RE: **TS-CING-052-201007** – New Cingular Wireless PCS, LLC (AT&T) request for an order to approve tower sharing at an existing telecommunications facility located at 190 Colt Highway, Farmington, Connecticut.

Dear Mr. Patrick:

The Connecticut Siting Council (Council) received the tower share request for the above-referenced facility on October 7, 2020.

According to Section 16-50j-90 of the Regulations of Connecticut State Agencies, “no tower share application shall be approved until a complete application containing all information deemed relevant by the Council has been filed. Relevant information shall at a minimum include that listed in Section 16-50j-89 of the Regulations of Connecticut State Agencies...”

Staff has reviewed this tower share request for completeness and has identified a deficiency in the request. No mount analysis has been provided with the request; therefore, it is unclear whether the proposed antenna mount can support the proposed loading.

Therefore, the tower share request is incomplete at this time. The Council recommends that Cuddy & Feder LLP provide a mount analysis that is stamped and signed by a Professional Engineer licensed in the State of Connecticut, on or before November 27, 2020. If additional time is needed to gather the requested information, please submit a written request for an extension of time prior to November 27, 2020. **Please provide an electronic version of the requested information for the incomplete tower share request to be rendered complete and processed. Please include the Council’s tower share identification number referenced above with the submittal.**

This notice of incompleteness shall have the effect of tolling the Federal Communications Commission (FCC) 60-day timeframe in accordance with Paragraph 217 of the FCC Wireless Infrastructure Report and Order issued on October 21, 2014 (FCC 14-153).

Thank you for your attention to this matter. Should you have any questions, please feel free to contact me at 860-827-2951.

Sincerely,

s/ Melanie A. Bachman
