RE: **EM-VER-066-040108** - Cellco Partnership d/b/a Verizon Wireless notice of intent to modify an existing telecommunications facility located at 123 Campville Hill Road, Harwinton, Connecticut.

Dear Attorney Baldwin:

At a public meeting held on February 3, 2004, the Connecticut Siting Council (Council) acknowledged your notice to modify this existing telecommunications facility, pursuant to Section 16-50j-73 of the Regulations of Connecticut State Agencies.

The proposed modifications are to be implemented as specified here and in your notice dated January 8, 2004. The modifications are in compliance with the exception criteria in Section 16-50j-72 (b) of the Regulations of Connecticut State Agencies as changes to an existing facility site that would not increase tower height, extend the boundaries of the tower site, increase noise levels at the tower site boundary by six decibels, and increase the total radio frequencies electromagnetic radiation power density measured at the tower site boundary to or above the standard adopted by the State Department of Environmental Protection pursuant to General Statutes § 22a-162. This facility has also been carefully modeled to ensure that radio frequency emissions are conservatively below State and federal standards applicable to the frequencies now used on this tower.

This decision is under the exclusive jurisdiction of the Council. Any additional change to this facility will require explicit notice to this agency pursuant to Regulations of Connecticut State Agencies Section 16-50j-73. Such notice shall include all relevant information regarding the proposed change with cumulative worst-case modeling of radio frequency exposure at the closest point of uncontrolled access to the tower base, consistent with Federal Communications Commission, Office of Engineering and Technology, Bulletin 65. Any deviation from this format may result in the Council implementing enforcement proceedings pursuant to General Statutes § 16-50u including, without limitation, imposition of expenses resulting from such failure and of civil penalties in an amount not less than one thousand dollars per day for each day of construction or operation in material violation.

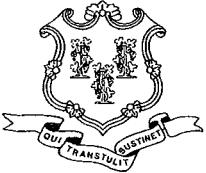

Thank you for your attention and cooperation.

Very truly yours,

Pamela B. Katz, P.E.
Chairman

PBK/laf

RE: **EM-VER-066-040108** – Cellco Partnership d/b/a Verizon Wireless notice of intent to modify an existing telecommunications facility located at 123 Campville Hill Road, Harwinton, Connecticut.

Dear Ms. Knudsen:

The Connecticut Siting Council (Council) received this request to modify an existing telecommunications facility, pursuant to Regulations of Connecticut State Agencies Section 16-50j-72.

The Council will consider this item at the next meeting tentatively scheduled for February 3, 2004, at 1:30 p.m. in Hearing Room One, Ten Franklin Square, New Britain, Connecticut.

Please call me or inform the Council if you have any questions or comments regarding this proposal.

Thank you for your cooperation and consideration.

Very truly yours,

A handwritten signature in black ink, appearing to read "S. Derek Phelps".

Re: **Notice of Exempt Modification**
123 Campville Hill Road
Harwinton, Connecticut

Dear Mr. Phelps:

Cellco Partnership d/b/a Verizon Wireless ("Cellco") intends to install antennas on an existing tower at 123 Campville Hill Road in Harwinton, Connecticut. Please accept this letter as notification pursuant to R.C.S.A. § 16-50j-73, for construction that constitutes an exempt modification pursuant to R.C.S.A. § 16-50j-72(b)(2). In accordance with R.C.S.A. § 16-50j-73, a copy of this letter is being sent to the Harwinton First Selectman, Marie Knudsen.

The facility consists of a 177-foot self-supporting monopole tower, capable of supporting multiple carriers within an approximately 64' x 72' site compound. The tower is owned and operated by Sprint Sites USA ("Sprint"). The tower is currently shared by Sprint PCS at the 180-foot level, T-Mobile at the 168-foot level and AT&T at the 157-foot level. Cellco proposes to install twelve (12) panel-type antennas at the 147-foot level on the tower and a 12' x 30' single-story equipment shelter near the base of the tower. (See Attachment 1- Project Plans).

Law Offices

BOSTON

HARTFORD

NEW LONDON

STAMFORD

GREENWICH

NEW YORK

www.rc.com

The planned modifications to the Harwinton facility fall squarely within those activities explicitly provided for in R.C.S.A. § 16-50j-72(b)(2).

1. The proposed modification will not increase the overall height of the existing tower. Cellco's antennas will be mounted with their centerline at the 147-foot level on the 177-foot tower.

ROBINSON & COLE LLP

S. Derek Phelps
January 8, 2004
Page 2

2. The proposed installation of twelve (12) panel-type antennas and a 12' x 30' equipment shelter will not require an extension of the site boundaries.

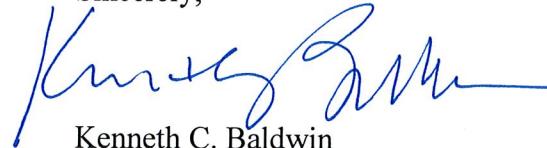

3. The proposed modification will not increase the noise levels at the facility by six decibels or more.

4. The operation of the antennas will not increase radio frequency (RF) power density levels at the facility to a level at or above the Federal Communications Commission (FCC) adopted safety standard. The combined worst-case RF power density calculations for existing and Cellco antennas would be 6.44% of the FCC standard (See Attachment 2).

Also included as Attachment 3 is an engineer's certification verifying that the tower can accommodate the existing and proposed antennas and related equipment.

For the foregoing reasons, Cellco respectfully submits that the proposed antenna installation at the Harwinton facility tower constitutes an exempt modification under R.C.S.A. § 16-50j-72(b)(2).

Sincerely,

Kenneth C. Baldwin

**177 ft SUMMIT Monopole
Structural Analysis**

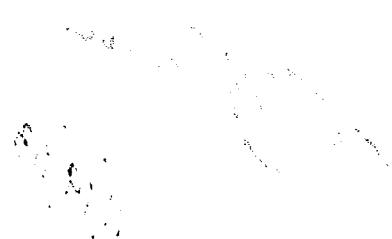

**Prepared for:
Sprint Sites USA
535 East Crescent Ave
Ramsey, NJ 07446**

**Site: CT33XC111
Verizon
Harwinton, CT**

November 19, 2003

100

Mr. Russ Van Oudenaren
Sprint Sites USA
535 East Crescent Ave
Ramsey, NJ 07446

Re: Site Number CT33XC111 – Harwinton, CT.

Dear Mr. Van Oudenaren:

We have completed the structural analysis for the existing monopole, located at the above referenced site. The purpose of this analysis is to determine that the existing monopole design is in conformance with the EIA/TIA-222-F standard for the proposed antennae loads installation. Refer to the Review and Recommendations section at the end of this report for the analysis results.

Description of Structure:

The structure is a 177 ft SUMMIT Monopole.

Refer to SUMMIT job # 10633 dated August 2, 2000 for a detailed description of the structure.

Method of analysis:

The tower was analyzed using Semaan Engineering Solutions' software suite for communication structures. The structural analysis is performed using the SAPS finite element engine. The method is 3D, non-linear, which accounts for the second order geometric effects due to the displacements. It also treats guys as exact cable elements and therefore is ideal for guyed towers. The analysis was performed in conformance with **EIA/TIA-222-F for a basic wind speed of 80 mph and 1/2" radial ice with reduced wind speed**. Wind is applied to the structure, accessories and antennas.

Structure loading:

Per the loading sheet supplied, the analysis was performed using the following loading: (Proposed loading in bold)

Elev. (ft)	Qty.	Antennas and Mounts	Coax	Owner
180.0	12	DB980H90 Mounted On a Low Profile Platform	(12) 1-5/8	Sprint
168.0	6	RR90-17 Mounted On (3) T-Arms	(12) 1-5/8	VoiceStream
157.0	2	Allgon 7250 Mounted On a Low Profile Platform	(2) 1-5/8	AT&T
157.0	4	Allgon 7143.26 Mounted On a Low Profile Platform	(4) 1-5/8	AT&T
157.0	2	Allgon 7144.26 Mounted On Same Low Profile Platform	(4) 1-5/8	AT&T
157.0	1	Allgon 7262 Mounted On Same Low Profile Platform	(1) 1-5/8	AT&T
147.0	12	DB950G85E-M Mounted On a Low Profile Platform	(12) 1-5/8	Verizon

All new access holes shall be reinforced with welded rims that are compatible with the pole and to be sized and supplied by pole manufacturer.

All transmission lines are assumed running inside of pole shaft.

Results of Analysis:

Refer to the attached Computer Summary sheets for detailed analysis results.

(C.S.G.)

Structure:

The existing monopole is structurally capable of supporting the existing and proposed antennas. The maximum structure usage is: 97.1%.

Foundation:

Pole Reactions	Original Design Reactions	Current Analysis Reactions	% Of Design
Moment (ft-kips)	3,000.00	2,952.83	98.4
Shear (kips)	24.00	23.37	97.4

The structure base reactions resulting from this analysis do not exceed the ones shown on the original structure drawings.

Review and Recommendations:

Based on the analysis results, the existing structure meets the requirements per the EIA/TIA-222-F standards for a basic wind speed of 80 mph and 1/2" radial ice with reduced wind speed.
