Re: Cellco Partnership d/b/a Bell Atlantic NYNEX Mobile notice of intent to install a temporary cellular telephone facility for use at the Canon Greater Hartford Open (GHO) at River Highlands off of Golf Club Road in Cromwell, Connecticut.

Dear Ms. Gaudet:

At a public meeting held on June 30, 1997, the Connecticut Siting Council (Council) acknowledged your notice of intent to install a temporary cellular telephone facility for use at the Greater Hartford Open at River Highlands off of Golf Club Road in Cromwell, Connecticut, pursuant to Section 16-50j-73 of the Regulations of Connecticut State Agencies.

The proposed temporary facility is to be established as specified in your notice dated June 10, 1997. The temporary facility is in compliance with the exception criteria in Section 16-50j-72 (d) of the Regulations of Connecticut State Agencies as temporary use of a facility to cover an event of statewide significance. This temporary facility has been carefully modeled to ensure that radio frequency emissions are conservatively below State and federal standards applicable to the frequency used on this tower. Any additional change to this facility will require explicit notice to this agency pursuant to Regulations of Connecticut State Agencies Section 16-50j-73. Such notice shall include all relevant information regarding the proposed change with cumulative worst-case modeling of radio frequency exposure at the closest point of uncontrolled access to the tower base, consistent with Federal Communications Commission, Office of Science and Technology, Bulletin No. 65. Any deviation from this format may result in the Council implementing enforcement proceedings pursuant to General Statutes § 16-50u including, without limitation, imposition of expenses resulting from such failure and of civil penalties in an amount not less than one thousand dollars per day for each day of construction or operation in material violation.

Thank you for your attention and cooperation.

Very truly yours,

Re: Bell Atlantic NYNEX Mobile - GHO Temporary Cell Site

Dear Mr. Rinebold:

Cellco Partnership, d/b/a Bell Atlantic NYNEX Mobile ("BANM") plans to install a temporary cell site for use at the Canon Greater Hartford Open (the "GHO") at River Highlands in Cromwell. Please accept this letter as notification, pursuant to R.C.S.A. § 16-50j-73, of construction which constitutes an exempt modification pursuant to R.C.S.A. § 16-50j-72(d). In compliance with R.C.S.A. § 16-50j-73, a copy of this letter is being sent to the First Selectman of Cromwell.

The planned temporary cell site meets the criteria set forth in R.C.S.A. § 16-50j-72(d) for temporary cellular service for events of statewide significance. The site is necessary to accommodate communication needs for the GHO and the surrounding area. The temporary cell site will be placed on property owned by Gardner Nurseries on the north side of Golf Club Road in Cromwell. The site will be put in place on or about July 14 and removed on or about July 31, 1997. BANM will submit under separate cover documentation of the property owner's authorization for BANM to install the temporary cell site.

The temporary cell site consists of an equipment shelter on a trailer and two telescoping masts. The masts will be raised to a height between 30' and 60' determined adequate to provide the necessary coverage. Four Scala 740-247 omnidirectional whip antennas, approximately 5' long, will be mounted on small sidearms at or near the tops of the masts; two antennas will be mounted on each mast.

The total radio frequency electromagnetic radiation power density, measured at the tower base, will not be at a level at or above the ANSI standard. A "worst-case" calculation for a point at the base of the temporary cell site indicates that BANM's temporary operations would result in a power density of 0.4792 mW/cm<sup>2</sup> if the tower is raised to 30' and 0.1198 mW/cm<sup>2</sup> if the tower is raised to 60'. These power density levels are 82.19% and 20.55%, respectively, of the ANSI standard for uncontrolled environments at cellular frequencies of approximately 0.583 mW/cm<sup>2</sup>.

BANM respectfully requests that the Council approve the planned temporary cell site at the GHO pursuant to R.C.S.A. § 16-50j-72(d)(2).

Respectfully yours,
