Re: **Request of Cellco Partnership d/b/a Verizon Wireless for an Order to Approve the Shared Use of an Existing Tower at 289H Mountain Street, Hartford, Connecticut**

Dear Ms. Bachman:

Pursuant to Connecticut General Statutes (“C.G.S.”) §16-50aa, as amended, Cellco Partnership d/b/a Verizon Wireless (“Cellco”) hereby requests an order from the Connecticut Siting Council (“Council”) to approve the shared use by Cellco of an existing telecommunications tower, owned by American Tower Corporation (“ATC”) at 289H Mountain Street in Hartford, Connecticut (the “Property”). Cellco requests that the Council find that the proposed shared use of the ATC tower satisfies the criteria of C.G.S § 16-50aa and issue an order approving the proposed shared use. A copy of this letter is being sent to Hartford’s Mayor Pedro E. Segarra. The Property is owned by the Metropolitan District Commission (“MDC”).

**Background**

The existing ATC facility consists of a 110-foot monopole tower within a fenced compound. The tower is currently being shared by Clearwire at the 110-foot level, AT&T at the 100-foot level, T-Mobile at the 89.5-foot level; Metro PCS at the 73-foot level; and Town of West Hartford antennas at the 96-foot level. Equipment associated with the existing antennas is located within a fenced compound at the base of the tower.

Cellco is licensed by the Federal Communications Commission (“FCC”) to provide wireless services throughout the State of Connecticut. Cellco and ATC have agreed to the proposed shared use of the Mountain Street tower pursuant to mutually acceptable terms and conditions, and ATC has authorized Cellco to apply for all necessary permits and approvals that may be required to share the existing tower. (See Owner’s Authorization Letter included in Attachment 1).

Cellco proposes to install twelve (12) antennas at the 80-foot level on the tower. Cellco will also install six (6) remote radio heads (RRHs) behind its 2100 MHz and 700 MHz antennas. Equipment associated with Cellco’s antennas and a propane-fueled back-up generator will be located inside the existing 12’ x 30’ shelter in the northeast corner of the compound.<sup>1</sup> Included in Attachment 2 are Cellco’s project plans showing the location of all proposed site improvements, the limits of the facility compound and the limits of ATC’s leased area.

C.G.S. § 16-50aa(c)(1) provides that, upon written request for approval of a proposed shared use, “if the council finds that the proposed shared use of the facility is technically, legally, environmentally and economically feasible and meets public safety concerns, the council shall issue an order approving such shared use.” Cellco respectfully submits that the shared use of the existing tower satisfies these criteria.

**A. Technical Feasibility.** The existing tower is structurally capable of supporting Cellco’s antennas and related equipment. The proposed shared use of this tower is, therefore, technically feasible. A Structural Analysis Report verifying the structural integrity of the tower, and its ability to support Cellco’s antennas and related equipment is included in Attachment 3.

**B. Legal Feasibility.** Under C.G.S. § 16-50aa, the Council has been authorized to issue orders approving the shared use of an existing tower such as the ATC tower in Hartford. This authority complements the Council’s prior-existing authority under C.G.S. § 16-50p to issue orders approving the construction of new towers that are subject to the Council’s jurisdiction. In addition, § 16-50x(a) directs the Council to “give such consideration to other state laws and municipal regulations as it shall deem appropriate” in ruling on requests for the shared use of existing tower facilities. Under the statutory authority vested in the Council, an order by the Council approving the requested shared use would permit the Applicant to obtain a building

---

<sup>1</sup> The placement of Cellco’s equipment shelter was the subject of an exempt modification filing with the Council on February 7, 2014 (EM-VER-064-140210).

Melanie A. Bachman  
June 13, 2014  
Page 3

permit for the proposed installations.

**C. Environmental Feasibility.** The proposed shared use of the ATC tower would have a minimal environmental effect, for the following reasons:

1. The proposed installation of twelve (12) antennas and related RRHs at the 80-foot level on the existing 110-foot tower would have an insignificant incremental visual impact on the area around the existing tower. Cellco would place its shelter and propane fuel tank within the limits of the existing gravel facility compound. Cellco's shared use of this tower would therefore, not cause any significant change or alteration in the physical or environmental characteristics of the existing site.
2. Noise associated with the equipment shelter's air conditioning ("A/C") units was evaluated for compliance with State and/or local noise standards. According to the Noise Compliance Study included in Attachment 4, noise from the shelter's A/C units will not exceed State and/or local noise limits. Noise associated with Cellco's emergency back-up generator is exempt from State and local noise standards.
3. Operation of Cellco's antennas at this site would not exceed the Radio Frequency ("RF") emissions standards adopted by the Federal Communications Commission ("FCC"). Included in Attachment 5 are Far Field Approximation tables for each of Cellco's operating frequencies. In each frequency range, the highest RF emissions levels will occur at a point more than 200 feet from the base of the tower. These Far Field calculations demonstrate that Cellco's antennas will operate well below the FCC guidelines for RF emissions.
4. Under ordinary operating conditions, the proposed installation would not require the use of any water or sanitary facilities and would not generate air emissions or discharges to water bodies or sanitary facilities. After construction is complete the proposed installations would not generate any increased traffic to the ATC facility other than periodic (monthly) maintenance visits to the cell site.

Melanie A. Bachman  
June 13, 2014  
Page 4

The proposed use of the ATC facility would, therefore, have a minimal environmental effect, and is environmentally feasible.

**D. Economic Feasibility.** As previously mentioned, ATC and Cellco have entered into a lease for the shared use of the existing tower on mutually agreeable terms. The proposed tower sharing is, therefore, economically feasible. (See Attachment 1).

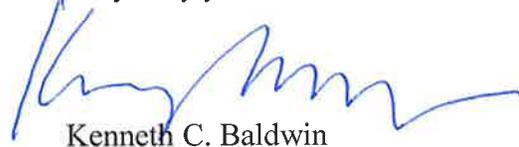

**E. Public Safety Concerns.** As discussed above, the tower is structurally capable of supporting Cellco's full array of twelve (12) antennas, RRHs and related equipment. Cellco is not aware of any public safety concerns relative to the proposed sharing of the existing ATC tower. In fact, the provision of new and improved wireless service through shared use of the existing tower is expected to enhance the safety and welfare of area residents and members of the general public traveling through Hartford.

**Conclusion**

For the reasons discussed above, the proposed shared use of the existing ATC tower at the Property satisfies the criteria stated in C.G.S. § 16-50aa and advances the General Assembly's and the Council's goal of preventing the unnecessary proliferation of towers in Connecticut. The Applicant, therefore, respectfully requests that the Council issue an order approving the proposed shared use of the ATC tower.

Thank you for your consideration of this matter.

Very truly yours,

Kenneth C. Baldwin

## Introduction

The purpose of this report is to summarize results of a structural analysis performed on the 110 ft monopole to reflect the change in loading by Verizon.

## Supporting Documents

<b>Tower Drawings</b>	Mapped by Smith Cullum Site #CT-0017(A), dated June 6, 2001
<b>Foundation Drawing</b>	Girard & Co Engineering Job #39902, dated April 29, 1988
<b>Geotechnical Report</b>	TEP Project #071162.01, dated July 23, 2007
<b>Modifications</b>	ATC Job #42719232, dated January 12, 2009 ATC Job #595333, dated September 25, 2009 ATC Job # 44662232, dated March 30, 2010

## Analysis

The tower was analyzed using American Tower Corporation's tower analysis software. This program considers an elastic three-dimensional model and second-order effects per ANSI/TIA-222.

<b>Basic Wind Speed:</b>	95 mph (3-Second Gust)
<b>Basic Wind Speed w/ Ice:</b>	50 mph (3-Second Gust) w/ 1" radial ice concurrent
<b>Code:</b>	ANSI/TIA-222-G / 2003 IBC w/ 2005 CT Supplement & 2009 CT Amendment
<b>Structure Class:</b>	II
<b>Exposure Category:</b>	B
<b>Topographic Category:</b>	4
<b>Crest Height:</b>	36.4 ft

## Conclusion

Based on the analysis results, the structure meets the requirements per the applicable codes listed above. The tower and foundation can support the equipment as described in this report.

If you have any questions or require additional information, please contact American Tower via email at [Engineering@americantower.com](mailto:Engineering@americantower.com). Please include the American Tower site name, site number, and engineering number in the subject line for any questions.

**Equipment to be Removed**

Elevation <sup>1</sup> (ft)		Qty	Antenna	Mount Type	Lines	Carrier
Mount	RAD					
No loading considered as to be removed						

**Proposed Equipment**

Elevation <sup>1</sup> (ft)		Qty	Antenna	Mount Type	Lines	Carrier
Mount	RAD					
80.0	80.0	3	Alcatel-Lucent RRH2x40 (700)	T-Arms	(12) 1 5/8" Coax (2) 1 5/8" Hybriflex	Verizon
		3	Alcatel-Lucent RRH2x40-AWS			
		6	Antel BXA-171063-12CF-EDIN-5			
		1	RFS DB-T1-6Z-8AB-OZ			
		6	Antel BXA-70063-6CF-EDIN-2			

<sup>1</sup>Mount elevation is defined as height above bottom of steel structure to the bottom of mount, RAD elevation is defined as center of antenna above ground level (AGL).

Install proposed coax outside the pole shaft. Stacking coax is not allowed.

**Structure Usages**

Structural Component	Controlling Usage	Pass/Fail
Anchor Bolts	54%	Pass
Shaft	91%	Pass
Base Plate	98%	Pass
Flanges	17%	Pass
Reinforcement	88%	Pass

**Foundations**

Reaction Component	Analysis Reactions
Moment (Kips-Ft)	1,596.8
Axial (Kips)	66.9
Shear (Kips)	23.3

The structure base reactions resulting from this analysis were found to be acceptable through analysis based on geotechnical and foundation information, therefore no modification or reinforcement of the foundation will be required.

**Deflection and Sway\***

Antenna Elevation (ft)	Deflection (ft)	Sway (Rotation) (°)
80.0	0.905	1.175

\*Deflection and Sway was evaluated considering a design wind speed of 60 mph (3-Second Gust) per ANSI/TIA-222-G

## Standard Conditions

All engineering services are performed on the basis that the information used is current and correct. This information may consist of, but is not necessary limited, to:

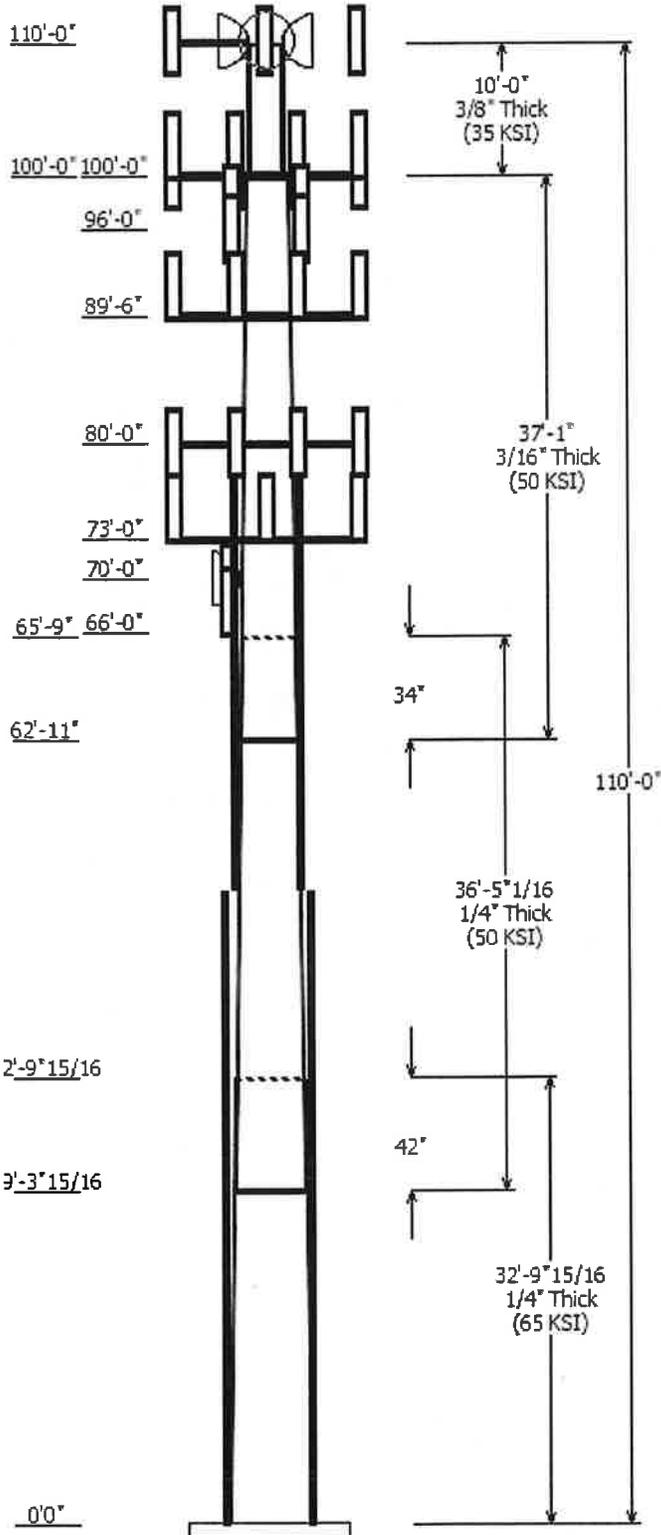

- Information supplied by the client regarding the structure itself, antenna, mounts and feed line loading on the structure and its components, or other relevant information.
- Information from drawings in the possession of American Tower Corporation, or generated by field inspections or measurements of the structure.

It is the responsibility of the client to ensure that the information provided to ATC Tower Services, Inc. and used in the performance of our engineering services is correct and complete. In the absence of information to the contrary, we assume that all structures were constructed in accordance with the drawings and specifications and that their capacity has not significantly changed from the "as new" condition.

Unless explicitly agreed by both the client and American Tower Corporation, all services will be performed in accordance with the current revision of ANSI/TIA -222. The design basic wind speed will be determined based on the minimum basic wind speed as prescribed in ANSI/TIA-222. Although every effort is taken to ensure that the loading considered is adequate to meet the requirements of all applicable regulatory entities, we can provide no assurance to meet any other local and state codes or requirements. If wind and ice loads or other relevant parameters are to be different from the minimum values recommended by the codes, the client shall specify the exact requirement.

All services are performed, results obtained, and recommendations made in accordance with generally accepted engineering principles and practices. ATC Tower Services, Inc. is not responsible for the conclusions, opinions and recommendations made by others based on the information we supply.

© 2007 - 2014 by ATC IP LLC. All rights reserved.

Pole : 302481  
 Location : Hrfr - South, CT  
 Height : 110.0 (ft)  
 Base Dia : 30.00 (in)  
 Top Dia : 12.75 (in)  
 Shape : 12 Sides. Sect 4: Round  
 Taper : 0.163751 (in/ft)

Code: ANSI/TIA-222 Rev G  
 Struct Class : II  
 Exposure Category : B  
 Topographic Category : 4  
 Base Elev : 0.000 (ft)

---

February 15, 2014

Doug Drost  
Project Engineer, Wireless  
Centek Engineering, Inc.  
63-2 North Branford Road  
Branford, Ct. 06405

Subject: Hartford S 3 - CSC Noise Compliance Study

Dear Mr. Drost:

The noise levels for the V1; V2; A1; A2; T1 and T2 wall mounted HVAC units were calculated while each one was operating separately. Typically only one of the two units on each equipment shelter operates at any one time. Due to the orientation of the shelters; and the distances between them; I did not find any carry-over, or cumulative noise effect from one shelter to another. The noise level was then projected to each property line. The resultant noise level was compared to the State of Ct. Noise Regulation. The Regulation allows a noise level of 55 dBA (daytime); and 45 dBA (nighttime), when measured at a Residential receptor's property line. I found that the six (6) air-conditioner units meet the conditions for compliance as set forth in the Regulation at all property lines.

Allan Smardin  
HMB Acoustics LLC

			North	South	East	West

**EXISTING COLOCATOR EQUIPMENT OWNER:**

ID	Noise Emitter	Make/Model	Prop. Line. Dist. (FT)			
			North	South	East	West

**CONCLUSION:**

<b>Daytime Regulation:</b> 55dBA	<b>Nighttime Regulation:</b> 45dBA
<b>Compliance:</b> <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	<b>Compliance:</b> <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No

**BASIS OF FINDINGS:**

North property line: V1=33dBA; V2=33 dBA; A1=42 dBA; A2=42 dBA; T1=40dBA; T2=40 dBA  
 South property line: V1=28dBA; V2=28 dBA; A1=27 dBA; A2=27 dBA; T1=29dBA; T2=29 dBA  
 East property line: V1=38dBA; V2=38 dBA; A1=28 dBA; A2=28 dBA; T1=38dBA; T2=37 dBA  
 West property line: V1=302dBA; V2=25 dBA; A1=26 dBA; A2=26 dBA; T1=37dBA; T2=36 dBA

The dBA levels take into account the acoustical shielding effect provided by other Structures on the property.

The projected noise levels from T-Mobile and Metro PCS and Clearwire pad mounted equipment is inaudible at the distance of 20 feet or greater. This equipment will have no adverse acoustical effect on the V1 and V2 noise projections.

Max% 5.68%

Instructions:

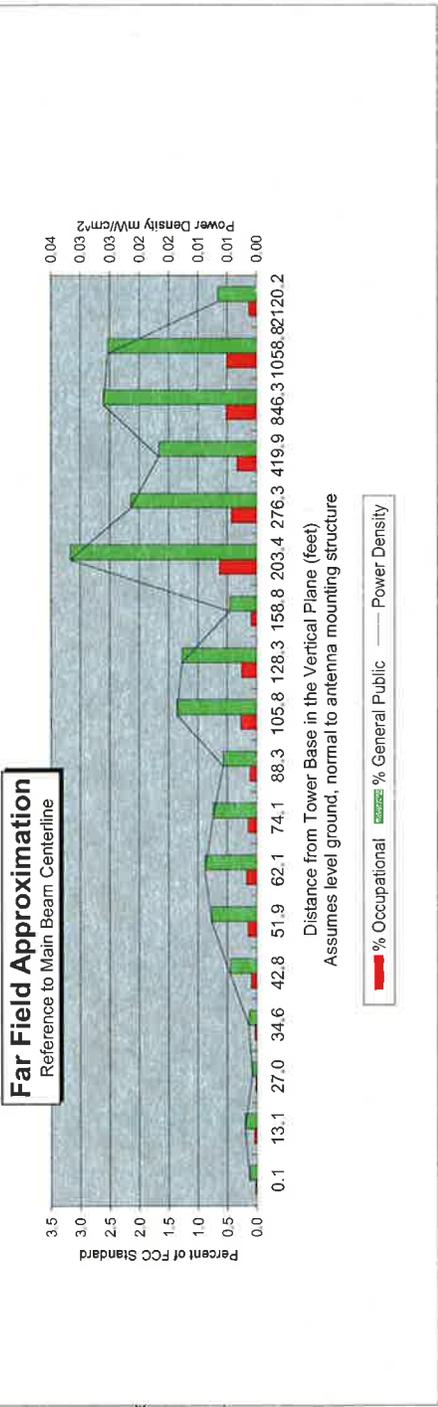

- 1) Fill in Site Location, Site number, Date, Name of Person Responsible for Date, and enter File Name to be saved as.
- 2) References to J4 refer to a point where the transmission line exits the equipment shelter and proceeds to the antenna(s). There is typically a connector located here where power measurements are made.
- 3) Enter Antenna Height (in feet to bottom of antenna), Antenna Gain (expressed as dBi, add 2.17 to dBi to obtain dBi), Antenna Size (vertical size in inches), Downtilt (in Degrees, enter zero if none), Feedline loss from J4 to Antenna, and J4 Pt.
- 4) From manufacturer's plots, or data sheet, input Angle from mainbeam and dB below mainbeam centerline.
- 5) Enter Reflection coefficient (2.56 would be typical, 1 for free space)
- 6) Spreadsheet calculates actual power density, then relates as Occupational or General Population percentage of FCC Standard.
- 7) An odd distance may be entered in the rightmost column of the lower table.
