Re: Metro Mobile CTS of Fairfield County, Inc. - Greenwich Cell Site

Dear Mr. Rinebold:

Metro Mobile CTS of Fairfield County, Inc. ("Metro Mobile" or the "Company") plans to install cellular antennas and related equipment at a tower site under construction owned by the Town of Greenwich in Greenwich, Connecticut. Please accept this letter as notice of intent, pursuant to R.C.S.A. Section 16-50j-73, of the placement of associated equipment on an existing non-facility tower pursuant to R.C.S.A. Section 16-50j-72(c). In further compliance with R.C.S.A. Section 16-50j-73, a copy of this letter is being sent to the Greenwich First Selectman.

The non-facility tower, which is currently under construction and scheduled to be completed by July 12, 1993 is a 100' self-supporting lattice tower located on the Bruce Memorial Golf Course off King Street. Metro Mobile plans to install six cellular panel antennas on the tower. The Company will also lease a 20' x 20' equipment room in the 20' x 40' equipment building recently constructed near the base of the tower.

The addition of Metro Mobile's antennas and equipment to the tower site does not constitute a substantial environmental affect since such additions do not cause a significant change or alteration in the physical and environmental characteristics of the site (see the attached site plan). Rather, the planned changes to the existing non-facility tower falls squarely within those activities explicitly provided for in R.C.S.A. Section 16-50j-72(c).

First, the height of the existing tower will be unaffected. Six antennas, Sinclair Model SRL-410C-4R130 will be mounted, on sidearms near the top of the tower. The approximately four foot long antennas will not extend above the top of the tower. The tower will not require any structural modification to support the proposed attachments.

Second, the proposed addition will not extend the site boundaries in that the Company will be using space within a building already existing on the site (see the attached site plan).

Third, the proposed addition will not increase the noise levels at the existing facility by six decibels or more. The only noise associated with the operation of the will be from air conditioning, when in use. The finished installation will house an emergency generator which Metro Mobile will share as needed.

Fourth, operation of the additional antennas will not increase the total radio frequency electromagnetic radiation power density, measured at the tower base, to a level at or above the ANSI standard. The power densities at base of the tower is conservatively calculated to be 0.07558 mW/cm<sup>2</sup> or 12.9% of the ANSI standard of 0.58333 mW/cm<sup>2</sup> for the cellular frequency range.

Finally, the Company has received all necessary municipal approvals and permits for the project. Attached is the permit signed by the building official.

For the foregoing reasons, Metro Mobile seeks a ruling that its proposed additions to the non-facility tower would not cause a significant change or alteration in the physical and environmental characteristics of the site pursuant to R.C.S.A. Section 16-50j-72(c) (1). The Company further submits that the changes comply with R.C.S.A. Sections 16-50j-72(c), (2) through (5) and therefore request a determination that the placement of the antennas and equipment on the existing non-facility tower site does not constitute a substantial environmental effect under R.C.S.A. Section 16-50j-72(c).

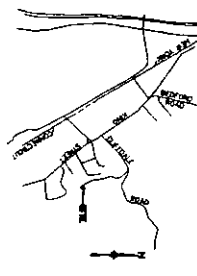

Very truly yours,

A handwritten signature in blue ink, appearing to read "David S. Malko", written over the typed name and title.

*William J. Marr*  
BUILDING OFFICIAL

Occupancy of this new building or addition prior to issuance of a Certificate of Occupancy and/or Compliance will be considered a violation of the State of Connecticut Basic Building Code and Building Zone Regulations. Prompt notification by the Plumbing, Electrical, HVAC and General contractors of completion of their respective portions of the work will avoid delay in issuance of the Certificate of Occupancy and/or Compliance.

INSPECTIONS:

REQUEST PHONE: 622-7772

Normally there are eleven or more required inspections of a new building, and as many as apply on alterations and additions:

1. SOIL CONDITIONS - AFTER forms for footings are placed and BEFORE concrete is poured
2. ELECTRICAL - wiring roughing
3. PLUMBING - roughing
4. HVAC - roughing
5. FRAMING - AFTER the above inspections but BEFORE insulation or sheetrock.
6. INSULATION
7. OIL BURNER - installation and wiring
8. ELECTRICAL FINAL - upon completion
9. PLUMBING FINAL - upon completion
10. HVAC FINAL - upon completion
11. STRUCTURAL FINAL - upon completion

CHANGES, REGARDLESS OF SIZE, FROM STAMPED APPROVED PLANS MUST BE SUBMITTED TO DIVISION OF BUILDINGS BEFORE THEY ARE MADE.

APPROVED PLANS MUST BE RETAINED ON THE JOB AND AVAILABLE TO THE INSPECTORS AT ALL TIMES OR INSPECTION MAY BE REFUSED. SEPARATE PERMITS ARE REQUIRED FOR ELECTRICAL, OIL BURNER, PLUMBING, HVAC, SECURITY AND PHONE SYSTEMS, SIGNS, POOLS, FENCES, TENNIS COURTS AND OTHERS AS REQUIRED BY LAW.

David S. Malko, P.E.  
General Manager - Engineering

July 1, 1993

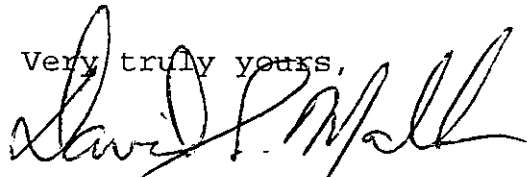

The Honorable John B. Margenot  
First Selectman, Town of Greenwich  
Town Hall  
101 Field Point Road  
Greenwich, CT 06836

Dear Selectman Margenot:

Metro Mobile CTS of Fairfield County, Inc. ("Metro Mobile" or the "Company") plans to install cellular antennas and related equipment at a tower site owned by the Town of Greenwich. As required by Section 16-50j-73 of the Regulation of Connecticut State Agencies (R.C.S.A.), please accept this letter and the attached letter to the Connecticut Siting Council dated July 1, 1993, as notice of intent of the placement of antennas and associated equipment on an existing non-facility tower pursuant to R.C.S.A. Section 16-50j-72(c).

The attached letter fully sets forth the Company's proposal. However, if you have any questions or require any further information on our plans or the Siting Council's procedures, please contact the undersigned or Mr. Joel M. Rinebold, Executive Director, Connecticut Siting Council at 827-7682.

Very truly yours,

David S. Malko, P.E.  
General Manager - Engineering
