To the best of my information, knowledge and belief, the Special Inspections required by Chapter 17 for the project, have been performed and all discovered discrepancies have been reported and resolved.

Representatives of Fullerton Engineering performed the Final Inspections after the construction of the AT&T telecommunications facility at the above-referenced address.

Based on my knowledge, information and belief, the installation substantially conforms to the approved plans, IBC 2015, Structural Standards for Supporting Structures and Antennas (ANSI/TIA-222-G), and the following:

1. Final Construction Drawings dated 08-28-2019, prepared by Fullerton Engineering.

All deviations from the approved plans do not endanger the intended occupancy of the facility and equipment substitutions are approved as equivalent to the original specifications.

Interim reports submitted prior to this final report form a basis for and are to be considered an integral part of this final report.

Respectfully submitted,  
Special Inspector
