Re: **EM-VER-107-140320 – Cellco Partnership d/b/a Verizon Wireless  
Grassy Hill Road, Orange, Connecticut**

Dear Ms. Bachman:

On April 16, 2014, the Siting Council acknowledged receipt of Cellco's notice of intent to modify its telecommunications facility off Grassy Hill Road in Orange, Connecticut. The modifications involved the replacement of certain antennas and installation of remote radio heads and a fiber optic antenna cable.

As a condition of that acknowledgement, Cellco was required to provide the Council with a letter stating that the installation complied with the engineer's recommendations. Attached is a Professional Engineer's Certification Letter verifying compliance with the structural recommendations. All construction associated with these modifications has now been completed.

If you have any questions please do not hesitate to contact me.

Sincerely,

Kenneth C. Baldwin

**Re: Tower Modification Certification**

**Project:** Verizon Orange 3  
Grassy Hill Road, Orange, CT

**Tower Owner:** Crown Castle  
46 Broadway, Albany, NY

**Engineer:** B&T Group  
1717 S. Boulder, Suite 300, Tulsa, OK

**Centek Project No.:** 14055.029

**CSC Exempt Mod Reference No.:** EM-VER-107-140320

Dear Mr. Parks,

We are providing this "Tower Modification Certification" with regard to the structural components at the above referenced project.

The following are the basis for substantiating compliance with the tower modification documents prepared by B&T Group (B&T Group Project Number: 88674.001.01):

- Review of the B&T Group Structural Analysis dated 10/24/2013.
- Review of the B&T Group Modification Drawings S1 thru S4 dated 10/24/2013.
- Review of the Sinnott Gering and Schmitt Towers Inc. Modification Inspection Report dated 02/06/2014.
- Field observations by Centek Engineering personnel on 05/21/2015 of the completed modifications which determined all modifications were installed in general compliance with the recommendations of the structural analysis report prepared by B&T Group on 10/24/2013.

The modification design prepared by B&T Group demonstrates the tower will not exceed 100 percent of the post construction structural rating. The work under this Contract has been reviewed and found, to the Engineer's best knowledge, information and belief, to be completed in general compliance with the documents referenced above. This certification is not a review of the adequacy or effectiveness of the modification/reinforcement solution.

Sincerely,

Carlo F. Centore, PE  
Principal - Structural
