Notice of Compliance with Conditions and Construction Completion

Dear Attorney Bachman:

The Connecticut Siting Council ("Council") acknowledged the above referenced T-Mobile Northeast LLC ("T-Mobile") notice of exempt modification on March 21, 2014. The Council imposed the following condition in its acknowledgment:

- The coax and TMAs must be installed in accordance with the Structural Analysis Report prepared by FDH Engineering, dated February 18 2014;
- Within 45 days following completion of the antenna installation, T-Mobile shall provide documentation certified by a professional engineer that its installation complied with the requirements of the structural analysis;
- Any deviation from the proposed modification as specified in this notice and supporting materials with the Council shall render this acknowledgement invalid;
- Any material changes to this modification as proposed shall require the filing of a new notice with the Council;
- Within 45 days after completion of construction, the Council shall be notified in writing that construction has been completed;
- The validity of this action shall expire one year from the date of this letter; and
- The applicant may file a request for an extension of time beyond the one year deadline provided that such request is submitted to the Council not less than 60 days prior to the expiration.

The attached PE Closeout Letter, dated July 16, 2015, provides evidence of compliance with the conditions outlined by the Council.

In addition, T-Mobile hereby notifies the Council that construction of the acknowledged modifications were complete as of September 24, 2014.

Please don't hesitate to contact me with any questions.

Sincerely,

Sam Simons

Samuel Simons, T-Mobile

**RE: PE Close Out Letter
EM-T-MOBILE # 092-140305/T-Mobile Site ID # CTNH410A**

Dear Mr. Simons,

Velocitel, Inc., d.b.a. FDH Velocitel has completed a post-construction review of the above-referenced site to determine whether T-Mobile complied with conditions imposed by the Connecticut Siting Council's acknowledgment letter, dated March 21, 2014. Our compliance review included the Connecticut Siting Council's acknowledgment letter and the approved tower Structural Analysis Report by FDH Engineering, project number 1422R71400, dated February 18, 2014.

On behalf of FDH Velocitel, based on my review of the information, I, Dennis D. Abel, certify that to the best of my knowledge, the T-Mobile work complies with the recommendations of the approved Structural Analysis with minor field changes.

- Six (6) of the nine (9) original RFS panels were removed and six (6) RFS ATM1900 TMAs were installed behind the panel instead of six (6) new Ericsson panels with three (3) new Ericsson TMAs, which is less than what was considered in the Structural Analysis.
- The additional (1) 1-5/8"Ø Fiber line was not installed.

All observations were performed after the construction was complete and FDH Velocitel was not present during the construction phase. This review is not to determine the adequacy or effectiveness of the modification solution.

We at FDH Velocitel appreciate the opportunity of providing our continuing professional services to you. If you have any questions or need further assistance on this or any other projects please give us a call.

Respectfully submitted,

Dennis D. Abel, PE
Connecticut License #23247
