RE: Exempt Modification EM-EVER-089-230524e - Modifications to lack Rock Substation, 30 Old Field Street, New Britain, Connecticut: Notice of Construction Completion

Dear Attorney Bachman:

On May 24, 2023, The Connecticut Light and Power Company doing business as Eversource Energy ("Eversource") provided notice to the Connecticut Siting Council (Council) of its intent, in accordance with Section 16-50j-57(b)(2) of the Regulations of Connecticut State Agencies, to replace a transformer and conduct related activities at its existing Black Rock Substation (the "Substation") in order to accept delivery of power generated by the approximately 20-megawatt fuel cell (developed by Generate NB Fuel Cells, LLC) into Eversource's system.

Pursuant to Condition 3 of the Council's June 12, 2023 acknowledgement of Eversource's notice to modify the Substation, Eversource hereby informs the Council that the proposed modifications were substantially completed and the replacement transformer was placed into service on May 28, 2024. A representative photograph of the facility modifications is attached.

Should you have any questions regarding the completion of this work, please do not hesitate to contact me.

Sincerely,

A handwritten signature in cursive script that reads "Deborah Denfeld".
