Re: **EM-VER-099-150209 – Cellco Partnership d/b/a Verizon Wireless  
83 Reeds Gap Road, North Branford, Connecticut**

Dear Ms. Bachman:

On March 12, 2015, the Siting Council acknowledged receipt of Cellco's notice of intent to modify its telecommunications facility at 83 Reeds Gap Road in North Haven, Connecticut. The modifications involved the replacement of its antennas.

As a condition of the acknowledgement, Cellco was required to provide the Council with a letter confirming that it has complied with the recommendations made in the structural report included with its filing. Attached is a Professional Engineer's Tower Modification Certification letter verifying that the installation was completed according to the structural report.

If you have any questions please do not hesitate to contact me.

Sincerely,

Kenneth C. Baldwin

**Re: Tower Modification Certification**

**Project:** Verizon North Branford  
83 Reeds Gap Rd, North Branford, CT

**Tower Owner:** Crown Castle USA  
220 Lathrop Road, Candor, NY

**Engineer:** AW Solutions Inc.  
300 Crown Oak Centre Drive, Longwood, FL, 32750

**Centek Project No.:** 15003.016

**CSC Exempt Mod Reference No.:** EM-VER-099-150209

Dear Mr. Parks,

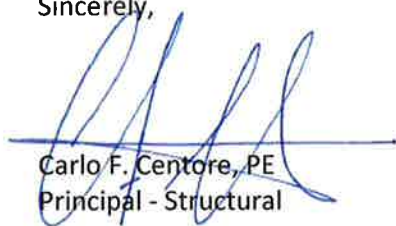

We are providing this "Tower Modification Certification" with regard to the structural components at the above referenced project.

The following are the basis for substantiating compliance with the tower modification documents prepared by AW Solutions Inc. (AW Project Number: 806386):

- Review of AW Solutions Inc. Structural Analysis Report dated 12/09/2014.
- Field observations by Centek Engineering personnel on 03/30/16 of the completed modifications which determined all modifications were installed in general compliance with the recommendations of the structural analysis report prepared by AW Solutions Inc. on 12/09/14.

The modification design prepared by AW Solutions Inc. demonstrates the tower will not exceed 100 percent of the post construction structural rating. The work under this Contract has been reviewed and found, to the Engineer's best knowledge, information and belief, to be completed in general compliance with the documents referenced above. This certification is not a review of the adequacy or effectiveness of the modification/reinforcement solution.

Sincerely,

  
Carlo F. Centore, PE  
Principal - Structural
