Re: **EM-VER-033-150828 – Cellco Partnership d/b/a Verizon Wireless
201 Main Street, Cromwell, Connecticut**

Dear Ms. Bachman:

On September 21, 2015, the Siting Council acknowledged receipt of Cellco's notice of intent to modify its existing telecommunications facility at 201 Main Street in Cromwell, Connecticut. The modifications involved the replacement of antennas and the installation of remote radio heads.

As a condition of the acknowledgement, Cellco was required to provide the Council with a letter stating that it had complied with the recommendations made in the structural report attached to that filing. Attached is a Professional Engineer's Tower Modification Certification letter verifying that the installation was completed according to that structural report.

If you have any questions please do not hesitate to contact me.

Sincerely,

Kenneth C. Baldwin

Re: Tower Modification Certification

Project: Verizon Cromwell SE
201 Main Street, Cromwell, CT

Tower Owner: Crown Castle USA
220 Lathrop Road, Candor, NY

Engineer: B+T Group
1717 S. Boulder, Suite 300, Tulsa, OK 74119

Centek Project No.: 16003.10

CSC Exempt Mod Reference No.: EM-VER-033-150828

Dear Mr. Parks,

We are providing this "Tower Modification Certification" with regard to the structural components at the above referenced project.

The following are the basis for substantiating compliance with the tower modification documents prepared by B+T Group (B+T GRP Project Number: 84470.013.01):

- Review of the B+T Group Structural Modification Report dated 05/21/15.
- Review Engineered Tower Solutions Modification Inspection Report dated 10/21/15
- Field observations by Centek Engineering personnel on 08/19/16 of the completed modifications which determined all modifications were installed in general compliance with the aforementioned Structural Modification Report

The modification design prepared by B+T Group demonstrates the tower will not exceed 100 percent of the post construction structural rating. The work under this Contract has been reviewed and found, to the Engineer's best knowledge, information and belief, to be completed in general compliance with the documents referenced above. This certification is not a review of the adequacy or effectiveness of the modification/reinforcement solution.

Sincerely,

Carlo F. Centore, PE
Principal - Structural
