying with the U.S. Federal ESIGN Act of 2000, 15 U.S.C. 96) and in any number of counterparts which shall be considered one instrument. Counterparts, signed facsimile and electronic copies of this Agreement shall legally bind the parties to the same extent as original documents.

Scope of Work/Additional Information

Scope of Work:
Eversource Energy is proposing to install (1) 10' x 20' concrete shelter (purchased from Crown Castle site in Middletown CT. and moved to Coventry by Eversource). Install Eversource 20 KW propane generator with 1000 gallon propane tank.... Pad / Area for generator is 4' x 6' ... Connect to existing utility backboard for electric and telco. Install (1) 20' dual pole omni antenna @ 162' rad center and (1) TTA mounted @ 152'. Fed with (2) 1-5/8" and (1) 1/2" coaxial cables..... There will be a 10' radius safety clearance for the 1,000 gallon propane tank

****Indicates where Cut Sheet data has been entered.**

NOTICE: Structural Analysis shall be performed in accordance with the current revision of the TIA/EIA 222 standard and applicable local building permit codes and standards. EME analysis shall be consistent with current revision of FCC/OSHA standard OETB 65. AM detuning, when required, will be performed to 47 CFR22.371. The customer is responsible for all analysis expenses. All construction drawings are subject to Crown Castle engineering approval prior to commencement of tower attachments and compound installations. Installation of equipment not conforming to approved drawings may violate the terms of the occupancy agreement and will be corrected at the customer's expense. Crown Castle requires drawings for pre-construction approval and as built drawings for physical configuration validation to be submitted as unlocked AutoCAD files (Version 2000i preferred).
