

Final Report of Special Inspections

Project: CT2080 (FA: 10035053)

Location: 26 Washington Street, New London, CT 06320

Owner: AT&T Mobility

Engineer of Record: Daniel P. Hamm, P.E.

Tower Engineering Professionals, LLC (TEP OPCO, LLC)

To the best of my information, knowledge and belief, the Special Inspections required by Chapter 17 for the project have been performed and all discovered discrepancies have been reported and resolved.

A Visual inspection from post construction photos of the installation appear to have no major discrepancies. Post construction photos are dated 1/24/2024.

Based on my knowledge, information and belief the wireless installation substantially conforms to the approved plans, IBC 2022 with 2018 CT State Building Code Amendments, Structural Standards for Antenna Supporting Structures and Antennas (ANSI/TIA-222-H), and the following:

1. Final Construction Drawings dated 06/05/2023, prepared by Tower Engineering Professionals, LLC (TEP OPCO, LLC) entitled "5G NR 1SR CBAND, 5G NR RADIO, SPLIT SECTOR LTE, 2022 UPGRADE."
2. Final Mount Analysis dated 11-09-2022, prepared by Tower Engineering Professionals, LLC.
3. Final Structural Analysis dated 02-28-2023, prepared by Tower Engineering Professionals, LLC.

All deviations from the approved plans do not endanger the intended occupancy of the facility and equipment substitutions are approved as equivalent to the original specifications.

Respectfully submitted,
Special Inspector

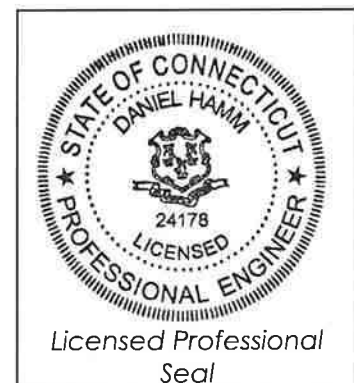

Daniel P. Hamm, P.E.
