Re: Existing Telecommunications Facility Tower Certification Letter

Project: AT&T CT1284
1363 Boston Post Road
Old Saybrook, CT

Tower Owner: AT&T Towers

Engineer: GPD Group
502 S. Main Street, Suite 2531
Akron, OH

Centek Project No.: 14042.002

Dear Mr. Barnard,

We are providing this "Existing Telecommunications Facility Tower Certification Letter" with regard to the antenna upgrade by AT&T Mobility at the above referenced project.

The following are the basis for substantiating compliance with the GPD Group structural analysis report (GPD Project No. 2013723.13.105130.02 Rev.1) dated January 10, 2014:

- Review of the GPD Group structural analysis report dated 01/10/2014.
- Field observations by Centek personnel of the coax installation on 11/03/2014 which determined all coax lines were installed in general compliance with the recommendations of the structural analysis report prepared by GPD Group on 01/10/2014.

The structural analysis prepared by GPD Group demonstrates the tower will not exceed 100 percent of the post construction structural rating. The work under this Contract has been reviewed and found, to the Engineer's best knowledge, information and belief, to be completed in general compliance with the documents referenced above. This certification is not a review of the adequacy or effectiveness of the referenced structural analysis.

Sincerely,

Carlo F. Centore, PE
Principal ~ Structural Engineer
