**Re: Notice of Exempt Modification  
Travelers Championship – Temporary Telecommunications Facility  
Cromwell, Connecticut**

Dear Ms. Bachman:

Pursuant to R.C.S.A. Section 16-50j-72(d), this letter will serve as notice that Cellco Partnership d/b/a Verizon Wireless (“Cellco”) intends to install a temporary wireless repeater facility (a/k/a “Cell Repeater on Wheels” or “CROW”) for use prior to and during this year’s Travelers Championship scheduled for June 19-25, 2017, at TPC River Highlands, Golf Club Road in Cromwell, Connecticut (the “Property”). Included in [Attachment 1](#) is a letter from the Travelers Championship authorizing the filing of this notice. Also included in [Attachment 2](#) is an overall site plan of the TPC River Highlands property showing the proposed location for Cellco’s CROW. In accordance with R.C.S.A. Section 16-50j-73, a copy of this filing has been sent to Enzo Faienza, Mayor for the Town of Cromwell and Stuart Popper, Cromwell’s Director of Planning and Development.

The CROW that Cellco intends to install at the Property is a trailer-mounted wireless repeater with a retractable tower mast. (See CROW specifications included in [Attachment 3](#)). Cellco will attach a single antenna to the top of the mast. Equipment associated with the CROW will be located inside a cabinet on the trailer. The equipment will be connected to an existing power source on the Property.

16385566-v1

Melanie A. Bachman, Esq.  
April 28, 2017  
Page 2

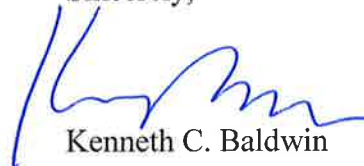

The proposed temporary telecommunications facility satisfies the criteria set forth in R.C.S.A. Section 16-50j-72(d), as a facility that will provide temporary wireless service for an event of State-wide significance. The CROW will provide additional network capacity to accommodate increased wireless voice and data services needed during the event. Cellco expects that the CROW will be brought to the site on or about June 12, 2017, and will be removed on or about July 2, 2017.

The operation of the CROW will not result in a total radio frequency (RF) emissions levels that exceed the Federal Communications Commission (FCC) safety standard. The “worst-case” calculation of RF emissions from the CROW would be 63.15% of the FCC standard. (See General Power Density table included in Attachment 4). Actual RF emissions levels from this temporary facility will be substantially lower than these worst-case approximations. The only noise associated with the CROW’s operations occurs when the tower mast is raised and lowered with the help of a small 7 kW generator located on the trailer. Otherwise, during normal operations the CROW does not generate any noise.

Lastly, a copy of the Town Assessor’s parcel map including owner information is included in Attachment 5.

Based on the foregoing, Cellco respectfully requests acknowledgement of this notice for the installation of a temporary wireless facility at the Travelers Championship in Cromwell, Connecticut. Please feel free to contact me if you have any questions or need any additional information.

Sincerely,

Kenneth C. Baldwin

Re: Cellco Partnership d/b/a Verizon Wireless  
Proposed Temporary Communications Facility  
at One Golf Club Rd, Cromwell, CT 06416

Dear Mr. Befera:

The Greater Hartford Community Foundation, Inc., is the owner of the property at One Golf Club Rd, Cromwell, Connecticut (the "Property") during the Traveler's Championship Tournament. This letter authorizes Verizon Wireless and/or its authorized agent to file for all necessary federal, state or local permits approvals for the proposed wireless telecommunication facility at the Property.

Sincerely,

  
Nathan Grube, Executive Director

General Power Density

Site Name: CROMWELL TPC CROW CT  
 Cumulative Power Density

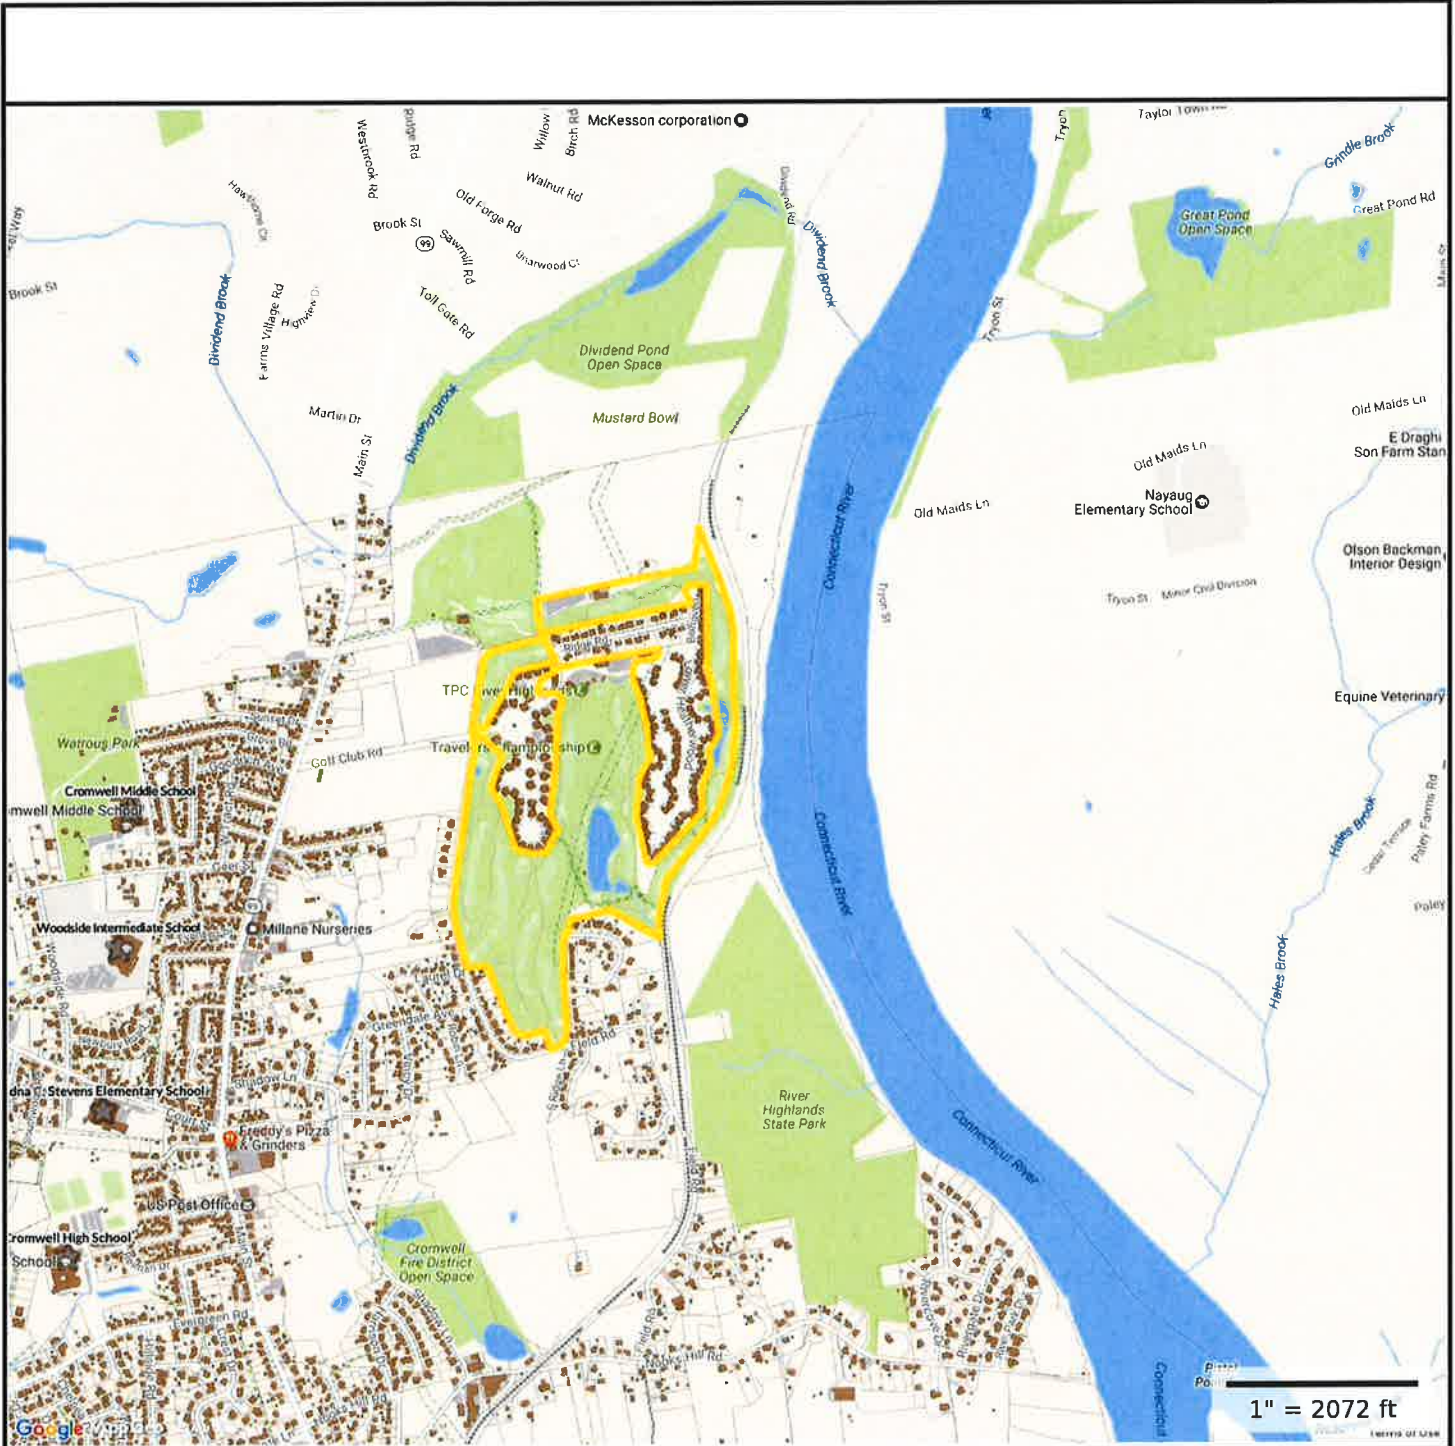

Operator	Operating Frequency (MHz)	Number of Trans.	ERP Per Trans. (watts)	Total ERP (watts)	Distance to Target (feet)	Calculated Power Density (mW/cm <sup>2</sup> )	Maximum Permissible Exposure* (mW/cm <sup>2</sup> )	Fraction of MPE (%)
VZW 700	746	1	273	273	30	0.1092	0.4973	21.96%
VZW Cellular	869	1	296	296	30	0.1182	0.5793	20.40%
VZW PCS	1970	1	521	521	30	0.2080	1.0000	20.80%
<b>Total Percentage of Maximum Permissible Exposure</b>								<b>63.15%</b>

\*Guidelines adopted by the FCC on August 1, 1996, 47 CFR Part 1 based on NCRP Report 86, 1986 and generally on ANSI/IEEE C95.1-1992

MHz = Megahertz  
 mW/cm<sup>2</sup> = milliwatts per square centimeter  
 ERP = Effective Radiated Power

Absolute worst case maximum values used.
