Re: **EM-VER-047-111024**  
**257 Norman Road, Jewett City (Griswold), Connecticut**  
**Completion of Construction Activity**

Dear Mr. Martin:

On November 10, 2011, the Siting Council acknowledged receipt of Cellco's notice of intent to modify its existing telecommunications facility at 257 Norman Road in Jewett City. The modification involved the replacement of Cellco's existing antennas and the installation of six additional coax cables.

As a condition of this acknowledgement, Cellco was required to provide the Council with a letter stating that the modifications would comply with the engineer's recommendations. Attached is a Tower Modification Certification Letter verifying that this condition has been satisfied. All construction associated with these modifications has now been completed.

**Centek Project No.:** 12005.CO3

Dear Mr. Gauger,

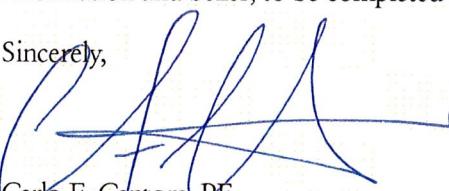

We are providing this "Existing Telecommunications Facility Tower Modification Certification Letter" with regard to the antenna upgrade by Verizon Wireless at the above referenced project.

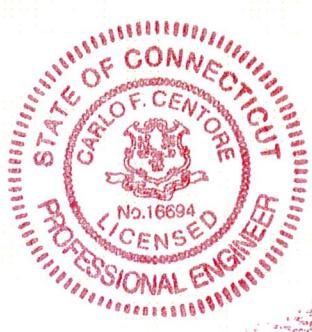

The following are the basis for substantiating compliance with the design documents prepared by FDH Engineering:

- Review of the FDH structural analysis dated 3/22/2011.
- Field observations by Centek personnel of coax installation on 2/20/2012 which determined all coax lines were installed according to the recommendations of the structural analysis report prepared by FDH on 3/22/2011.

The work under this Contract has been reviewed and found, to the Engineer's best knowledge, information and belief, to be completed in general compliance with the documents referenced above.

Sincerely,

  
Carlo F. Centore, PE  
Principal ~Structural Engineer
