RE: **EM-T-MOBILE-078-221116** – T-Mobile notice of intent to modify an existing telecommunications facility located at 205 Spring Hill Road (a/k/a 230 Clover Mill Road), Mansfield, Connecticut.

Dear Eric Breun:

The Connecticut Siting Council (Council) received a notice of intent to modify the above-referenced facility on November 16, 2022. On December 2, 2022 the Council issued a letter (enclosed) stating that the radio frequency (RF) analysis provided with the request does not include a cumulative far-field RF analysis. The Council recommended that T-Mobile provide a rigorous cumulative far-field analysis that includes all entities located on the tower and accounts for a 6-foot tall person and the actual antenna pattern for the proposed modifications to the facility with a cumulative %MPE at or below 100%, on or before January 3, 2023.

On December 21, 2022, the Council received an electronic mail with a revised filing including an RF analysis dated December 20, 2022. However, the RF analysis provides a far field %MPE for T-Mobile in addition to the near field %MPE values from other wireless carriers located on the tower. The RF analysis does not provide a rigorous **cumulative** far-field analysis for all entities located on the tower.

Therefore, the exempt modification request remains incomplete at this time. The Council recommends that T-Mobile provide a revised **cumulative** RF Analysis that includes a rigorous far-field analysis for T-Mobile's proposed installation and other entities located on the tower that accounts for a 6-foot tall person and the actual antenna pattern for the proposed modifications to the facility with a cumulative %MPE at or below 100% and the distance at which the highest cumulative %MPE is calculated, on or before January 27, 2023. If additional time is needed to gather the requested information, please submit a written request for an extension of time prior to January 27, 2023.

Please provide an electronic version of the requested information for the incomplete exempt modification to be rendered complete and processed. Please include the Council's exempt modification identification number referenced above with the submittal.

This notice of incompleteness shall have the effect of tolling the FCC 60-day timeframe in accordance with Paragraph 217 of the FCC Wireless Infrastructure Report and Order issued on October 21, 2014 (FCC 14-153).

Thank you for your attention to this matter. Should you have any questions, please feel free to contact me at 860-827-2951.

Sincerely,

A handwritten signature in dark ink, appearing to read "Melanie Bachman", written in a cursive style.

Melanie Bachman
Executive Director

RE: **EM-T-MOBILE-078-221116** – T-Mobile notice of intent to modify an existing telecommunications facility located at 205 Spring Hill Road (a/k/a 230 Clover Mill Road), Mansfield, Connecticut.

Dear Eric Breun:

The Connecticut Siting Council (Council) received a notice of intent to modify the above-referenced facility on November 16, 2022.

According to Section 16-50j-71 of the Regulations of Connecticut State Agencies, "...any modification, as defined in Section 16-50j-2a of the Regulations of Connecticut State Agencies, to an existing tower site, except as specified in Sections 16-50j-72 and 16-50j-88 of the Regulations of Connecticut State Agencies, may have a substantial adverse environmental effect."

Staff has reviewed this exempt modification request for completeness and has identified a deficiency in the radio frequency (RF) analysis. On September 23, 2022, the Council issued a memorandum to telecommunications industry representatives requiring a cumulative far-field RF Analysis to be provided with all telecommunications exempt modification requests. The RF analysis prepared by EBI Consulting, dated September 9, 2022, and provided with the request does not include a cumulative far-field RF analysis. A copy of the memorandum is available on the Council's website at the following link: https://portal.ct.gov/-/media/CSC/Guides/2022/20220923-farfieldmemo_final.pdf.

Therefore, the exempt modification request is incomplete at this time. The Council recommends that T-Mobile provide a rigorous cumulative far-field analysis that includes all entities located on the tower and accounts for a 6-foot tall person and the actual antenna pattern for the proposed modifications to the facility with a cumulative %MPE at or below 100%, on or before January 3, 2022. If additional time is needed to gather the requested information, please submit a written request for an extension of time prior to January 3, 2022. **Please provide an electronic version of the requested information for the incomplete exempt modification to be rendered complete and processed. Please include the Council's exempt modification identification number referenced above with the submittal.**

This notice of incompleteness shall have the effect of tolling the Federal Communications Commission (FCC) 60-day timeframe in accordance with Paragraph 217 of the FCC Wireless Infrastructure Report and Order issued on October 21, 2014 (FCC 14-153).
