RE: **EM-CING-057-180403** - New Cingular Wireless PCS, LLC (AT&T) notice of intent to modify an existing telecommunications facility located at 363 Riversville Road, Greenwich, Connecticut.

Dear Attorney Chiocchio:

The Connecticut Siting Council (Council) received a notice of completion of construction for the above-referenced facility on September 13, 2019. Thank you for providing this information.

The Council approved the above referenced request for exempt modification in a Decision Letter dated June 11, 2018 (enclosed) with the following conditions:

1. The antenna mount shall be reinforced and antenna position relocated in accordance with the mount analysis prepared by Hudson Design Group dated April 6, 2018 and stamped by Daniel Hamm; and
2. Within 45 days following completion of tower modifications, AT&T shall provide documentation signed by a professional engineer that its installation complied with the recommendations presented in the mount analysis.

The completion notice does not contain documentation certified by a Professional Engineer that AT&T's installation is in compliance with the mount analysis by Hudson Design Group as mentioned above.

Therefore, the completion notice is not in compliance with the conditions of approval at this time.

The Council recommends that AT&T provide the above referenced documentation on or before November 20, 2019. If additional time is needed to gather the requested information, please submit a written request for an extension of time prior to November 20, 2019.

Thank you for your attention to this matter. Should you have any questions, please feel free to contact me at 860-827-2951.

Sincerely,

Melanie Bachman  
Executive Director

RE: **EM-CING-057-180403** - New Cingular Wireless PCS, LLC (AT&T) notice of intent to modify an existing telecommunications facility located at 363 Riversville Road, Greenwich, Connecticut.

Dear Mr. Roberts:

The Connecticut Siting Council (Council) hereby acknowledges your notice to modify this existing telecommunications facility, pursuant to Section 16-50j-73 of the Regulations of Connecticut State Agencies with the following conditions:

1. The antenna mount shall be reinforced and antenna position relocated in accordance with the mount analysis prepared by Hudson Design Group dated April 6, 2018 and stamped by Daniel Hamm;
2. Within 45 days following completion of tower modifications, AT&T shall provide documentation signed by a professional engineer that its installation complied with the recommendations presented in the mount analysis;
3. Any deviation from the proposed modification as specified in this notice and supporting materials with the Council shall render this acknowledgement invalid;
4. Any material changes to this modification as proposed shall require the filing of a new notice with the Council;
5. Within 45 days after completion of construction, the Council shall be notified in writing that construction has been completed;
6. Any nonfunctioning antenna and associated antenna mounting equipment on this facility owned and operated by AT&T shall be removed within 60 days of the date the antenna ceased to function;
7. The validity of this action shall expire one year from the date of this letter; and
8. The applicant may file a request for an extension of time beyond the one year deadline provided that such request is submitted to the Council not less than 60 days prior to the expiration.

The proposed modifications including the placement of all necessary equipment and shelters within the tower compound are to be implemented as specified here and in your notice dated March 30, 2018, and additional information received May 30, 2018. The modifications are in compliance with the exception criteria in Section 16-50j-72 (b) of the Regulations of Connecticut State Agencies as changes to an existing facility site that would not increase tower height, extend the boundaries of the tower site by any dimension, increase noise levels at the tower site boundary by six decibels or more, and increase the total radio frequencies electromagnetic radiation power density measured at the tower site boundary to or above the standards adopted by the Federal Communications Commission pursuant to Section 704 of the Telecommunications Act of 1996 and by the state Department of Energy and Environmental Protection pursuant to Connecticut

General Statutes § 22a-162. This facility has also been carefully modeled to ensure that radio frequency emissions are conservatively below state and federal standards applicable to the frequencies now used on this tower.

This decision is under the exclusive jurisdiction of the Council. Please be advised that the validity of this action shall expire one year from the date of this letter. Any additional change to this facility will require explicit notice to this agency pursuant to Regulations of Connecticut State Agencies Section 16-50j-73. Such notice shall include all relevant information regarding the proposed change with cumulative worst-case modeling of radio frequency exposure at the closest point of uncontrolled access to the tower base, consistent with Federal Communications Commission, Office of Engineering and Technology, Bulletin 65. Thank you for your attention and cooperation.

Sincerely,

Melanie A. Bachman  
Executive Director

MAB/CMW/jmb
