Hi Melanie, thanks for speaking with me yesterday about this site.

The TMO GC incorrectly installed a platform at this site in lieu of the standoff mount modifications that were approved by the CSC in the attached application. This was done in error and does not align with the court order low profile design requirements.

We have directed the GC to correct the install and to bring T-Mobile back into compliance. They are in the process of ordering the correct steel mounts but due to supply chain delays, ETA for parts is not yet clear. We expect this mount to be fully swapped over and corrected no later than 6/1/22.

If you have any questions, please do not hesitate to ask.

Mark Richard
