Notice of Compliance with Conditions and Construction Completion**

Dear Attorney Bachman:

The Connecticut Siting Council ("Council") acknowledged the above referenced T-Mobile Northeast LLC ("T-Mobile") notice of exempt modification on September 18, 2013.

The Council imposed the following condition in its acknowledgment:

- The coax shall be installed as recommended in the Structural Analysis prepared by GPD Group dated August 6, 2013 and stamped by John Kabak; and
- Within 45 days following completion of the antenna installation, T-Mobile shall provide documentation certified by a professional engineer that its installation complied with the recommendations of the structural analysis.

The attached PE Closeout Letter, dated April 17, 2015, provides evidence of compliance with the conditions outlined by the Council.

In addition, T-Mobile hereby notifies the Council that construction of the acknowledged modifications were complete as of May 20, 2014.

RE: PE Close Out Letter
EM-T-MOBILE # 080-130903 /T-Mobile Site ID # CT11132B

Dear Mr. Simons:

Tectonic Engineering & Surveying Consultants, P.C. ("Tectonic") has completed its post-construction review of the above-referenced site to determine whether T-Mobile complied with conditions imposed by the Connecticut Siting Council's (the "Council") acknowledgment letter, dated September 18, 2013 ("the Acknowledgment Letter"). Our compliance review included the following: the Acknowledgment Letter, the approved tower structural analysis report by GPD Group dated August 6, 2013 (the "Structural Analysis"), and the approved design plans by Tectonic dated October 7, 2013.

On behalf of Tectonic, based on my review of the information, I, Manojkumar B. Patel, licensed professional engineer number 22038, certify that to the best of my knowledge, the T-Mobile work complies with the recommendations of the approved Structural Analysis with minor field changes.

Specifically, as required by the Acknowledgment Letter, I have reviewed the T-Mobile work for compliance with the following structural conditions imposed by the Council, as noted:

- The coax shall be installed as recommended in the Structural Analysis Report prepared by GPD Group dated August 6, 2013 and stamped by John Kabak.

Three (3) 7/8" fiber cables were installed instead of the one (1) 1-1/4" fiber cable proposed in the approved drawings. However three (3) 1-5/8" coax cables were removed from the tower so the total number of cables remained at eighteen (18), one (1) less than what was considered in the Structural Analysis.

Should you have any questions regarding the foregoing review, please contact me directly at 845-567-6656 ext. 2808.

Very truly yours,

Manojkumar B. Patel, P.E.
Sr. Project Manager
